Carolan, 2016-04-29 While the phenomenon of embodied knowledge is becoming integrated into the social sciences critical geography and feminist research agendas it continues to be largely ignored by agro food scholars This book helps fill this void by inserting into the food literature living feeling sensing bodies and will be of interest to food scholars as well as those more generally interested in the phenomenon known as embodied realism This book is about the materializations of food politics materializations in this case referring to our embodied sensuous and physical connectivities to food production and consumption It is through these materializations argues Carolan that we know food and the food system more generally others and ourselves      *Global Activism in Food Politics* A. Mann, 2014-05-01 Who should provide food and through what relationships Whose livelihoods should be protected For over 20 years the peasant farmers of La Via Campesina have been engaged in the fight against injustice hunger and poverty under the banner of food sovereignty the right of peoples to healthy and culturally appropriate food produced through ecologically sound and sustainable methods and their right to define their own food and agriculture systems They campaign for healthy sustainable alternatives to an industrial food system controlled by agribusiness companies and the architects of unfair trade agreements This book draws on grounded case studies of agrarian movements in the Americas and Europe as exemplars of a power shift as local opposition scales up to global action in an effort to wrest control of our food away from transnational corporations and back to communities      *Food Politics* Robert L. Paarlberg, 2023 Covering the many important changes in food markets and food politics that have shaped both global and local farming and eating over the past decade this compact and authoritative primer lays out everything you need to know to understand today's global food landscape The politics of food is changing fast In rich countries obesity is now a more serious problem than hunger Consumers once satisfied with cheap and convenient food now want food that is also safe nutritious fresh and grown by local farmers using fewer chemicals Heavily subsidized and underregulated commercial farmers are facing stronger push back from environmentalists and consumer activists and food companies are under the microscope Where does power lie in this increasingly complex global food system Moreover what is the future of food politics both in the United States and beyond The third edition of *Food Politics* What Everyone Needs to Know R has been thoroughly updated to reflect the latest developments and research on today's global food landscape including the realities of food markets farm production methods food manufacturing and dietary health challenges New material covers the rise of China in world food markets and global food politics the unabated and increasing risks to farming from climate change the impact COVID 19 had on incomes and hunger the equally shocking impact from the war in Ukraine on food prices and trade and surprising scientific and technical breakthroughs such as the genome editing of crops CRISPR and the marketing of cell cultured animal free meats As well each chapter has been updated with new data on population growth hunger and food security trade conflicts humanitarian aid carbon farming regenerative agriculture holistic grazing animal welfare genetically engineered food and more Discussing the politics and policies that

**Soda Politics** Marion Nestle, 2015-09-07 Sodas are astonishing products Little more than flavored sugar water these drinks cost practically nothing to produce or buy yet have turned their makers principally Coca Cola and PepsiCo into a multibillion dollar industry with global recognition distribution and political power Billed as refreshing tasty crisp and the real thing sodas also happen to be so well established to contribute to poor dental hygiene higher calorie intake obesity and type 2 diabetes that the first line of defense against any of these conditions is to simply stop drinking them Habitually drinking large volumes of soda not only harms individual health but also burdens societies with runaway healthcare costs So how did products containing absurdly inexpensive ingredients become multibillion dollar industries and international brand icons while also having a devastating impact on public health In *Soda Politics* the 2016 James Beard Award for Writing Coca Cola and PepsiCo spend billions of dollars each year to promote their sale to children minorities and low income populations in developing as well as industrialized nations And once they have stimulated that demand they leave no stone unturned to protect profits That includes lobbying to prevent any measures that would discourage soda sales strategically donating money to health organizations and researchers who can make the science about sodas appear confusing and engaging in Corporate Social Responsibility CSR activities to create goodwill and silence critics *Soda Politics* follows the money trail wherever it leads revealing how hard Big Soda works to sell as much of their products as possible to an increasingly obese world But *Soda Politics* does more than just diagnose a problem it encourages readers to help find solutions From Berkeley to Mexico City and beyond advocates are successfully countering the relentless marketing promotion and political protection of sugary drinks And their actions are having an impact for all of the hardball and softball tactics the soft drink industry employs to maintain the status quo soda consumption has been flat or falling for years Health advocacy campaigns are now the single greatest threat to soda companies profits *Soda Politics* provides readers with the tools they need to keep up pressure on Big Soda in order to build healthier and more sustainable food systems
