of the gaps in access to the drivers of nutrition within countries to assist them in the formulation of a more informed evidence based and balanced multisectoral strategy against undernutrition

Undernutrition in India Aparajita Chattopadhyay, Akancha Singh, Samridhi S. Gupte, 2023-02-27 This book deals with issues related to undernutrition and anaemia in India. It establishes its interconnectedness with poverty, tribal living conditions, contraception usage, dietary diversity, and socioeconomic inequality. It addresses SDG 2, namely, end hunger, achieve food security and improved nutrition, and promote sustainable agriculture. It puts forth the linkages between mother's economic empowerment and children's nutritional status, anaemia of women, with particular reference to tribal women and the issues associated with anaemia in India. It also delves into the relationship between contraceptive usage and anaemia level. It explores the proximate and intermediate determinants of undernutrition disaggregated at the state level in India. It elaborates the importance of ensuring food security and suggests policy measures to improve maternal and child health. The book is an asset for all researchers, academicians, clinicians, and policy makers dealing with sociology, economics, public policy, social work, population study, gender issues, biostatistics, health development, and nutrition.

Jones-Smith, 2020-08-04 This foundational textbook provides a thorough understanding of the role of nutrition in public health in communities around the world. Nutrition is a fundamental building block for optimal health. In this essential textbook, Jessica Jones Smith presents readers with a balanced introduction to the field of public health nutrition. Examining common nutrition related problems in both high and low income countries, Jones Smith allows students to draw connections between the principles and realities of public health nutrition. She also describes the fundamental tools of public health nutrition from nutrition assessment to program monitoring and evaluation, as well as current and future solutions for public health nutrition's most pressing issues. Covering fundamental topics while helping students build the knowledge and skills foundational to public health nutrition research and practice, the book addresses nutrition surveillance, dietary assessment methods, program planning and program evaluation, environmental and underlying determinants of nutrition related diseases in high middle and low income countries, monitoring and evaluation in nutrition programs, nutrition epidemiology, community health assessment, nutrition related policies and programs with a particular focus on WIC in the United States and cash transfer programs in low and middle income countries, leading causes of disease and death, obesity, stunting, nutrition transitions. The text also provides a much needed resource for established researchers and practitioners of public health.
