Hot Rod Garages ,2013-08-12
 DIVIn Hot Rod Garages acclaimed hot rod photographer and author Peter Vincent gives readers an intimate look inside the shops and garages of more than two dozen rod and custom builders Unlike most hot rod books Vincent s takes a strictly California centric approach in examining shops across the United States From individuals crafting cars for their own reward to more prominent builders turning out cool rides for paying customers Vincent and his cameras show the builders in the context of their spaces in the process exploring how their work environments inform their creations and vice versa Included are individuals like Pete Eastwood who have garnered attention in the hot rod press while building mostly for themselves builders like Vern and Keith Tardel the Kennedy Brothers and Cole Foster with his crew at Salinas Boyz all currently being celebrated for the traditionally styled rides they build for consumers and high end shops widely considered to be the cream of the industry like Roy Brizio s and Steve Moal s in the Bay Area as well as SO CAL Speed Shop heir to legend Alex Xydias The result is the next best thing to being there an exquisitely presented book that eloquently distills the varying nature of these spaces and the cars created within revealing the countless hours spent machining wrenching welding and shaping these beautiful visions to fruition div

Integrated Computer-Aided Design in Automotive Development Hirz Mario,Wilhelm Dietrich,Anton Gfrerrer,Johann Lang,2013-06-22 The automotive industry faces constant pressure to reduce development costs and time while still increasing vehicle quality To meet this challenge engineers and researchers in both science and industry are developing effective strategies and flexible tools by enhancing and further integrating powerful computer aided design technology This book provides a valuable overview of the development tools and methods of today and tomorrow It is targeted not only towards professional project and design engineers but also to students and to anyone who is interested in state of the art computer aided development The book begins with an overview of automotive development processes and the principles of virtual product development Focusing on computer aided design a comprehensive outline of the fundamentals of geometry representation provides a deeper insight into the mathematical techniques used to describe and model geometrical elements The book then explores the link between the demands of integrated design processes and efficient data management Within automotive development the management of knowledge and engineering data plays a crucial role Some selected representative applications provide insight into the complex interactions between computer aided design knowledge based engineering and data management and highlight some of the important methods currently emerging in the field
