Fundamentals of Comparative Cognition Sara J. Shettleworth, 2013 With the growing accessibility of original journal articles and papers a staggering number of professors teaching junior senior level courses are turning away from the use of textbooks in favor of primary research papers The *Fundamentals of Cognition* series covers the main topics in the field of Cognitive Psychology and will address the need professors have for a brief yet detailed overview of specific topics in cognitive psychology The books in this series will serve as a unifying discussion of the topic and provide continuity and cohesion to the discussion of primary research papers These primers will be written by prominent cognitive scientists with the ability to write accessibly about complex subjects They will capture the current state of this fast moving field and reflect the authors views Comparative Cognition has countless connections to the rest of psychology and encompasses the comparative and evolutionary basis of development and social psychological processes as well as every aspect of cognition Comparative research also provides the basis for the animal models used in behavioral neuroscience and genetics This text on the *Fundamentals of Comparative Cognition* will convey the richness and excitement of this diverse field while addressing the fundamental questions of what makes us uniquely human and what we share with other creatures Professors experience with Shettleworth's graduate text and her clear direct and interesting writing style makes them very excited about the possibility of Shettleworth writing an undergraduate text in this field **Emergent Information: A Unified Theory Of**

Information Framework Wolfgang Hofkirchner, 2012-12-19 At the dawn of the information age a proper understanding of information and how it relates to matter and energy is of utmost importance for the survival of civilisation Yet attempts to reconcile information concepts underlying science and technology with those en vogue in social science humanities and arts are rather rare This book offers a new approach departing from fragmented information concepts Many academics refrain from undergoing unifications as most undertakings are reductionistic This book contends that it is the noble task of an as yet to be developed science of information to go one step in the direction of a unified theory of information without falling back into neither reduction nor anthropomorphisation To be able to succeed in an ambitious task like this the book advocates the

application of complex systems theory and its philosophical underpinnings Information needs to be interpreted in terms of self organisation to do justice to the richness of its manifestations The way the book does so will provide the reader with a deep insight into a basic feature of our world The following are discussed in the volume A Science of Information A New Way of Thinking Praxio Onto Epistemology Evolutionary Systems Design Evolutionary Systems Ontology Evolutionary Systems Methodology Capurro s Information Concept Trilemma A Multi Stage Model of Evolutionary Types of Information Pattern Formation Code Making and Constituting Sense A Triple C Model of Systemic Functions of Information Cognising Communicating and Co Operating Nine Categories of Information Capabilities Reflectivity physical Psyche biotic Consciousness human Connectivity physical Signalability biotic Languageability human Cohesiveness physical Coherency biotic Communitarity human Nine Categories of Information Response physical Flexible Response biotic Reflexion human Correspondences physical Signals biotic Symbolic Acts human Assemblage physical Assignment biotic Association human A Unified Theory of Information for about and by means of the Information Society Homo Dominus Stephen G.
