Technologies and Other Human Histories examines the idea of lost knowledge reaching back to a period between myth and history. It investigates a peculiar idea found in a number of early texts that there were civilizations with knowledge of sophisticated technologies and that this knowledge was obscured or destroyed over time along with the civilization that had created it. This book presents critical studies of a series of early Chinese, South Asian, and other texts that look at the idea of specific lost technologies such as mechanical flight and the transmission of images. There is also an examination of why concepts of a vanished golden age were prevalent in so many cultures. Offering an engaging and investigative look at the propagation of history and myth in technology and culture, this book is sure to interest historians and readers from many backgrounds.

**Encyclopedia of Goddesses and Heroines** Patricia Monaghan, 2009-12-18. This two-volume set provides a comprehensive guide to the vast array of feminine divine figures found throughout the world. Drawn from a variety of sources ranging from classical literature to early ethnographies to contemporary interpretations, the *Encyclopedia of Goddesses and Heroines* provides a comprehensive introduction to the ways goddess figures have been viewed through the ages. This unique encyclopedia of over thousands of figures of feminine divinity describes the myths and attributes of goddesses and female spiritual powers from around the world. The two-volume set is organized by culture and religion, exploring the role of women in each culture's religious life and introducing readers to the background of each pantheon as well as the individual figures who peopled it. Alternative names for important divinities are offered, as are lists of minor goddesses and their attributes. Interest in women's spirituality has grown significantly over the last 30 years, both among those who remain in traditional religions and those who explore spirituality outside those confines. This work speaks to them all.

**Wonders of the Air** Tamra Andrews, 2004-11-30. This second book in a four-book series exploring the elements of Nature: Natural Phenomena in Science and Myth looks at the wonder of air from both a scientific and mythical perspective. Intended for teachers and librarians to use with students in intermediate and middle school grades, the book looks at natural phenomena that occurs in the air around us, such as rainbows, snow, tornadoes, lightning, and thunder, through ancient myth and details the explanations of modern-day science. With this interdisciplinary approach, students will be encouraged to appreciate the magic in both myth and science and to understand the commonality of human experience with nature over time. Each book contains eight myths, each from a different culture, and accompanying scientific explanation.

**Cultural Sociology of the Middle East, Asia, and Africa** Andrea L. Stanton, 2012 In our age of globalization and multiculturalism it has never been more important to understand and appreciate all cultures across the world. The four volumes take a step forward in this endeavour by presenting concise information on those regions least well known to students across Europe: the Middle East, Asia, and Africa. The volumes convey what daily life is like for people in these selected regions. Entries will aid readers in understanding the importance of cultural sociology to appreciate the effects of cultural forces around the world and to learn the history of countries and cultures within these important regions. Key Features: Topics are explored within historical context in three broad historical periods: prehistory to 1250, 1250 to 1920, and 1920 to the present. One volume each is devoted to the regions of the Middle East and Africa, and then one volume to East and Southeast Asia, and a final volume to West Central and South Asia. The volumes include extensive use of photographs and maps to explain cultural and geographic content. Each volume has its own volume editor with expertise in that particular region. Key Themes: Arts, Culture, and Science; People, Society, and Dynasties; Religion and Law; Family and Daily Life; Conflicts and Wars; Politics and Government; Health and Education; Economy, Trade, and Industry; National Geography and History.
