

FUTURE SOUTHEAST ASIA

CURRENT AND PROPOSED RAILWAYS IN SOUTHEAST ASIA

FUTURE SOUTHEAST ASIA MAP

This map is a combination of current and proposed railways across mainland and maritime Southeast Asia. The proposed lines consist of railways under construction, lines announced as election promises, undergoing a feasibility study, or approved lines waiting for funding. Details of the proposed railways can be found at:

www.nomadicnotes.com/future-log/south-east-asia-rail-map/

ABOUT THE MAP

This is a subway-style map that represents how to travel between destinations rather than portraying geographical accuracy. Train routes and borders have been straightened, and stations have been redesigned to fit the style of the map. Most of the lines are current or have been proposed at some point. Some "Nomadic Notes Recommendations" have been added to fill in missing gaps.

This is not an actual map of Southeast Asia railways, so no responsibility will be held if you turn up to Hanoi Railheads waiting to catch the Angkor to Sam Rong, because there is no such train, and Sam Rong doesn't have a railway (yet).

Managing the Future of Southeast Asia's Valuable Tropical Rainforests Ratnam Wickneswari, Chuck Cannon, 2011-09-15 This book provides current knowledge about tropical rain forest genetics and its implications for the profitable and sustainable management of forest resources in Southeast Asia Each chapter covers a major topic in the evolutionary biology of tropical rain forest trees and how management systems interact with these natural dynamics Authors provide an up to date and insightful review of important scientific findings and conclude with practical recommendations for the modern forester in Southeast Asia Several chapters provide compelling discussions about commonly neglected aspects of tropical forestry including the impact of historical dynamics of climate change anthropogenic threats to genetic viability and the important role of wildlife in maintaining genetic diversity These discussions will promote a deeper appreciation of not only the economic value of forests but also their mystery and intangible values The silvicultural industry in Southeast Asia is a major contributor to the regional economy but the connection between scientific research and the application and development of policy could be improved upon This book will help bridge that gap This book will prove beneficial reading for forestry students professional forest managers and policy makers who do not have technical training in genetics It is also intended for non specialists who are involved in the tropical timber industry from the local forest manager to the international timber purchasing agent

Southeast Asia's Multipolar Future Thomas Parks, 2023-06-15 Southeast Asia is rapidly becoming a competitive space for geopolitical rivalries The growth in China U S strategic competition is creating deep anxiety among Southeast Asia leaders China's rising power is felt across every corner of Southeast Asia and many leaders are worried about the long term implications of rising Chinese influence in the region The United States increasingly assertive approach towards China is welcomed by some governments but the growth in tensions is creating deep anxiety about a possible new Cold War How can the region prevent a repeat of the divisions and bitter rivalries of the previous Cold War This book argues that Southeast Asia is emerging as an open autonomous region where small and middle powers can maintain their sovereignty and shape the regional order Despite new superpower pressures the region is moving towards a multi polar order with greater agency for Southeast Asian countries The key to Southeast Asia's future may be other external powers particularly Japan Australia India and Europe who can provide ASEAN governments with more diverse partnerships enabling them to avoid the bipolar blocs of superpower rivalries The book argues that external partners are helping to shape the geopolitical order by supporting ASEAN leadership and diluting the influence of great powers Southeast Asian countries also have remarkable capacity to manage asymmetrical relations and balance external powers The book describes the region's history of managing great power relations drawing on historical and contemporary cases By examining the dynamics between Southeast Asia and external powers the book predicts that the region's future will look entirely different from its Cold War past
