Television in Black-and-white America Alan Nadel, 2005 La couverture indique Alan Nadel s new book reminds us that most of the images on early TV were decidedly Caucasian and directed at predominantly white audiences Television did not invent whiteness for America but it did reinforce it as the norm particularly during the Cold War years Nadel now shows just how instrumental it was in constructing a narrow conservative and very white vision of America During this era prime time TV was dominated by adult Westerns with heroes like The Rebel s Johnny Yuma reincarnating Southern values and Bonanza s Cartwright family reinforcing the notion of white patriarchy programs that Nadel shows bristled with Cold War messages even as they spoke to the nation s mythology America had become visually reconfigured as a vast Ponderosa

crisscrossed by concrete highways designed to carry suburban white drivers beyond the moral challenge of racism racial poverty and increasingly vocal civil rights demands

Friction Is Fiction: the Future of Content, Media and Business (Black and White Edition) Gerd Leonhard, 2010-05-06 Futurist and Thought Leader Gerd Leonhard [www.mediafuturist.com](http://www.mediafuturist.com) shares his thoughts on the Future of Content Media and Business. Friction is Fiction presents a constantly updated compilation of Gerd's best essays, writings, and most popular blog posts. The central meme is that the Internet has completely disrupted the traditional notion of generating higher income by simply taking advantage of possible friction points and hurdles within transactions or business processes, i.e. by controlling the people formerly known as consumers. The Future is all about winning the trust and turning attention into revenues. Alvarez-Monzoncillo, 2022-03-03 This book deals with the Internet's influence on television. The traditional value chain has been transformed, giving rise to new forms of television that foster user-generated content. We no longer dream about interactivity but participation. Accordingly, the digital natives like to tag programs and films in the cyberspace, each conveniently tagged so that other users can find it. Although many questions have yet to be answered, this decade's motto may be the tag is the medium. However, on-demand television is unlikely to replace mass TV. The Web 2.0 has brought an end to the my TV concept of the dotcom age and may put our TV in its place. These changes pose serious problems. The industry is facing the real threat of revenue cannibalization because current online business models are not financially rewarding. The Internet is not yet a profitable market for programs that require additional revenues to advertising. To date, the box office, video, and premium television have been the main sources of revenue of the audiovisual industry. This book explores the factors at play in this shift. **Projection Engineering**, 1929 **Communication Technology Update and**
