## **For A Fundamental Social Ethic:**

**For a Fundamental Social Ethic** Oliva Blanchette, 1973      **Introducing Protestant Social Ethics** Brian Matz, 2017-03-14 Despite their rich tradition of social concern Protestants have historically struggled to articulate why whether and how to challenge unethical social structures This book introduces Protestants to the biblical and historical background of Christian social ethics inviting them to understand the basis for social action and engage with the broader tradition It embraces and explains long standing Christian reflection on social ethics and shows how Scripture and Christian history connect to current social justice issues Each chapter includes learning outcomes and chapter highlights      **Catholic Moral Theology and Social Ethics** Christina Astorga, 2013-12-01 Proposing a new method for moral theology Christina Astorga seeks to recast our understanding of the discipline by drawing from the faith vision of the entire theological enterprise including scripture dogmatic theology social ethics and spirituality      **Ethics As Social Science** Leland B. Yeager, 2002-01-01 this is a very ambitious book ranging over a great deal of territory and a great number of issues the general perspectives offered are certainly engaging Alan Hamlin Journal of Economic Methodology an illuminating book informed by careful thought and wide ranging scholarship David Gordon The Mises Review Economics claims to be a science of choice and its unintended consequences but economists sneak moral judgments in through the back door Ethics on the other hand often falters on the stilts of weak economic theories and assumptions The result economics without ethics is often sterile and ethics without economics is often incoherent Severed from one another each can be dangerously misleading and each misses the opportunity to better understand the economic and moral complexity behind social cooperation Ethics as Social Science helps reconcile the two disciplines and represents years of seasoned careful thinking on the topic Using clear straightforward language Yeager argues that economists should be alert to their ethical positions rather than preach tacitly behind the mask of social welfare analysis and the like Calling for a comparative institutional analysis Yeager himself advances an argument in favor of an indirect or rule utilitarianism one that is sure to unleash debate among libertarians classical liberals and defenders of mainstream welfare economics and among moral philosophers who follow the present state of economic theory David L Prychitko Northern Michigan University US With this important book esteemed economist Leland B Yeager grounds moral and political philosophy in the requirements of a well functioning society one whose members reap the gains from peaceful cooperation while pursuing their own diverse goals This book explores the reasons an individual may have for helping to uphold such a society rather than seeking a free ride on the moral behavior of others A work in the tradition of Hume Smith Mill von Mises Hayek and Hazlitt it expounds a rules or indirect version of utilitarianism It reviews criticisms of utilitarianism in detail as well as alternative grounds of ethics including contractarianism rights based doctrines and appeals to specific intuitions Yeager brings the insights of economics to bear on a field usually dominated by philosophers and theologians Ethics comes across as a subject amply open to the findings of economics and the other social

and natural sciences Economists philosophers and other students and scholars of the social sciences will welcome this book It will also appeal to any reader interested in exploring the ideas of ethics Christian Social Ethics Elmar Nass,2022-09-21 World events have made clear that liberal society must become more resilient in the face of totalitarian challenges But how is liberal society to do that In this groundbreaking work social ethicist Elmar Nass presents the ethical and anthropological foundations of a liberal social order within a Christian conception of humanity and society in an ecumenical spirit In doing so Nass revives the long neglected discussion on the ethics of order Christian foundations and claims are currently confronted with alternative social ethical concepts from other religions traditions and social philosophies Nass argues that Christian social ethics has a critical role to play as it engages the world Nass vividly discusses fundamental and concrete social challenges for human dignity freedom and justice such as peace integrity of creation euthanasia family social justice digitalization behavioral economics and many more in the light of the threefold Christian responsibility before God before oneself before one another He articulates ethical orientations derived with clarity from a Christian foundation of values The Christian social ethics system presented by Nass is a transparent value template that can be applied to ever new challenges in the present and in the future With this understanding of social responsibility questions of racism migration gender and sexuality the environment and public health and pandemics among many others can thus be addressed and answered Nass offers a full throated and robust Christian position for the value discussions of our time **Fundamentals in sexual ethics** Solomon Herbert,1920 Bonhoeffer's Christocentric Theology and Fundamental Debates in Environmental Ethics Steven C. van den Heuvel,2017-05-04 There is widespread understanding of the close connection between religion and the ecological crisis and that in order to amend this crisis theological resources are needed This monograph seeks to contribute to this endeavor by engaging the theology of Dietrich Bonhoeffer His theology is particularly suitable in this context due to its open ended nature and to the prophetic and radical nature of the questions he was prepared to ask that is why there are many other attempts to contextualize Bonhoeffer s theology in areas that he himself has not directly written about In this monograph Steven van den Heuvel first of all addresses the question of how to translate Bonhoeffer s theology in a methodologically sound way He settles on a modified form of the general method of correlation Then secondly van den Heuvel sets out to describe five major concepts in Bonhoeffer s work bringing these into critical interplay with discussions in environmental ethics and eco theology In making the correlations he thoroughly describes each concept situating it in the historic and intellectual background of Bonhoeffer s time He then transposes these concepts to contemporary environmental ethics describing what contribution Bonhoeffer s theology can make An Introduction to Social Ethics. **and Social Ethics** H.W. Gottinger, W. Leinfellner, 2012-12-06 Ethics as one of the most respectable disciplines of philosophy has undergone a drastic and revolutionary change in recent time There are three main trends of this development The first trend can be described as a tendency towards a rigorous formal and analytical language This means simply that ethics has created beside its own formalized set theoretical language a variety of new formalized logical and mathematical methods and concepts Thus ethics has become a formalized meta or episcipline which is going to replace the traditional concepts principles and ethical methods in the realm of social sciences It is clear that a formalized form of ethics can be used more easily in social economic and political theories if there are ethical conflicts to be solved This first trend can be regarded as a *conditio sine qua non* for application in and imposing ethical solutions on social scientific theories The second trend may be characterized as an association or unification tendency of a formalized and analytical ethics with decision theory Decision theory as a new interdisciplinary of social sciences is actually an assemblage of a variety of subtheories such as value utility theory game theory collective decision theory etc Harsanyi has called this complex of subtheories a general theory of human behavior Analytical or formal ethics is actually using this general theory of human behavior as a vehicle simply because this theory deals from the beginning with conflict solution i e

**Business and Economic Ethics** Arthur Rich, 2006 This book is a fundamental and unique masterpiece which reflects the discussions on business and economic ethics over decades in German speaking countries and does so by systematically developing an Ethics of Economic Systems from a Christian theological perspective with a firm foundation in the western philosophical and economic literature Neither in German speaking nor English speaking regions has this complex theme been dealt with in such a comprehensive and thorough manner Ethics is a matter of doing justice to the human without twisting the facts and ignoring the constraints The study introduces seven criteria of human justice that fundamentally relate to the Christian revelation and at the same time establish a humanistic and universal approach Subsequently it focuses on the concrete economic systems and their problems It describes and analyses various models of market and centrally planned economies and evaluates them in the light of middle level principles which are informed by both ethical criteria and economic knowledge Thus the most legitimate economic system is the one which offers the most potential for reforms and self critique The merits of this approach are considerable if the system of the market economy has the advantage of being thoroughly reformable it also requires regulations which are equitable and responsible In this view one better understands the inescapable failure of Marxism but also the ethical ramifications of savage deregulations Arthur Rich 1910 1992 was Professor of Systematic Theology and Director of the Institute of Social Ethics at the University of Zurich Switzerland He worked in the field of business and economic ethics for nearly 40 years Georges Enderle is Arthur and Mary O Neil Professor of International Business Ethics at the Mendoza College of Business University of Notre Dame Indiana USA and President of the International Society of Business Economics and Ethics 2001 2004 which organizes the ISBEE World Congress of Business and Economic Ethics
