Liu,2025-04-29 Environments have no boundaries and no borders Managing oceanic environments particularly the threats

and risks of pollution should also consider the shared responsibility of all coastal states Emerging issues for oceanic pollution

governance include global changes like rising temperature ocean acidification but also disturbances of ecosystem functioning

by plastic and pollution by other emerging contaminants for example noise pollution and deep sea mining These call for

efficient and sustainable prevention and restoration strategies such as such as efficient urban and industrial sewage

treatment plants efficiently administered transnational marine protected areas and among others sustainable aquaculture

extensive small scale fisheries Environmental protection warrants the development of interrelationships between marine

sciences relevant industries and ocean governance developing internationally accepted rules and regulations for sustainable

ocean management This Research Topic will explore possible new domains of ocean governance and the marine environment

from the interdisciplinary perspectives of the rule of law including the international agreement on equal conventions the
