## **Future Of Aesthetics:**

*Aesthetics and the Sciences of Mind* Greg Currie, Matthew Kieran, Aaron Meskin, Jon Robson, 2014-07-24 Through much of the twentieth century philosophical thinking about works of art design and other aesthetic products has emphasized intuitive and reflective methods often tied to the idea that philosophy's business is primarily to analyze concepts This philosophy from the armchair approach contrasts with methods used by psychologists sociologists evolutionary thinkers and others who study the making and reception of the arts empirically How far should philosophers be sensitive to the results of these studies Is their own largely a priori method basically flawed Are their views on aesthetic value interpretation imagination and the emotions of art to be rethought in the light of best science The essays in this volume seek answers to these questions many through detailed studies of problems traditionally regarded as philosophical but where empirical inquiry seems to be shedding interesting light No common view is looked for or found in this volume a number of authors argue that the current enthusiasm for scientific approaches to aesthetics is based on a misunderstanding of the philosophical enterprise and sometimes on misinterpretation of the science others suggest various ways that philosophy can and should accommodate and sometimes yield to the empirical approach The editors provide a substantial introduction which sets the scene historically and conceptually before summarizing the claims and arguments of the essays

Life as Art Zachary

Simpson,2012-09-27 Life as Art brings the resources of contemporary aesthetics since Nietzsche to bear on the problems of how one integrates the aesthetic emphases of meaning liberation and creativity into one's daily life By linking together the aesthetic and ethical accounts of critical theorists phenomenologists and existentialists into a coherent view on the artful life Life as Art shows the ways in which much of contemporary Continental theory has been concerned with alternative ways of constructing one's own life Seen as a unified phenomenon life as art signifies an active attempt to create a life which bears the resistance openness and creativity found in artworks

*Aesthetics of Weather* Madalina Diaconu,2024-09-19 In an age of rife consumption and increasing need for consideration of sustainable social practices an exploration of the aesthetics of weather from various angles becomes vital in shedding light on its importance to our experience of the changing world In response offering the first in depth and nuanced examination of the aesthetics of weather this book underlines the relevance the concept has for scientific communication for fostering sustainable patterns of behaviour and for rejecting the environmentally damaging consumption of landscapes and fine weather In addition it provides examples taken from global contemporary popular culture whilst calling attention to the socioeconomic and political dimensions of individual experience demonstrating and analysing our fascination with and cultural interpretations of weather phenomena in our everyday lives Within its three sections the volume reinvents traditional phenomenological methods to create socially politically and historically embedded phenomenographies and explore the importance of aesthetic practices in shaping our experience of weather and climate It also provides a deeper engagement with general topics such as the relationship between perception emotion imagination and cognition in our aesthetic experience of the weather combining these with aesthetic analyses of the so called fine weather With its broad scope of inquiry ranging from Aristotle to eco phenomenology from the pioneers of scientific meteorology to contemporary art and from everyday aesthetics to geoengineering this book argues that an aesthetics of weather inflected by greater knowledge and the taking of a critical stance towards aestheticism can become a valuable ally to climate ethics in the Anthropocene

Alexander Elliott, James Cullis, Vinita Damodaran, 2017-11-01 This volume of essays fills a lacunae in the current climate change debate by bringing new perspectives on the role of humanities scholars within this debate The humanities have historically played an important role in the various debates on environment climate and society The past two decades especially have seen a resurfacing of these environmental concerns across humanities disciplines in the wake of what has been termed climate change This book argues that these disciplines should be more confident and vocal in responding to climate change while questioning the way in which the climate change debate is currently being conducted in academic political and social arenas Addressing climate change through the varied approaches of the humanities means re thinking and re evaluating its fundamental assumptions and responses to perceived crisis through the lens of history philosophy and literature The volume aims thus to be a catalyst for emerging scholarship in this field and to appeal to an academic and popular readership      The Extraordinary in the Ordinary Thomas Leddy, 2012-02-07 This book explores the aesthetics of the

**The Hollywood Renaissance** Peter Krämer, Yannis Tzioumakis, 2018-06-28 In December 1967 Time magazine put Bonnie and Clyde on its cover and proudly declared that Hollywood cinema was undergoing a renaissance For the next few years a wide range of formally and thematically challenging films were produced at the very centre of the American film industry often but by no means always combining success at the box office with huge critical acclaim both then and later This collection brings together acknowledged experts on American cinema to examine thirteen key films from the years 1966 to 1974 starting with Who's Afraid of Virginia Woolf a major studio release which was in effect exempted from Hollywood's Production Code and thus helped to liberate American filmmaking from self censorship Long standing taboos to do with sex violence race relations drugs politics religion and much else could now be broken often in conjunction with extensive stylistic experimentation Whereas most previous scholarship has examined these developments through the prism of auteurism with its tight focus on film directors and their oeuvres the contributors to this collection also carefully examine production histories and processes In doing so they pay particular attention to the economic underpinnings and collaborative nature of filmmaking the influence of European art cinema as well as of exploitation experimental and underground films and the connections between cinema and other media notably publishing music and theatre Several chapters show how the innovations of the Hollywood Renaissance relate to further changes in American cinema from the mid 1970s onwards
