Fundamentals Of Solar Heating:

Fundamentals of Solar Heating Richard C. Schubert, L. D. Ryan, 1981 **Fundamentals of Solar Heating**, 2000-09 One estimate made by engineers and scientists is that one fourth of all the energy used in the United States is consumed in heating buildings Billions of Btu s from coal oil gas and electricity are consumed every heating season We are depleting our supply of readily useable fuels at an ever increasing rate Fortunately future generations will have an energy source which every three days equals the combined energy in all the available coal oil and gas in the world That energy source is the SUN The amount of potentially useful energy is staggering but logical Since all forms of energy originate from the sun the basic source is by necessity a reservoir of almost unimaginable size Until a few years ago there was little if any general interest in solar applications to heating and cooling Today however there are many solar energy research and development activities in the heating and air conditioning industry Solar assisted heating is not a new idea Solar heaters were used in the Army camps of Southern California during World War I and solar water heaters received at least some use in some southern states during the 1930 s But prior to 1972 solar energy research applied to this industry was essentially privately funded Now federal funds are being allocated for solar programs and have had an impact on research and development activities A joint National Science Foundation National Aeronautical and Space Administration report published in 1972 is generally credited with having had the most public and political impact on bringing renewed attention to the potentials of solar energy With this endorsement and others Congress passed the ERDA Bill authorizing the establishment of the Energy Research and Development Administration Among other things ERDA replaced the old Atomic Energy Commission On October 1 1977 the Department of Energy DOE assumed the overall responsibility regarding energy Compared to the meager funding that was obtained by a few solar energy pioneers there is now relatively substantial federal money earmarked for solar energy research development and demonstration projects Fundamentals of Solar Heating Sheet Metal and Air Conditioning Contractors' National Association (U.S.), 1978 **Fundamentals of solar heating** Sheet Metal and Air Conditioning Contractors' National Association, 1978 *Fundamentals of Solar Heating* U.S. Dept. of Energy. to various functional solar thermal systems It not only provides the logic and methods for transferring the physical fundamentals into an operative technical system but also includes aspects of concept development selection economic evaluation and performance Additionally measurement and control technology are presented underpinned by real projects that have already been successfully implemented
