

Raw Vegan Series FOOD COMBINING

DIETARY GUIDANCE

INTRODUCTION

Raw Foods Vegetarianism

- Eating a diet of raw and living food can improve health, slow aging, improve mental clarity, and strengthen overall immune function.
- Other recommended lifestyle improvements are careful food combining, fasting, yoga, stretching, daily aerobic and strength training routines, and dry skin brushing, as well as improving mental outlook and the use of incense, aromatherapy, soundbaths, massage, and other complementary therapies.

Food Combining

- One goal is to nourish with the most nutrient-dense, easily digestible foods, allowing quick absorption of nutrients and efficient elimination of waste.
- Even if the diet is purely living foods, the combination of foods eaten at one sitting can either help or hinder this process.

TWO PRINCIPLES OF FOOD COMBINING

1 Do Not Neutralize Your Digestive Phases

- Protein-dominant foods require the acidic juices found in the stomach to break them down.
- Starch-dominant foods require the alkaline fluids produced in the mouth for complete digestion.
- When the acidic juices mix with the alkaline juices they tend to neutralize each other, thus digestion is impeded and incomplete.

2 Do Not Move Food That Digests Quickly

- Foods digest at a different rate in different acid/alkaline environments.
- When a food that digests quickly is eaten after a food that takes more time to digest, the process is impeded.
- This causes indigestion, fermentation, bloating, and gas accumulation.

THE FOUR GOLDEN RULES

1 Never Eat Protein-Dominant Foods and Starchy Carbohydrate-Dominant Foods in the Same Meal

- Each group goes well with vegetables, but not at the same meal.

2 Never Eat Fruits & Vegetables in the Same Meal

- Fruits and vegetables digest at different rates.
- If consumed together, they can cause a backup in the digestive system and produce gas and bloating.

3 Consume Only Truly Ripe Fruit and Only Wheat in Full Health

- Fruit is often picked earlier to extend its shelf life, but if eaten, unripe fruit takes what it needs to ripen from the body.
- Fruit contains sugar, and all sugar feeds disease.
- Sugar is hard on the pancreas, and if the pancreas does not work well, the sugar goes into the bloodstream and feeds disease.
- Once you have achieved optimum health, 10% of your diet may be fruit.
- When drinking fruit juices, add 25-50% water.

4 Eat Maltose Above (or Only with) Other Maltose

- Maltose digests rapidly and can ferment quickly.
- If eaten with other foods that require longer digestion time, they will get held up, ferment, and can cause uncomfortable gas and bloating.
- Once sitting in the system, they will ferment and cause uncomfortable gas.

pH SCALE

ENZYMES

- Enzymes are proteins that assist in chemical reactions without enzymes, life is not possible.
- Digestive enzymes help to break down molecular bonds in food, aiding in digestion.
- Raw, living foods contain enzymes that can be utilized for digestion; this reduces the need for the body's production of digestive enzymes.
- When raw food is chewed or crushed, the enzymes are released and assist in the breakdown of the plant material with which they come in contact.

IDEAL DIET

50% Alkaline & 50% Acid

- Once processed by the body, food has either an acidifying or alkalinizing effect in the body, changing the pH of the tissues and fluids.
- Most raw food is digested also affects mineral balance.
- A diet high in alkalinizing foods helps keep the overall pH of the body in an ideal range; most people are overly acidic, which makes disease and dysfunction.

Alkaline-Forming Foods

- Spinach • Leafy greens • Green vegetables
- Vine-ripened vegetables • Melons • Cucumber
- Pepper • Carrots • Onions • Two-ripened fruit
- Small grains • Low vegetables • Cultured vegetables • Fresh beans and corn • Sesame seeds • Some nuts

Acid-Forming Foods

- Most fruit (all unripe fruit and subfruits) • Large grains
- Buckwheat, rye, wheat • Cooked beans • Cooked white potatoes • Most unprocessed nuts and seeds
- Maltose • Cakes • Soy milk • Sugar • Dairy • Eggs • Coffee • Salted processed foods • Bread

When 50% of your diet is alkalinizing, you will see the immune system reach full employment and the alkaline cooked foods cause
