**The Resurrection of Jesus** Dale C. Allison, Jr., 2021-03-11 The earliest traditions around the narrative of Jesus resurrection are considered in this landmark work by Dale C Allison Jr drawing together the fruits of his decades of research into this issue at the very core of Christian identity Allison returns to the ancient sources and earliest traditions charting them alongside the development of faith in the resurrection in the early church and throughout Christian history Beginning with historical critical methodology that examines the empty tomb narratives and early confessions Allison moves on to consider the resurrection in parallel with other traditions and stories including Tibetan accounts of saintly figures being assumed into the light in the chapter Rainbow Body Finally Allison considers what might be said by way of results or conclusions on the topic of resurrection offering perspectives from both apologetic and sceptical viewpoints In his final section of modest results he considers scholarly approaches to the resurrection in light of human experience adding fresh nuance to a debate that has often been characterised in overly simplistic terms of it happened or it didn't [Calm Healing](#)

**Extracting The Future from The Present** Ion Storland, 2020-11-26 Mapping accurately the future is no longer a storytelling fantasy rather a workplace of data scientists programmers or analysts With a background in engineering and as an estimator Ion Storland presents a book that explores in the present a future scenario of human civilization on Earth and beyond based on information and observations from the past The interdisciplinary content gathered and described in the book seeks to build a panoramic view of how the various domains and sectors of economy technology and society are interrelated and interact with peoples day to day lives and also to picture the consequences of actions that frame the events of the future An inevitable future of interlinked brains will form a mindociety a society of people whose minds are connected

through brain implants What can we expect from such an outcome How should we prepare From describing confined norms and mindset from Storland's point of view on planet Earth to the astonishing universal philosophical burden of existence Sorland raises the hypothesis of Existential Infinitylock which makes it impossible for anyone or anything to be able to define the origin of existence not today not in million or billions years The argument is based on and takes into account the properties of infinite order
