Future Of Immortality Robert J. Lifton, 1987-03-17 *Future Survey Annual 1987* Michael Marien, 1988-01-01

Film and the Nuclear Age Toni A. Perrine, 1998 First Published in 1998 Routledge is an imprint of Taylor Francis an informa company **Trauma and Human Rights** Lisa D. Butler, Filomena M. Critelli, Janice Carello, 2019-07-17 Human rights violations and traumatic events often come together in victims' experiences; however, the human rights framework and trauma theory are rarely deployed together to illuminate such experiences. This edited volume explores the intersection of trauma and human rights by presenting the development and current status of each of these frameworks, examining traumatic experiences and human rights violations across a range of populations and describing efforts to remediate them. Individual chapters address these topics among Native Americans, African Americans, children, women, lesbian, gay, bisexual, transgender individuals, those with mental disabilities, refugees and asylees, and older adults, and also in the context of social policy and truth and reconciliation commissions. The authors demonstrate that the trauma and human rights frameworks each contribute invaluable and complementary insights and that their integration can help us fully appreciate and address human suffering at both individual and collective levels.

The Meaning of Growth Richard McNeill Douglas, 2025-09-30 Since the Limits to Growth report was published in 1972, it has been widely known that a commitment to endless growth was putting us on course for environmental disaster, so why have we failed to take decisive political action in the half century since then? In *The Meaning of Growth*, Richard McNeill Douglas uses interpretive social science to uncover the cultural roots of political resistance to environmental science and policy. Through a close reading of anti-environmentalist rhetoric, the book identifies its idolisation of growth as a defence of a modern Western European world view focusing on values of freedom, power, and immortality. The significance of these findings is drawn out by applying the secularisation thesis, a theoretical account of the development of a modern understanding of reality from a theological world view to which it is ostensibly opposed. This framework is used to offer a deep interpretation of what is at stake in environmental debate: that to accept there are limits to growth means abandoning crucial elements of a faith in a theodicy of progress that makes life meaningful in a secular age. Douglas concludes by suggesting that the precondition for political action on the environment is a change of philosophical perspective that provides for a sense of meaning in a world of limits. This book should be of interest to academics in the fields of environmental sociology and communications studies, as well as activists interested in understanding the motivations of anti-environmentalist campaigners and how to counter their influence.

The Homeless of Ironweed Benedict Giampo, 1996 *The Homeless of Ironweed* is both a meditation on Kennedy's remarkable novel and a literary and cultural analysis. Benedict Giampo's explorations of the social conditions, cultural meanings, and literary representations of classic and contemporary homelessness in America and abroad inform his understanding of the literary merit and social resonance of *Ironweed*. Throughout, Giampo remains grounded in a close reading of the novel. He moves with great relevance

from Dante to Kenneth Burke from Sartre to Robert Jay Lifton to locate meaning and value in the lives of Kennedy's characters by extension with intelligence and compassion he regards the lives of the homeless who wander through our streets and shelters today

Bounded Choice Janja A. Lalich, 2020-11-30 Heaven's Gate a secretive group of celibate monks awaiting pickup by a UFO captured intense public attention in 1997 when its members committed collective suicide As a way of understanding such perplexing events many have seen those who join cults as needy lost souls unable to think for themselves This book a compelling look at the cult phenomenon written for a wide audience dispels such simple formulations by explaining how normal intelligent people can give up years of their lives and sometimes their very lives to groups and beliefs that appear bizarre and irrational Looking closely at Heaven's Gate and at the Democratic Workers Party a radical political group of the 1970s and 1980s Janja Lalich gives us a rare insider's look at these two cults and advances a new theoretical framework that will reshape our understanding of those who join such groups Lalich's fascinating discussion includes her in depth interviews with cult devotees as well as reflections gained from her own experience as a high ranking member of the Democratic Workers Party Incorporating classical sociological concepts such as charisma and commitment with more recent work on the social psychology of influence and control she develops a new approach for understanding how charismatic cult leaders are able to dominate their devotees She shows how members are led into a state of bounded choice in which they make seemingly irrational decisions within a context that makes perfect sense to them and is in fact consistent with their highest aspirations In addition to illuminating the cult phenomenon in the United States and around the world this important book also addresses our pressing need to know more about the mentality of those true believers who take extreme or violent measures in the name of a cause

Religion and Psychoanalysis in India Sabah Siddiqui, 2016-04-14 Religion and Psychoanalysis in India questions the assumptions of an established scientific evidence based global mental health paradigm by examining the practices of faith based healing It proposes that human beings demonstrate a dual loyalty to science as faith and faith as science both of which get reconfigured in the process In this particular context science and faith are deployed in ways that

are not only different but at times contrary to mainstream discourses of science and religion and faith healing becomes a point where these two discourses collide head on in negotiating cultural values and practices The book addresses key questions such as What is the value of faith healing in understanding distress and treatment in different cultural contexts What is a critical psychological perspective on faith and religious systems What challenges do alternative religious practices pose to critical psychology How should we re imagine clinical work in a context marked by science and religion Situated between West and East between the global mental health movement and local faith based practices in India the book addresses a wide audience that includes students and researchers in psychology cultural and medical anthropology the sociology of religion cultural theory postcolonial theory and the sociology of science It will also appeal to policy makers and practitioners interested in the work of NGOs and the legal frameworks driving mental health movements in India
