EU Food Law Caoimhín MacMaoláin, 2007-03-01 This is the first comprehensive analysis of the European Union law of food regulation It details the way in which EU law impacts upon the production and sale of food throughout the Union It examines the legal protection accorded to the free movement of food within the EU discussing those circumstances in which Member States may derogate from this principle in particular where this is done to protect human health or safeguard consumer interests Chapter four discusses and places in context the international trade law influences on EU food law Chapter five describes EU responses to recent food safety crises avian influenza and BSE The book also deals with issues such as nutrition law and policy obesity GMOs organic food animal welfare and food naming and labelling This book offers an account of the historical political sociological and jurisprudential context of European Union food law The author who is an academic and consultant in this area translates the legal and scientific complexities of food law into a lucid and compelling narrative The resulting work will also prove an indispensable guide to the practitioner

EU Food Law Handbook Bernd Van der Meulen, Bart

Wernaart,2020-09-01 The twenty first century has witnessed a fundamental reform of food law in the European Union to the point where modern EU food law has now come of age This EU Food Law Handbook presents the most significant elements of these legal developments with contributions from a highly qualified international team of academics and practitioners Their analysis is based on a shared vision of the structure and content of EU food law The book takes the perspective of food law embedded within general EU law It highlights the consequences of this combination and provides insights into both substantive and procedural food law Taking the General Food Law as a focal point this handbook systematically analyses and explains the institutional substantive and procedural elements of EU food law Principles are discussed as well as specific rules addressing food as a product the processes related to food and communication about food to consumers through labelling These rules define requirements on subjects like market authorisation for food additives novel foods and genetically modified foods chemical and biological contaminants in food food hygiene tracking tracing withdrawal recall food labelling and claims The powers of public authorities to enforce food law and to deal with incidents are outlined Attention is given to the international context WTO Codex Alimentarius as well as to private standards In addition to the systematic analysis the book includes selected topics such as nutrition and health policy special foods food import requirements food contact materials intellectual property private food law and animal feed In this new edition existing chapters have been updated to take account of many important developments in legislation and case law Several new topics have been added to the analysis such as the right to food organics and food fraud The EU Food Law Handbook is produced in co operation with the European Institute for Food Law It is relevant for practitioners and academics both with and without a background in law It is ideal for education purposes

European Food Regulation after Enlargement Karolina Žurek,2011-11-11 This book presents a critical legal perspective on the current direction of EU food regulation Analysing three regulatory mechanisms mutual recognition scientific risk regulation and standardisation in the evolution of food legislation in the EU the book shows the inadequacy of the current framework in facing the challenges of enlargement Using the particular experience of a new member state Poland the book argues that an enlarged Europe must not disregard diverse socio economic implications of market regulation Due to historical legacies and a bias in favour of homogeneity the EU food regulatory regime has generated a one dimensional crisis oriented approach As a result it tends to overlook other legitimate concerns such as quality diversity and local traditions This book argues that this need not be so

EU Food Law K Goodburn,2001-06-14 Given its fragmented development EU food law can be seen as both complex and confusing With its distinguished team of contributors EU food law highlights the key issues so those non specialists can understand the legislation and what it means for them It is designed to help readers ask the right questions when developing and marketing products in the European Union and to provide answers to those questions The book begins with an overview of the development of EU food law and then describes the main institutions involved in framing food legislation and the legislative process This discussion is

designed to provide a context for the chapters on specific aspects of EU food law that follow Part one there are a series of chapters on legislation controlling food safety ranging from the way food products are manufactured hygiene and the control of contaminants to food composition and packaging additives and food contact materials Part two considers how EU food law ensures that consumers are properly informed about the food products they buy There are chapters on labelling nutrition information the increasingly important area of health claims and the handling of foods for particular nutritional purposes Part three of the book contains two case studies illustrating how these various strands of EU food law impact in practice on a particular food product looking at both an established food ingredient and the emerging area of functional foods EU food law provides an authoritative introduction and guide to a complex subject It will be widely welcomed by all those designing food products for and selling food products in the European Union
