Further Inventions Of Daedalus A Compendium Of Plausible Schemes:

The Inventions of Daedalus David E. H. Jones, 1982 Describes facetious inventions tongue in cheek observations on natural phenomenon and thought provoking technological developments

The Further Inventions of Daedalus David E. H. Jones, 1999 One of the longest running jokes on the scientific scene the Daedalus column began in New Scientist in the mid 1960s and transferred to Nature in the 1980s Each week it offers a new scheme to challenge accepted notions of scientific principles schemes that are neither feasible nor completely absurd Always entertaining the Daedalus schemes often have a serious purpose and raise crucial questions about science sample title A Womb with a View or At Least a Phone This delightful book compiles roughly one hundred of David Jones s popular columns each of which exhibits a keen and approachable mixture of entertaining and thought provoking material Like the collection of articles that came before it this work will appeal to a broad audience of the scientifically curious

The Aha! Moment David Jones, 2012-01-24 This book is about having ideas and a much longer haul making them work David Jones best known for his Daedalus column tells a multitude of stories about creators and their creations including his own fantastical seeming contributions to mainstream science such as the unrideable bicycle and chemical gardens in space His theory of creativity endows each of us with a Random Ideas Generator a Censor and an Observer Reasoner Jones applies his theory to a wide range of weird scientific experiments that he has conducted for serious scientific papers for challenging printed expositions and for presentations to a TV audience He even suggests new ones not yet tried Creativity is as essential to science as curiosity physical intuition and shrewd deduction from well planned experiments But says Jones ingenuity is very uncertain Even for the greatest inventors about 80 percent of ideas fail Jokiness can help and so can lots of random data Jones has plenty of clever advice that will help spark that madly brilliant private thought in the first place and will encourage you to take it further Neither dense nor demanding *The Aha Moment* is engrossing edifying and scientifically serious yet it is lightly written and asks lots of silly questions As Jones shows it can often pay to take an absurd idea seriously

High Static, Dead Lines Kristen Gallerneaux, 2021-02-24 A literary mix tape that explores the entwined boundaries between sound material culture landscape and esoteric belief Trees rigged up to the wireless radio heavens A fax machine used to decode the language of hurricanes A broadcast ghost that hijacked a television station to terrorize a city A failed computer factory in the desert with a slap back echo resounding into ruin In *High Static Dead Lines* media historian and artist Kristen Gallerneaux weaves a literary mix tape that explores the entwined boundaries between sound material culture landscape and esoteric belief Essays and fictocritical interludes are arranged to evoke a network of ley lines for the sonic spectre to travel through a hypothetical presence that manifests itself as an invisible layer of noise alongside the conventional histories of technological artifacts The objects and stories within span from the mid nineteenth century to the present day touching upon military communications and cultural history A connective thread is the recurring presence of sound audible self generative and remembered charting

the contentious sonic histories of paranormal culture Raman Spectroscopy, Fullerenes and Nanotechnology Maher S. Amer, 2010 This unique book is the first treatment of nanotechnology as the science controlled by the behaviour of thermodynamic small systems It provides comprehensive discussions on fullerenes as building blocks Raman spectroscopy as a powerful diagnostic tool and nanotechnology as the technology bridging the gap between human made and biological materials systems Aimed at graduate students scientists researchers and educators interested in academia government and industry the text is divided into four chapters The first covers the potential of nanotechnology to develop a better deeper understanding of the physical and chemical phenomena observed in natural systems It also contains a section introducing nanotechnology to the public in simple non scientific terms The second chapter is devoted to Raman spectroscopy and could in itself serve as a basis for a short course on its applications in materials science The third section covers fullerenes and presents their history and development as well as discussing the structure and production of zero dimensional one dimensional and two dimensional fullerenes The fourth and final chapter serves as a correlation discussion and over view It emphasizes the unique nano phenomena exhibited by the fullerene systems as carbon based nanostructured systems This chapter and therefore the book concludes with a discussion on the potential of nano science and technology to shape the future of human society Dr. CHEMFET Jiří Janata, 2010 *The Futurist*, 1984 **Ink Sandwiches, Electric Worms, and 37 Other Experiments for Saturday Science** Neil A.
