Food And Population In A Northeast Thai Village:

Food and Population in a Northeast Thai Village Hayao Fukui, 1994-01-01 Food and Population in a Northeast Thai Village is a remarkably thorough baseline study of the interrelationship between demographic change land and agricultural production in what must be one of the most intensively studied village communities in Asia Ban Don Daeng which lies a few kilometres from the North East Thai regional urban centre of Khon Kaen Journal of Southeast Asian Studies 30 01 March 1999 **Development Monks in Northeast Thailand** Phinit Lāpthanānon, 2012 Co published with Trans Pacific Press Australia

Categories and Contexts Simon Szreter, Hania Sholkamy, A. Dharmalingam, 2004-03-18 Throughout its history as a social science demography has been associated with an exclusively quantitative orientation for studying social problems As a result demographers tend to analyse population issues scientifically through sets of fixed social categories that are divorced from dynamic relationships and local contexts and processes This volume questions these fixed categories in two ways First it examines the historical and political circumstances in which such categories had their provenance and second it reassesses their uncritical applications over space and time in a diverse range of empirical case studies encouraging throughout a constructive interdisciplinary dialogue involving anthropologists demographers historians and sociologists This volume seeks to examine the political complexities that lie at the heart of population studies by focusing on category formation category use and category critique It shows that this takes the form of a dialectic between the needs for clarity of scientific and administrative analysis and the recalcitrant diversity of the social contexts and human processes that generate population change The critical reflections of each chapter are enriched by meticulous ethnographic fieldwork and historical research drawn from every continent This volume therefore exemplifies a new methodology for research in population studies one that does not simply accept and re use the established categories of population science but seeks critically and reflexively to explore test and re evaluate their meanings in diverse contexts It shows that for demography to realise its full potential it must urgently re examine and contextualize the social categories used today in population research **Network**

Epidemiology Martina Morris, 2004-03-18 Over the past two decades the epidemic of HIV AIDS has challenged the public health community to fundamentally rethink the framework for preventing infectious diseases While much progress has been made on the biomedical front in treatments for HIV infection prevention still relies on behaviour change This book documents and explains the remarkable breakthroughs in behavioural research design that have emerged to confront this new challenge the study of partnership networks Traditionally public health research focused on the knowledge attitudes and practices KAP of individuals an approach designed for understanding health related behaviour like seat belt wearing and cigarette smoking For HIV and other sexually transmitted infections however there are at least two people involved in transmission This may not seem like a big difference but in fact it changes everything First it means that your risk depends on your partners and on their partners and their partners it depends on your position in the network of partnerships Consider for example the rise of

infections among monogamous women Second it means that individuals are not free to simply change their behaviour condom use or abstinence needs to be negotiated with a partner both the epidemiology of risk and constraints to behaviour are therefore a function of the partnership network And our ability to design effective prevention strategies depends on our ability to measure and summarize that network Using the traditional research designs you would not see this network at all you would only see the unconnected nodes They key to solving this problem lies in Network Analysis before now a relatively obscure subfield in Sociology For empirical studies of networks to become feasible however many problems had to be solved This book documents the rapid progress that has been made It brings together eight pioneering studies that have sought to map the networks that spread infection around the world Each chapter reviews the questions that drove the study the changes in methodology that were needed to implement the network survey the mistakes and successes encountered and the central findings that the network design made possible An introduction provides an overview of network survey design a glossary provides a summary of network terminology and example questionnaires from each study provide a template for further research This is a unique and valuable resource for the international public health research community

Population, Land Use, and Environment National Research Council, Division of Behavioral and Social Sciences and Education, Center for Economics, Governance, and International Studies, Committee on the Human Dimensions of Global Change, Panel on New Research on Population and the Environment, 2005-09-15 Population Land Use and Environment Research Directions offers recommendations for future research to improve understanding of how changes in human populations affect the natural environment by means of changes in land use such as deforestation urban development and development of coastal zones It also features a set of state of the art papers by leading researchers that analyze population land use environment relationships in urban and rural settings in developed and underdeveloped countries and that show how remote sensing and other observational methods are being applied to these issues This book will serve as a resource for researchers research funders and students

Population Dynamics and Livelihood Changes of Small-Scale Societies in Laos Satoshi Yokoyama, Takahito Niwa, Hongwei Jiang, 2025-05-06 This book examines various trends in small scale societies in Laos by linking population changes to livelihood changes The primary research issues addressed in the book are as follows How are population dynamics and livelihood changes in small scale societies interrelated What are the current demographic trends in rural areas of Laos How are the livelihoods of small scale societies maintained How is the rapid population growth common in developing countries managed In order to investigate these issues in developing countries where statistical data are not well developed it was necessary to collect information through detailed and distinctive fieldwork To this end a multidisciplinary study of geography cultural anthropology human ecology and demography was conducted in three villages in Laos and compiled as an ethnography The study included a four generation retrospective survey of population and land use change a two year survey of food dairies and a survey of the spatiotemporal distribution of

residents daily activities using GIS and GPS etc The book provides valuable information on the slowdown in the rate of population growth in contemporary rural Laos Livelihoods family planning and population migration are explored in the context of the decreasing population growth rate In addition the book describes the process of adopting modern contraceptive methods in rural areas as well as the Lao government s reproductive policies and villagers responses to them It also illustrates rural rural and rural urban population migration influenced by the government s resettlement policies which encourages people to move from the highlands to the lowlands [Asia-prashant](#) ,1994 **Village Communities in North**

East Thailand Charles Madge,1958 *Environmental Resources Use and Challenges in Contemporary Southeast Asia* Mario Ivan Lopez,Jafar Suryomenggolo,2018-05-17 This edited volume introduces dynamic approaches to the study of Southeast Asia s environmental diversity from different disciplinary perspectives at the interface between the natural and social sciences It brings together research on the region s environmental resource use and shared ecological challenges in the context of present day globalization to offer insights for possible future directions The book introduces unique approaches to the study of Southeast Asia s environmental changes and resource management under the influence of intensifying economic change in the region It also examines the slow erosion of Southeast Asia s rich environment and addresses serious issues such as the decrease in biodiversity and tropical forests and the degradation of peat lands At the same time it discusses the social issues that are tied to energy dependent growth and have intensified over the last two decades It also analyzes the new roadmaps being created to protect conserve and manage the environment By investigating the many ecological issues surrounding us the volume brings to light the constant struggles we face while trying to develop a more inclusive and equitable approach to natural resources governance This volume is relevant for students academics and researchers who have an interest in the Southeast Asian environment and the way in which we use and interact with it

Childbirth and Tradition in Northeast Thailand Anders Poulsen,2007 This beautifully illustrated volume offers a rare study of Isan Thai customs and beliefs associated with pregnancy and birth and how they have changed over almost half a century Using a psychological and socio therapeutic framework Anders Poulsen discusses the function of various birth rites while giving an unmatched description of all traditions specifically connected to pregnancy and birth He includes an interesting description of the tradition of confinement by fire yuu fai and documents that it is still widely practiced contrary to what has been reported He also puts forward a theory of why some traditions maintain their importance while others fade away The findings of this study are supported by the transcription in Isan and translated in to English of the ritual texts that are used in these rites **CSEAS**. Applications in Biogeography and Ecology Andrew C. Millington,Stephen J. Walsh,Patrick E. Osborne,2013-03-11 In recent years the conservation of tropical forests has received worldwide publicity whereas effective forest management particularly for timber extraction has attracted little attention and gained some notoriety The overall aim of the present

paper was to examine how environmental micro variation in the Chiquibul Forest Reserve of Belize can influence species distribution and thereby inform management strategy The paper deals first with the background to forest management in Belize then considers the methodology used in the present study and finally assesses the preliminary results The specific objectives are 1 to assess the effects of changing scale on the variability of selected individual soil properties in forest plots within the same vegetation class and 2 to examine the variation in soil properties and tree species distribution and to integrate environmental and ecological data over a range of scales BACKGROUND Whereas the global and regional distribution of tropical forests is broadly governed by climatic and altitudinal variation individual forest tracts need to consider a range of other locally important factors to explain species distribution and change With very high species diversity tropical forests present a major challenge in the attempt to unravel controlling factors in distribution and growth Swaine et al 1987 Research that attempts to explain diversity has looked at species distribution according to a range of factors with a general recognition that soil fertility plays a significant if ill defined role Swaine 1996 *Congressional Record* United States Congress, 1965 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873

Companion Modeling and Multi-agent Systems for Integrated Natural Resource Management in Asia François Bousquet, 2005 *Thailand* David Smyth, 1998 Since c1970 Thailand's position in the world has changed from potential communist domino to one of the world's most dynamic economies The confrontational politics of the 1970s with the student led revolution of 1973 and the bloody right wing backlash In 1976 were replaced by a new consensus in the following decade A concerted export drive sparked off a tremendous economic boom during the 1980s and early 1990s Tourism also expanded rapidly and is now the single largest foreign exchange earner Economic Success has however been at a cost Each year Bangkok has become more chaotic in the face of increased traffic and an Unprecedented building boom and nationally there has been a widening gap between the haves and the have nots Moreover Thailand is experiencing a potential AIDS time bomb and serious environmental degradation Despite Such pressures and the sudden economic crisis of mid 1997 Thailand has enjoyed an enviable record of stability in recent years

The Dry Areas in Southeast Asia Hayao Fukui, 1999 **Japanese Progress in Climatology**, 2001 Buddhism and Postmodern Imaginings in Thailand Jim Taylor, 2008 This book presents a rethink on the significance of Thai Buddhism in an increasingly complex and changing post modern urban context especially following the financial crisis of 1997 Defining the cultural nature of Thai urbanity the implications for local global flows interactions and emergent social formations James Taylor opens up new possibilities in understanding the specificities of everyday urban life as this relates to perceptions conceptions and lived experiences of religiosity Changes in the centre are

also reverberating in the remaining forests and the monastic tradition of forest dwelling which has sourced most of the nation's modern saints. The text is based on ethnography taking into account the rich variety of everyday practices in a range of the religious. In Thailand, Buddhism is so intimately interconnected with national identity and social, economic and ethno-political concerns as to be inseparable. Taylor argues here that in recent years there has been a marked reformulation of important conventional cosmologies through new and challenging Buddhist ideas and practices. These influences and changes are as much located outside as inside the Buddhist temples/monasteries.

Thai Food David Thompson, 2002-08-27. Renowned chef David Thompson first went to Thailand by mistake; a holiday plan had to be changed at the last minute and he ended up in Bangkok where he was seduced by the people, culture and cuisine. Since that fateful trip some 20 years ago, Thailand has become David's second home. Working alongside cooks who perfected their craft in the Thai royal palaces, he began to document the traditional recipes and culinary techniques that have been handed down from generation to generation. The result is **THAI FOOD**, the most comprehensive account of this ancient and exotic cuisine ever published in English. David writes about Thailand and its food with an easy erudition encouraging readers to cook and experiment while simultaneously fostering a respect for the food and its stewardship through the ages. Although all the classic well-loved recipes are here, this magnum opus features hundreds of lesser-known but equally authentic and delicious Thai dishes that will inspire cooks to go beyond green curry chicken and Thai fish cakes. David's passion and conviction are infectious, complemented by Earl Carter's superb photography. **THAI FOOD** captures all aspects of the dynamic Thai culture and cuisine. Ten years in the making, this groundbreaking work is one of the cookbook publishing events of the decade. The author's London restaurant, *naïm*, received a Michelin star in 2002, making it the first Thai restaurant to receive such an honor. Photographed at David's restaurants in Sydney and London and on location in Thailand, Earl Carter's superb images capture both the essence of Thai food and its rich cultural milieu.

Awards: 2003 James Beard Award Winner, 2003 IACP Award Winner. Reviews: Stands out dauntingly, massively, brilliantly, magisterially, and at the same time bustling with charm. Observations: Life. *Saveur* sets a new standard for Asian cookbooks. *Saveur* Top 100 Home Cook Edition.
