Food And Development In The Semiarid Zone Of East Africa:

Food and Development in the Semi-arid Zone of East Africa Philip Wayland Porter, 1979 **The Impact of Climatic Variations on Agriculture** M.L. Parry, T.R. Carter, N.T. Konijn, 2012-12-06 Three important studies were initiated in the 1970s to investigate the relationship between climatic variations and agriculture by the National Defense University 1980 on Crop Yields and Climate Change to the Year 2000 by the U.S. Department of Transportation 1975 on Impacts of Climatic Change on the Biosphere and by the U.S. Department of Energy 1980 on Environmental and Societal Consequences of a Possible CO₂ Induced Climatic Change the CLAP 2 study These were pioneering projects in a young field Their emphasis was on measuring likely impacts of climatic variations rather than on evaluating possible responses and they focused on first order impacts e.g. on crop yields rather than on higher order effects on society A logical next step was to look at higher order effects and potential responses as part of a more integrated approach to impact assessment This was undertaken by the World Climate Impact Program WCIP which is directed by the United Nations Environment Program UNEP The WCIP is one of four aspects of the World Climate Program which was initiated in 1979 *The Development Problems and Prospects of Semi-arid Areas in Eastern Africa* Organization for Social Science Research in Eastern Africa, 1980 **Congressional Presentation** United States. Agency for International Development, **Pastoralism and Climate Change in East Africa** Yanda, Pius Zebhe, Mung'ong'o, Claude Gasper, 2018-08-03 Pastoralism and Climate Change in East Africa provides systematic and robust empirical investigations on the impact of climate change on pastoral production systems as well as participating in the ongoing debate over the efficacy of traditional pastoralism This book is an initial product of the Project Building Knowledge to Support Climate Change Adaptation for Pastoralist Communities in East Africa implemented by the Centre for Climate Change Studies of the University of Dar es Salaam with support from the Open Society Initiative for Eastern Africa Traditional pastoralism has proved to be a resilient and unique system of adaptations in a dynamic process of unpredictable climatic variability and continuous human interactions with the natural environment in dryland ecosystems Pastoral adaptations and climate induced innovative coping mechanisms have strategically been embedded in the indigenous social structures and resource management value systems Pastoral livelihoods have nevertheless become increasingly vulnerable to climate change impacts as a result of prolonged marginalization and harmful external interventions The negative effect of global climate change has been an added dimension to the already prevailing crisis in the pastoral livelihood system which is substantially driven by non climatic factors of internal and external pressures of change such as population growth bad governance and shrinking rangelands lost to competing activities Socioeconomic Determinants of Credit Adoption in a Semi-arid District of Kenya L. Richard Meyers, 1982 **Breeding Sorghum for Diverse End Uses** Aruna C, K.B.R.S. Visarada, B. Venkatesh Bhat, Vilas A. Tonapi, 2018-08-22 Breeding Sorghum for Diverse End Uses is a comprehensive overview of all significant global efforts for the genetic improvement of sorghum a major crop of many semi

arid nations that is suitable for a huge range of uses from human food to biofuels Split into two main sections the book initially reviews the genetic suitability of sorghum for breeding also providing the history of the genetic improvement of the grain Finally other sections look at specific breeding programs that could be improved in a number of areas including human food animal feed and industrial usage Readers in academics research plant genetics and sorghum development will find this resource of great value In addition it is essential reading for engineers who utilize sorghum for food feed and industrial materials in industry Provides information on key advances in the genetic makeup of sorghum Allows plant breeders to apply this research to effectively breed new strains of sorghum that are dependent on final usage goals Includes the latest findings in each section to orient researchers to plans for future genetic enhancement

Hydrology and Water Resources Management in Arid, Semi-Arid, and Tropical Regions Ondieki, Christopher Misati, Kithika, Johnson Utu, 2019-06-28

Hydrology is a key influence on water security environmental sustainability agricultural production energy and transport especially in unique environments such as arid regions and the tropics where degradation issues on water and land can threaten the livelihoods of poor communities With implications in urbanization landscape architecture and sanitation enhancing the practice of water use management and planning is imperative for the sustainable development of these regions Hydrology and Water Resources Management in Arid Semi Arid and Tropical Regions is an essential research publication that seeks to improve scientific understanding and sharing of data in hydrology and integrated water resources management of arid semi arid and tropical regions in order to enhance water governance and alleviate reduction in the vulnerability of water resources systems to global changes Featuring a wide range of topics such as hydrometeorology sustainable development and climate change this book is ideal for researchers technology developers academicians policymakers government officials and students

Sustainable Poverty Reduction in Less-favoured Areas Ruerd Ruben, J. Pender, Arie Kuyvenhoven, 2007-01-01 Less favored areas with limited agricultural potential or difficult access conditions support 40 percent of the world's rural population suffering from chronic poverty While agricultural innovations and rural development programs have begun to be implemented within developing countries they do not address the specific obstacles faced by this large population Instead a targeted approach is needed to identify different resource management strategies for particular types of households and communities as well as creating balanced investments aimed at sustainable intensification of rural livelihoods Such efforts have been the focus of the research program on Regional Food Security Policies for Natural Resource Management and Sustainable Economies RESPONSE Through the study of less favored areas in Africa Latin America and South and East Asia development pathways allowing for the careful adjustment of resource use strategies at the field farm household and village level are explored

Perspectives in Resource Management in Developing Countries Baleshwar Thakur, 2007 v 2 Population resources and development v 3 Ecological degradation of land Earthcare: Global Protection Of Natural Areas Edmund A. Schofield, 2019-03-13 The Sierra Club's Fourteenth Biennial Wilderness Conference

was cosponsored by the National Audubon Society with over 100 organizations participating. It was among the largest assemblies ever held of statesmen, scientists, lawyers, conservationists, and government and UN officials concerned with the preservation, protection, and restoration of nature. **Understanding African Real Estate Markets** Aly Karam, François Viruly, Catherine Kariuki, Victor Akujuru, 2022-04-28 This book brings together a broad range of research that interrogates how real estate market analysis, finance, planning, and investment for residential and commercial developments across the African continent are undertaken. In the past two decades, African real estate markets have rapidly matured, creating the conditions for new investment opportunities which has increased the demand for a deeper understanding of the commercial and residential markets across the continent. The chapters consider issues that pertain to formal real estate markets and the critical relationship between formal and informal property markets on the continent. With contributing authors from South Africa, Ghana, Nigeria, Uganda, Kenya, and Tanzania, the book considers the achievements of African real estate markets while also highlighting the complex central themes such as underdeveloped land tenure arrangements, the availability of finance in both the commercial and residential sectors, rapidly growing urban areas, and inadequate professional skills. This book is essential reading for students in real estate, land management, planning, finance, development, and economics programs who need to understand the nuances of markets in the African context. Investors and policy makers will learn a lot reading this book too. **Development of Rainfed Agriculture Under Arid and Semiarid Conditions** Ted J. Davis, 1986

Ecophysiology of Economic Plants in Arid and Semi-Arid Lands Gerald E. Wickens, 2013-04-17 This book deals with arid and semi-arid environments and their classification and the physiological restraints and adaptations of plants to the environment. Further, it discusses economic botany and the needs and methods of conserving economic plants. A broad view is taken regarding the definition of economic plants, taking into account their value to the environment as well as to man and to livestock. The individual deserts and associated semi-arid regions are described in separate chapters, providing background information on the regional environments in terms of climate and major plant formations. The economic plants within these formations, their usages, geographical distribution, together with their morphological and physiological adaptations, are treated in detail. **Climate Change 2001: The Scientific Basis** J. T. Houghton, Y. Ding, D. J. Griggs, M. Noguer, P. J. van der Linden, X. Dai, K. Maskell, C. A. Johnson, 2001-07-12 Climate Change 2001: The Scientific Basis is the most comprehensive and up-to-date scientific assessment of past, present, and future climate change. The report analyses an enormous body of observations of all parts of the climate system. Catalogues increasing concentrations of atmospheric greenhouse gases. Assesses our understanding of the processes and feedbacks which govern the climate system. Projects scenarios of future climate change using a wide range of models of future emissions of greenhouse gases and aerosols. Makes a detailed study of whether a human influence on climate can be identified. Suggests gaps in information and understanding that remain in our knowledge of climate change and how these might be addressed. This latest IPCC assessment will again form the standard

scientific reference for all concerned with climate change and its consequences including students and researchers in all aspects of environmental and atmospheric science and policymakers in governments and industry worldwide

Semiarid Soil and Water Conservation Finkel, 2018-01-18 In this volume the erosion and conservation measures discussed are for the most part those under unirrigated agriculture The use of irrigation could cause significant changes in the growing seasons and in the agricultural calendar especially in the warmer climates where temperature is not a limiting factor It is further noted that much of the material in this volume has been prepared with the developing countries of the so called Third World in mind In many of these countries there is a dearth of basic data such as long term hydrological records detailed soil and topographic surveys and experimental results for various types of erosion control measures Some design procedures cannot be imitated or copied directly from those of the technologically more advanced countries Consequently emphasis will be placed wherever possible upon simple empirical methods of design and approximate solutions within the limitations of the available data technical possibilities and financial resources of the Third World countries Much of the numerical data and calculations will be presented in the metric system
