

WHAT IS ACTION RESEARCH?

Action Research is a process in which participants examine their own educational practice systematically and carefully, using the techniques of research.

Action research is a philosophy and methodology of research generally applied in the social sciences.

It seeks transformative change through the simultaneous process of taking action and doing research, which are linked together by critical reflection.

Fundamentals Of Action Research

Townsend, Andrew

Fundamentals Of Action Research:

Action Research Essentials Dorothy Valcarcel Craig, 2009-03-03 Action Research Essentials is a practical guide born of the author's own experience working with students in the social sciences and education providing a step by step outline of how to do action research backed by the most extensive theory and research coverage on the market today The author guides future researcher practitioners through the action research process via numerous concrete illustrations and a wealth of on line resources positioning it as a fundamental component of practice A key and unique strength of the book is its outreach to a much larger breadth of students than usually found in action research books This book will illustrate all the steps in action research using examples from education social work psychology sociology nursing medicine and counseling The structure of the book is intended as the sole textbook for a course devoted to naturalistic inquiry practitioner research or beginning qualitative methods or can complement a general research course

Fundamentals of Action Research Bill Cooke, Julie Wolfram Cox, 2005 *Action Research* Jean McNiff, 2002-01-22 Since the first edition of this established text was published in 1988 action research has gained ground as a popular method amongst educational researchers and in particular for practising teachers doing higher level courses In this new edition Jean McNiff provides updates on methodological discussions and includes new sections of case study material and information on supporting action research The book raises issues about how action research is theorised whether it is seen as a spectator discipline or as a real life practice and how practitioners position themselves within the debate It discusses the importance for educators of understanding their own work and showing how their educative influence can lead to the development of good orders in formal and informal learning settings and in the wider community This second edition comes at a time when

after years of debate over what counts as action research it is now considered an acceptable and useful part of mainstream research practice
