Future Active Media Activism And The Internet:

Future Active Graham Meikle, 2002 First Published in 2003 Routledge is an imprint of Taylor Francis an informa company

Cyberactivism on the Participatory Web Martha McCaughey, 2014-04-16 Cyberactivism already has a rich history but over the past decade the participatory web with its de centralized information media sharing portability storage capacity and user generated content has reshaped political and social change Cyberactivism on the Participatory Web examines the impact of these new technologies on political organizing and protest across the political spectrum from the Arab Spring to artists to far right groups Linking new information and communication technologies to possibilities for solidarity and action as well as surveillance and control in a context of global capital flow war and environmental crisis the contributors to this volume provide nuanced analyses of the dramatic transformations in media citizenship and social movements taking place today

The Internet in China Zixue Tai, 2007-05-07 The Internet in China examines the cultural and political ramifications of the Internet for Chinese society The rapid growth of the Internet has been enthusiastically embraced by the Chinese government but the government has also rushed to seize control of the virtual environment Individuals have responded with impassioned campaigns against official control of information The emergence of a civil society via cyberspace has had profound effects upon China for example in 2003 based on an Internet campaign the Chinese Supreme People's Court overturned the ruling of a local court for the first time since the Communist Party came to power in 1949 The important question this book asks is not whether the Internet will democratize China but rather in what ways the Internet is democratizing communication in China How is the Internet empowering individuals by fostering new types of social spaces and redefining existing social relations

Information Technology and Evidence-Based Social Work Practice Judith Dunlop, Michael J. Holosko, 2013-05-13 Learn to use the latest technological advances in evidence based social work Social work practice can be positively or negatively impacted by the advance of technology Advances and applications must be up to date as possible yet they may be ineffective if not simple enough to easily learn and use Information Technology and Evidence Based Social Work presents leading social work experts exploring the latest technological advances and the innovative practical applications which can be used effectively in evidence based social work Students and practitioners get creative practical advice on how best understand technology and apply it to their work Information Technology and Evidence Based Social Work is divided into four sections The first section provides the context for understanding the technological link between social work and evidence based practice The second section presents examples of how information technology can be used to effectively teach students and practitioners in the field Section three explores ways to implement technology for use by clients The fourth section summarizes and then takes a look at the future of technology in evidence based social work Chapters include questions for practitioners and for clients to illuminate the current and future issues surrounding technology and evidence based practice The text also includes extensive references and useful tables and figures Topics in

Information Technology and Evidence Based Social Work include the impact of technology on social work computer assisted evidence based practice customized web based technology and its use in clinical supervision enhanced technology based evidence based practice model and its applicability to large human service organizations using information technology to provide evidence for planning and evaluating programs using technology in advocacy the geographic information system GIS as a useful tool in all aspects of programs and policies evaluating practice through information technology the development and evaluation of an online social work service psychotherapeutic group intervention for family caregivers over the Internet support group online chat a case study of how Internet chat group technology can be implemented with cancer survivors technology as a service learning mechanism for promoting positive youth development in a community based setting a model which can be used to collect information and by using best evidence available arrive at a confident decision and more Information Technology and Evidence Based Social Work is timely stimulating reading for educators undergraduate students graduate students and practitioners in the fields of social work psychology and public administration

Communication Yearbook 33 Christina S. Beck, 2009-05-07 The Communication Yearbook annuals publish diverse state of the discipline literature reviews across the field of communication Sponsored by the International Communication Association volumes offer insightful descriptions of research as well as reflections on the implications of those findings for other areas of the discipline Editor Christina S Beck presents a diverse international selection of articles that highlight empirical and theoretical intersections in the communication discipline

Oxford Handbook of Internet Psychology Adam Joinson, Katelyn McKenna, Tom Postmes, Ulf-Dietrich Reips, 2009-02-12 Over one billion people use the Internet globally Psychologists are beginning to understand what people do online and the impact being online has on behaviour It's making us re think many of our existing assumptions about what it means to be a social being For instance if we can talk flirt meet people and fall in love online this challenges many of psychology's theories that intimacy or understanding requires physical co presence The Oxford Handbook of Internet Psychology brings together many of the leading researchers in what can be termed Internet Psychology Though a very new area of research it is growing at a phenomenal pace In addition to well studied areas of investigation such as social identity theory computer mediated communication and virtual communities the volume also includes chapters on topics as diverse as deception and misrepresentation attitude change and persuasion online Internet addiction online relationships privacy and trust health and leisure use of the Internet and the nature of interactivity With over 30 chapters written by experts in the field the range and depth of coverage is unequalled and serves to define this emerging area of research Uniquely this content is supported by an entire section covering the use of the Internet as a research tool including qualitative and quantitative methods online survey design personality testing ethics and technological and design issues While it is likely to be a popular research resource to be dipped into as a whole volume it is coherent and compelling enough to act as a single text book The Oxford Handbook of Internet Psychology is the definitive text on this

burgeoning field It will be an essential resource for anyone interested in the psychological aspects of Internet use or planning to conduct research using the net

Law and Internet Cultures Kathy Bowrey, 2005-05-30 This book raises the profile of socio political questions about the global technology and information market It is a close study of communication flows networks nodes biopolitics and the fragmentations of power It brings to life the role played by personalities corporate interactions industry compromises and the regulatory incompetencies affecting the technological world we all live in US technology powers the internet and disseminates American culture on an unprecedented scale Assessing this power requires an analysis of the diffuse ways that US practice policy and law dominates and a consideration of how influence is negotiated and resisted locally This involves a discussion about how ideas about trade and innovation circulate of the social power of engineers that establish conventions and protocols of the reach of Leviathan corporations and questions about global marketing and consumer tastes For readers interested in intellectual property law information technology cultural studies globalisation and mass communications

Social Movements and Their Technologies Stefania Milan, 2013-11-06 Now in paperback for the first time Social Movements and their Technologies explores the interplay between social movements and their liberated technologies It analyzes the rise of low power radio stations and radical internet projects emancipatory communication practices as a political subject focusing on the sociological and cultural processes at play It provides an overview of the relationship between social movements and technology and investigates what is behind the communication infrastructure that made possible the main protest events of the past fifteen years In doing so Stefania Milan illustrates how contemporary social movements organize in order to create autonomous alternatives to communication systems and networks and how they contribute to change the way people communicate in daily life as well as try to change communication policy from the grassroots She situates these efforts in a historical context in order to show the origins of contemporary communication activism and its linkages to media reform campaigns and policy advocacy

The Internet and Democratic Citizenship Stephen Coleman, Jay G. Blumler, 2009-04-06 This book examines how the Internet can improve public communications and enrich democracy

The Social Media Handbook Jeremy Hunsinger, Theresa Senft, 2013-10-30 The Social Media Handbook explores how social media are changing disciplinary understandings of the internet and our everyday lives In addition to person to person social networking services like Facebook and Twitter this volume considers a broad range of networked information services that support in depth social interaction community formation and collaboration in the Web 2 0 era Rather than considering social media in terms of specific technologies the chapters in this book engage topics across a range of research techniques practices culture and society and theories These broader topics including community gender fandom disability and journalism are entryways through which students and faculty can explore ways of thinking about social media and find new paradigms for analysis Contributors Axel Bruns Francesca Coppa Katie Ellis Gerard Goggin Alexander Halavais Andrew Herman Jeremy Hunsinger Angus Johnston Alice Marwick Safiya Umoja Noble Zizi

Papacharissi Toni Sant Theresa Senft Virtual Nation Gerard Goggin,2004 The first comprehensive book on the Australian Internet Virtual Nation offers a surprising thought provoking and rigorous introduction to a technology that we now can't do without **The Internet and Politics** Sarah Oates,Diana Owen,Rachel K. Gibson,2006-03-22 This volume explores the nature of the Internet's impact on civil society addressing the following central questions is the Internet qualitatively different from the more traditional forms of the media has the Internet demonstrated real potential to improve civil society through a wider provision of information an enhancement of communication between government and citizen or via better state transparency does the Internet pose a threat to the coherence of civil society as people are encouraged to abandon shared media experiences and pursue narrow interests in authoritarian states does the Internet function as a beacon for free speech or as another tool for propaganda *Engaging Consumers through Branded Entertainment and Convergent Media* Parreno, Jose Marti,2015-04-30 Branded entertainment is gaining popularity within marketing communications strategies Blurring the lines between advertisements and editorial content branded marketing provides advertisers and consumers with highly engaging media content that benefits them both Engaging Consumers through Branded Entertainment and Convergent Media provides an interdisciplinary approach to connecting with the consumer through branding strategies in the entertainment and media fields Featuring information regarding emergent research and techniques this publication is a critical reference source for academics university teachers researchers and post graduate students as well as universities advertising agencies marketing directors brand managers and professionals interested in the usage and benefits of branded entertainment Electronic Participation Ann Macintosh,Efthimios Tambouris,2009-08-17 This book constitutes the refereed proceedings of the First International Conference on eParticipation ePart 2009 held in Linz Austria in August September 2009 The 16 revised full papers were carefully reviewed and selected from numerous submissions The papers consider future multi disciplinary research direction examine the potential contribution of social networking sites to political engagement provide evaluation frameworks for both eParticipation policy and specific projects and those that describe emerging tools and techniques with which to conduct and analyse eParticipation *Gatewatching* Axel Bruns,2005 Gatewatching Collaborative Online News Production is the first comprehensive study of the latest wave of online news publications The book investigates the collaborative publishing models of key news Websites ranging from the worldwide Indymedia network to the massively successful technology news site Slashdot and further to the multitude of Weblogs that have emerged in recent years Building on collaborative approaches borrowed from the open source software development community this book illustrates how gatewatching provides an alternative to gatekeeping and other traditional journalistic models of reporting and has enabled millions of users around the world to participate in the online news publishing process *Democratic Communications* James F. Hamilton,2009-08-01 This is the first book to take issue with the long standing assumptions about alternative media and democratic communications and place them in a detailed cultural and historical

context Ranging from prophecy in sixteenth century England to the self managed projects of critical literacy and social change of today it assesses the historical heritage present conditions and future possibilities of today s remade media landscape for democratic communications

The Oxford Handbook of Information and Communication

Technologies Robin Mansell, 2007 The production and consumption of information and communication technologies or ICTs are becoming deeply embedded within our societies The influence and implications of this have an impact at a macro level in the way our governments economies and businesses operate and at a micro level in our everyday lives This handbook is about the many challenges presented by ICTs It sets out an intellectual agenda that examines the implications of ICTs for individuals organizations democracy and the economy Explicitly interdisciplinary and combining empirical research with theoretical work it is organised around four themes covering the knowledge economy organizational dynamics strategy and design governance and democracy and culture community and new media literacies It provides a comprehensive resource for those working in the social sciences and in the physical sciences and engineering fields with leading contemporary research informed principally by the disciplines of anthropology economics philosophy politics and sociology
