**Post-Christendom Studies: Volume 8** Lee Beach, Gordon L. Heath, Steven M. Studebaker, 2024-07-16 Post Christendom Studies publishes research on the nature of Christian identity and mission in the contexts of post Christendom Post Christendom refers to places both now and in the past where Christianity was once a significant cultural presence though not necessarily the dominant religion Sometimes Christendom refers to the official link between church and state The term post Christendom is often associated with the rise of secularization religious pluralism and multiculturalism in western countries over the past sixty years Our use of the term is broader than that however Egypt for example can be considered a post Christendom context It was once a leading center of Christianity Christendom moreover does not necessarily mean official public and dominant religion For example under Saddam Hussein Christianity was probably a minority religion but for the most part Christians were left alone After America deposed Saddam Christians began to flee because they became a persecuted minority In that sense post Saddam Iraq is an experience of post Christendom it is a shift from a cultural context in which Christians have more or less freedom to exercise their faith to one where they are persecuted and or marginalized for doing so
