Future Of The Electronic Marketplace:

The Future of the Electronic Marketplace Derek Leebaert, 1999-08-18 The electronic marketplace is a global one and it is changing every aspect of the consumer vendor relationship The marketplace is the place of exchange between buyer and seller Once one rode a mule to get there now one rides the Internet An electronic marketplace can span two rooms in the same building or two continents How individuals firms and organizations approach and define the electronic marketplace of the future depends on people's ability to ask the right questions now and to take advantage of the opportunities that will arise over the next few years The contributors to this volume are prime movers in major industries that are remaking themselves in order to shape the global marketplace They examine the consumer's new powers to assess and exchange goods and services over unparalleled distances They discuss the opportunities and risks posed by the new integration between manufacturer and consumer by the erosion of centralized authority by real time choice in every financial contingency and by the fact that travel and transportation have been delegated to the machine processes that can best handle them They also reflect on how to set an intelligent value on the coming changes on the tools and procedures required to create this new marketplace of marketplaces Contributors Les Alberthal William D Bandt Robert J Bonometti David Braunschvig Stephen D Crocker Walter Forbes Denos Gazis Daniel E Geer Jr Irving Goldstein Edward D Horowitz Daniel P Keegan Raymond W Smith Russel B Stevenson Jr Patrick E White

Current Adoption and Future Prospects of Electronic Reverse Auctions in the Austrian Automotive Industry Nora Rienhuber, 2011 Master's Thesis from the year 2010 in the subject Business economics Business Management Corporate Governance grade 1 University of Plymouth language English abstract

Especially after the recession it is of interest whether electronic reverse auctions eRAs as e procurement tool with a high cost saving potential are attractive for companies Therefore the purpose of this study is the investigation of the current eRA adoption and future eRA prospects in terms of extent and way of usage in the Austrian automotive industry Data were collected from purchasing managers and purchasing agents of 20 companies which belong to the 24 top selling Austrian automotive companies Quantitative data was collected from 20 companies regarding the extent of eRA usage Furthermore 18 of these participated in semi structured interviews for qualitative data collection regarding reasons for not using eRAs and the way of eRA usage Results of the data analysis show that the extent of eRA usage is and will remain quite low in the Austrian automotive industry and even adopters eRA spending is fairly low In conclusion eRAs do not seem to contribute a lot to achieve cost savings in the Austrian automotive industry and are considered to be rather disliked by Austrian automotive buyers Although findings cannot be generalised to the whole Austrian automotive industry they still might have the implication that buyer supplier cooperation will prevail in the Austrian automotive industry in the future as it obviously contributes more to gain a sustainable competitive supply chain advantage than eRAs Moreover if other industries and countries have similar attitudes towards eRAs as Austrian automotive buyers it might have negative implications on eRA tool providers though this needs to be investigated in further research
