Ideas about the Future Burnham Putnam Beckwith,1984 This book is the first history of scientific thought about future social events and trends covering the years 1794 to 1982 One of the best ways to prepare to make scientific predictions about the future is to review the predictions made by the most able and or stimulating earlier futurists and their reasons for making them Unfortunately these predictions are scattered among hundreds of different books and articles and no history of them has been available As a result most futurists have paid little attention to the brilliant contributions of their predecessors They rarely explain whether their own ideas are original in part or whole This book presents a pr cis of the thought of past futurists so that future futurists can understand and acknowledge the contributions of their intellectual ancestors "The Future as History:" James B. M. Schick,1974 *The History of the Future* Max Singer,2011-07-16 The History of the Future presents a set of ideas about where we are in history It focuses on the great majority of people in each society and shows that life in the modern world will be almost completely different from all previous human experience The present time is best understood as a period of transition during which one country after another is following along parallel paths from traditional to modern The process of becoming modern is so powerful that it will have similar effects on all countries Therefore one can predict the future of countries still undergoing this change by looking at the history of countries which have already completed their transition Singer asserts that a war system has long existed in which the central concern of nations has been to protect their security by military forces and alliances He makes the dramatic claim that because of the inherent nature of modern countries there will be no war system in any region populated solely by modern countries as illustrated by the current situation in Western Europe even though human character will not have improved However despite the fact that poverty tyranny and war will be largely eliminated the modern world may be worse for people than the traditional worldbecause most of the things that shaped human character will be obsolete **A History of the Future** Christopher C.
