**Abstract** *Background:* The purpose of this study was to determine the prevalence of and risk factors for the presence of a urinary tract infection (UTI) in patients with a urinary catheter (UC) in the intensive care unit (ICU). *Methods:* A cross-sectional study was conducted in the ICU of a tertiary care hospital. All patients with a UC were screened for the presence of a UTI. Data were collected on the following variables: age, sex, duration of UC, duration of ICU stay, and presence of other medical conditions. *Results:* A total of 100 patients with a UC were screened. The prevalence of a UTI was 30%. The risk factors for the presence of a UTI were duration of UC (OR 1.05, 95% CI 1.01–1.09), duration of ICU stay (OR 1.02, 95% CI 1.00–1.04), and presence of other medical conditions (OR 1.03, 95% CI 1.01–1.05). *Conclusion:* The prevalence of a UTI in patients with a UC in the ICU is 30%. The risk factors for the presence of a UTI are duration of UC, duration of ICU stay, and presence of other medical conditions.

Young plants before flowering, used as indicators of the increasing seed density by tallgrass and shrubland forest on the sand dunes, zones of modification of forest.

Perennial herbs 40-60 cm high, leaves crowded by bases then subpetiolate, 5-8 cm long, base fan-like, laminae elliptic, 15-20 cm long, 1-4 cm across, beneath petioles very prominent, in simple umbels terminating a scape 20-40 cm long, pedicels 2-3 cm long, pedicels spreading, 4-5 cm long, flowers crowded by bases 1-1.5 cm across, bracteoles and bracts at base, ovary sessile, 3-lobed, style slender, stigma protruding, bifid, spread at anthesis, growing in the grassland of the wet region of China.

**Abstract**—The purpose of this study was to determine the effect of a 10-week, 100-hr, 100-mile, 100-lb weight loss program on the body composition and physical fitness of 100 obese women. The program was designed to be a total lifestyle change, including diet, exercise, and behavior modification. The program was evaluated using a pretest and posttest design. The results of the study showed that the program was effective in reducing body weight, body fat, and waist circumference. The program also resulted in improvements in physical fitness, including increases in aerobic capacity, muscular strength, and flexibility. The program was well tolerated and the participants reported a high level of satisfaction. The results of this study suggest that a 10-week, 100-hr, 100-mile, 100-lb weight loss program is an effective intervention for the treatment of obesity.

**Food Plants of China** Shiu-ying Hu, 2005 The food plants of an area provide the material basis for the survival of its population and furnish inspiring stimuli for cultural development There are two parts in this book Part 1 introduces the cultural aspects of Chinese food plants and the spread of Chinese culinary culture to the world It also describes how the botanical and cultural information was acquired what plants have been selected by the Chinese people for food how these foodstuffs are produced preserved and prepared and what the western societies can learn from Chinese practices Part 2 provides the botanical identification of the plant kingdom for the esculents used in China as food and or as beverage The plants are illustrated with line drawings or composite photographic plates This book is useful not only as a text for general reading but also as a work reference Naturally it would be a useful addition to the general collection of any library Food plants of China Shiu-ying Hu, 2000 *Environmental Change and Food Security in China* Jenifer Huang McBeath, Jerry McBeath, 2010-03-25 Abstract This chapter defines food security as the condition reached when a nation s population has access to sufficient safe and nutritious food to meet its dietary needs and food preferences It stresses China s importance to global food security because of its population size The chapter introduces the contents of the volume and then treats briefly food security in ancient and dynastic 211 bc 1912 China It examines environmental stressors such as population growth natural disasters and insect pests as well as imperial responses for example irrigation flood control storage and transportation systems The chapter also briefly introduces the Republican era 1912 1949 and compares environmental stressors and government responses then to those of the imperial period Keywords Food system Food security Food production regions Environmental stressors Population growth Natural disasters Insect pests and Plant diseases Deforestation Climate change Irrigation systems Flood control Grand Canal 1 1 The Problem of Food Security and Environmental Change Food is the material basis to human survival and in each nation state providing a system for the development production and distribution of food and its security is a primary national objective Many forces have influenced the food security of peoples since ancient times with particular challenges from natural disasters floods famines drought and pestilence and growing populations globally **An enumeration of the food plants of China** Shiu-ying Hu, 1957 *The Plants of China* De-Yuan Hong, Stephen Blackmore, 2015-04-23 A unique addition to the botanical literature this book presents the flora of China in its astonishing diversity **Edible Medicinal and Non Medicinal Plants** T. **Local Food Plants of Brazil** Michelle Cristine Medeiros Jacob, Ulysses Paulino Albuquerque, 2021-06-03 There has been growing academic interest in local food plants This is a subject that lies at the frontiers of knowledge of various areas such as environmental sciences nutrition public health and humanities To date however we do not have a book bringing these multi disciplinary perspectives to bear on this complex field This book presents the current state of knowledge on local Brazilian food plants through a multidisciplinary approach including an overview of food plants in Brazil as well as comprehensive nutritional data It compiles basic theories on the interrelationship between biodiversity and food and nutrition security as well as ethnobotanical knowledge of local Brazilian food plants Additionally this title provides various methods of learning and teaching the subject including through social media artificial intelligence and through workshops among others

Wild Food Plants for Zero Hunger and Resilient Agriculture Ajay Kumar, Pardeep Singh, Suruchi Singh, Bhupinder Singh, 2023-04-03 The edited volume brings out a comprehensive collection of information relevant to wild food plants their importance for global sustainable food security future readiness and resilient agriculture The book's primary focus is to cover topics on the diversity of wild food plants across the globe their nutraceutical importance production consumption trends integration into the current food menu and marketing and livelihood opportunities to the indigenous people Sustainable development goals 1 2 and 3 are significant for a poverty free hunger free world and ensure good health and wellbeing of the people respectively The three goals are important and interlinked as achieving zero poverty will help reduce hunger among the people Availability of nutritional and balanced food ensures good health Wild food plants are an essential part of a nourishing and healthy diet for indigenous communities They are globally collected from natural habitats or cultivated at more minor scales Although consumed locally they are an essential part of the diets of tribal and indigenous communities worldwide and hold immense potential to alleviate global hunger Considering their importance for global sustainable food security it is essential to clearly understand the future role of wild food plants for future readiness and resilient agriculture Therefore this book provides a piece of important information on these aspects The book is a valuable resource for the audience ranging from undergraduate science students to the NGOs and institutions involved in poverty alleviation programs policymakers dieticians horticulturists plant breeders farmers health experts and food enthusiasts

*Agriculture and Rural Connections in the Pacific* Lei Guang, 2017-05-15 Agriculture and Rural Connections in the Pacific brings together key studies from across several disciplines to examine the history of trans Pacific rural and agricultural connections and to show an agriculturally oriented Pacific World in the making since the 1500s Historical globalization is commonly understood as a process that is propelled by industry or commerce yet the seeds of global integration literally as well as metaphorically were sown much earlier when crops and plants dispersed agricultural systems proliferated and rural people migrated across oceans One goal of this volume is to demonstrate that the historical processes of globalization contained an agrarian dimension in which sub national and national spaces were shaped in part through the influence of forces that originated in distant lands Social and economic trends emanating from outside local territories had large impacts on demographic change choices of agrarian systems and the cropping patterns in many domestic settings A second goal is to encourage readers to abandon the traditional Euro centric view of events that shaped the Pacific region The modern history of the Pacific World was undoubtedly shaped by Western imperialism colonialism and European trade and migration but the present volume seeks to balance the interpretation of those forces with an emphasis on the increasing intensity of trans Pacific interactions through rural labor migration and agricultural production
