**POLICING CHILDHOOD CHALLENGING VIOLENT OR AGGRESSIVE**

**BEHAVIOUR:** Dr Wendy Thorley, 2020-06-01 How Childhood Challenging Violent or Aggressive Behaviour CCVAB is discussed both historically and more recently in 2017 Thorley and Coates felt they were Grappling with an Enigma when trying to explain Child to Parent Violence and Abuse CPVA due to the various limitations of definitions created For example was there a difference in behaviour displayed between CPV Child to Parent Violence compared to CPVA Child to Parent Violence and Abuse or VCB Violent Challenging Behaviour or VCB Violent Childhood Behaviour or APVA Adolescence to Parent Violence and Abuse Alternatively were definitions developed by professionals depending on which lens they saw the behaviour through Or were terms used to reflect what families described the behaviour to be Or perhaps terms varied depending on the age of the child For this reason they introduced Childhood Challenging Violent or Aggressive Behaviour

CCVAB as an umbrella term for all of the previously used acronyms Adopting CCVAB as a single definition allowed for all children to be included up to the age of 18 years old as per legal definitions and onto 25 years old for those with SEND This definition recognised that many of the behaviours displayed were not towards parents directly and could involve property damage be directed at siblings or be displayed indirectly towards others including peers at school or school staff The aim of this project set out to critically analyse Policing Childhood Challenging Violent or Aggressive Behaviour responding to vulnerable families by reflecting on more than 9 months of reported incident data There is an accepted barrier in developing analysis of Childhood Challenging Violent or Aggressive Behaviour CCVAB due to the nature of the beast Generally speaking families do not or will not discuss violence in the home in most situations be this adult to adult child to adult adult to child It is acknowledged the data is an insight only rather than a whole view of CCVAB This insight is a necessary step for developing a more informed approach to Policing Childhood Challenging Violent or Aggressive Behaviour At times the officers attending are unable to offer any real intervention due to the age of the child involved something that is beyond their control For this reason the thoughts of Schon come to mind where In the varied topography of professional practice there is a high hard ground overlooking a swamp or the outsider professional lens that CCVAB is seen The professional lens such as that of a responding officer can allow for application of theory where On the high ground manageable problems lend themselves to solution through application of research based theory and technique This oversight means there is no mechanism for the police to detail the incident other than refer the family to relevant Child Service agencies Current and previous evidence from research and working with families experiencing CCVAB details how CCVAB can commence from age 2 3 years and more frequently commences between the ages of 6 9 years than at any other age This means that at the time of police involvement the escalation of CCVAB behaviours may have been ongoing for more than 6 years without any intervention support or professional awareness of the situation This unreported and unsupported position can leave families In the swampy lowland where messy confusing problems defy technical solution

**Reformatted** Andrew Leyshon, 2014-06-26 The impact of digital technology on the musical economy has been profound From its production reproduction distribution and consumption the advent of MP3 and the use of the Internet as a medium of distribution has brought about a significant transformation in the way that music is made how it is purchased and listened to and significantly how the musical economy itself is able to reproduce itself In the late 1990s the obscure practice of ripping tracks from CDs through the use of compression programmes was transformed from the illegal hobby of a few thousand computer specialists to a practice available to millions of people worldwide through the development of peer to peer computer networks This continues to have important implications for the viability of the musical economy At the same time the production of music has become more accessible and the role of key gatekeepers in the industry such as record companies and recording studios has been undermined whilst the increased accessibility of music at reduced cost via the Internet has revalorised live performance and

now generates revenues higher than recorded music The early 21st century has provided an extraordinary case study of an industry in flux and one that throws light on the relationship between culture and economy between passion and calculation This book provides a theoretically grounded account of the implications of digital technology on the musical economy and develops the concept of the musical network to understand the transformation of this economy over space and through time
