Follies Of Globalisation Theory:

The Follies of Globalisation Theory Justin Rosenberg, 2000 The Follies of Globalisation Theory is an erudite and lively critique arguing that fashionable preoccupations with spatiality have generated deep intellectual confusions that stand in the way of a clear understanding of the modern world And he shows how these confusions ultimately condemn globalisation theorists to a peculiar and quixotic stance the more clearly they attempt to articulate their arguments the more equivocal and evasive those arguments become yielding at best the intellectual equivalent of an architectural folly

Globalization John Glenn, 2012-08-06 Rather than claim that there exists a common concept of globalization that all parties can agree to this book seeks to examine some of the conceptions and the way in which they render different interpretations of particular aspects of globalization The last two decades have witnessed an explosive proliferation of academic writings on the subject of globalization which has been accompanied by a high level of interest in the media and widespread usage of the term This has inevitably resulted in the meaning of the concept broadening to include a whole host of issues running the attendant risk of losing any conceptual focus it had John Glenn examines five issue areas affected by

globalization the economy sovereignty civil society governance communication In so doing the book aims to articulate certain questions within each area which will allow for some judgment to be made concerning the differing perspectives on globalization Globalization will be of interest to students of international political economy and politics and international relations in general Globalism, Nationalism, Tribalism Paul James, 2006-05-09 Paul James has written a magnificent account of the world's current condition one that highlights the complexities and contradictions with which people communities and nations must contend and that does so in a compelling and creative style Stressing the interaction between global and local forces his writing style is lively and compelling as well as peppered with a wide range of citations from Woman's Day to the Cambodian Daily on the same page James N Rosenau University Professor of International Affairs The George Washington University Globalism Nationalism Tribalism establishes a new basis for understanding the changing nature of polity and community and offers unprecedented attention to these dominant trends Paul James charts the contradictions and tensions we all encounter in an era of increasing globalization from genocide and terrorism to television and finance capital Globalism is treated as an uneven and layered process of spatial expansion not simply one of disorder fragmentation or rupture Nor is it simply a force of homogenization Nationalism is taken seriously as a continuing and important formation of contemporary identity and politics James rewrites the modernism theories of the nation state without devolving into the postmodernist assertion that all is invention or surface gloss Tribalism is given the attention it has long warranted and is analyzed as a continuing and changing formation of social life from the villages of Rwanda to the cities of the West Theoretically adept and powerfully argued this is the first comprehensive analysis that brings these crucial themes of contemporary life together Globalization and Everyday Life Larry Ray, 2007-08-07 This book explains the meanings of globalization as a concept discussing the key debates and pointing towards new ways of understanding the process as a whole Global Theory from Kant to Hardt and Negri G. Browning, 2011-07-26 Global theory represents an influential and popular means of understanding contemporary social and political phenomena Human identity and social responsibilities are considered in a global context and in the light of a global human condition A global perspective is assumed to be new and to supersede preceding social theory However if contemporary global theory is influential its identity assumptions and novelty are controversial Global Theory from Kant to Hardt and Negri scrutinises global theory by examining how contemporary global theorists simultaneously draw upon and critique preceding modern theories It rethinks contemporary global ideas by relating them to the social thought of Kant Hegel and Marx and in so doing highlights divergent ambiguous aspects of contemporary global theories as well as the continuing impact of the ideas of Kant Hegel and Marx **A Social Theory of the Nation-State** Daniel Chernilo, 2008-03-25 A Social Theory of the Nation State construes a novel and original social theory of the nation state It rejects nationalistic ways of thinking that take the nation state for granted as much as globalist orthodoxy that speaks of its current and definitive decline **Confronting Globalization** P. Hayden, C. el-Ojeili, 2005-06-01

Informed by critical theory the essays in this collection examine the complex dynamics of globalization the challenges that confront democracy justice and rights under globalization and new approaches that seek to contest the excesses of globalization and promote the struggle for global justice They form a challenging and timely volume that will be essential reading for anyone interested in the normative dimensions of globalization **Russian Transformations** Leo

McCann,2004-07-31 The transition of Russia to a developed market economy has been slower more contradictory and less predictable than expected This book examines contemporary Russian socio economic development and explores the degree to which Russian experiences can be incorporated into current social science theories In particular it questions how far the concept of globalization is applicable to the situation in Russia The Social in the Global Jonathan Joseph,2012-07-12 How do influential social ideas contribute to global governance This book takes an original approach to international relations by looking at the way social ideas help to portray the world in a particular way Jonathan Joseph begins by analysing the role of important concepts such as globalisation global civil society social capital networks and risk then examines the role these concepts play in the discourse of international organisations Using the concept of governmentality he argues that contemporary social theories help justify contemporary forms of governance By comparing organisations like the EU and the World Bank Joseph investigates the extent to which these ideas are influential in theory and in practice The Commonwealth Brand Victoria te Velde,2016-03-23 te Velde examines Commonwealth identity through the lens of its membership criteria its recent enlargement and its constant reincarnation Far from being an old relic of the past the Commonwealth is a growing vibrant modern international organisation and despite its traditional image Commonwealth membership is shown to be a rather fluid concept that evolves with the times This book identifies and discusses the different theoretical approaches to analysing the Commonwealth In so doing it exposes various shortcomings in current thinking about international relations and the Commonwealth Furthermore it reveals how a number of turning points in the Commonwealth s history have shaped its membership rules and illustrates how the official Commonwealth still has the potential to expand and develop to best reflect an organisation that represents a third of the world s population In terms of further growth of the organisation this book examines the cases of a number of eligible states to assess their likelihood of achieving membership It also incorporates a handful of non eligible states that notwithstanding the new rules are still bent on joining Globalization and After Samir Dasgupta,Ray Kiely,2006-09-07 Addresses many questions concerning the form of globalisation such as Does globalization involve integration on a worldwide scale or will there be a levelling off or even a reversal Is there an alternative to globalization This work explores the tensions and dilemmas inherent in globalization from local national and global perspectives Globalization and the Muslim World Birgit Schaebler,Leif Stenberg,2004-06-01 Written by scholars from a range of disciplines concerned with the Middle East and Islam history religious studies anthropology sociology political science and covering the Muslim world extensively from Malaysia Turkey Sudan Egypt and Israel Palestine to Muslim

communities in Europe and the United States this important contribution to the debate on globalization sets a standard in dealing with this pervasive force in the field of Islamic and Middle Eastern studies Social Theory and Religion James A. Beckford, 2003-08-21 Many aspects of religion are puzzling these days This 2003 book looks at ways of improving our understanding of religious change by strengthening the links between social theory and the social scientific study of religion It clarifies the social processes involved in constructing religion and non religion in public and private life Taking illustrations of the importance of these boundaries from studies of secularisation religious diversity globalisation religious movements and self identity Beckford reviews social scientific knowledge about religion and assesses the strengths and weaknesses of a wide range of theoretical attempts to account for religious change and continuity The discussion goes in two directions The first is towards identifying ways in which studies of religion would benefit from taking better account of themes in recent social theory The second is towards identifying reasons for social theorists to pay more attention to the findings of empirical investigations of religion *The Financialisation of Social Reproduction in the Age of Neoliberalism: From Theory to Case Studies* Ben Fine, 2024-12-02 Drawing upon comprehensive research across five countries including case studies of housing water and health comprehensive theoretical and empirical accounts are offered of the impact of financialisation on economic and social reproduction alongside the corresponding material cultures of neoliberalism Economic is understood as embedded within social reproduction with neoliberalism as the current stage of capitalism fundamentally underpinned by but not reducible to the financialisation of everyday life Considerable emphasis is placed upon the variegated outcomes attached to the neoliberalisation of social reproduction as highlighted by the comparative study of economic and social provisioning across different countries and sectors Russia Against the Rest Richard Sakwa, 2017-10-12 In this book Richard Sakwa provides a new analysis of the end of the Cold War and the subsequent failure to create a comprehensive and inclusive peace order in Europe The end of the Cold War did not create a sustainable peace system Instead for a quarter of a century a cold peace reflected the tension between cooperative and competitive behaviour None of the fundamental problems of European security were resolved and tensions accumulated In 2014 the crisis exploded in the form of conflict in Ukraine provoking what some call a new Cold War Russia against the Rest challenges the view that this is a replay of the old conflict explaining how the tensions between Russia and the Atlantic community reflect a global realignment of the international system Sakwa provides a balanced and carefully researched analysis of the trajectory of European and global politics since the late 1980s

Territory, Globalization and International Relations J. Strandsbjerg, 2010-10-27 Globalization and changes to statehood challenge our understanding of space and territory This book argues that we must understand that both the modern state and globalisation are based on a cartographic reality of space In consequence claims that globalization represents a spatial challenge to state territory are deeply problematic **Glocalization** Victor Roudometof, 2016-06-10 This book seeks to provide a critical introduction to the under theorized concept of Glocalization While the term has been

slowly diffused into social scientific vocabulary to date there is no book in circulation that specifically discusses this concept. Historically, theorists have intertwined the concepts of the global and the glocal or have subsumed the glocal under other concepts such as cosmopolitanization. Moreover, theorists have failed to give local due attention in their theorizing. The book argues that the terms global, the local, and the glocal are in need of unambiguous and theoretically and methodologically sound definitions. This is a prerequisite for their effective operationalization and application into social research. Globalization is structured in two parts. Part I introduces the term, seeking to provide a history and critical assessment of theorists' past use of globalization and offering an alternative perspective and a clear, effective, and applicable definition of the term, explaining the limitations of the term globalization and the value of defining globalization. Part II then moves on to illustrate how the concept of globalization can be used to broaden our understanding and analysis of a wide range of issues in world politics, including the 21st-century culture of consumption, transnationalism, cosmopolitanism, nationalism, and religious traditions. Utilizing a wide range of historical, ethnographic, and real-life examples from various domains, this work will be essential reading for students and scholars of Globalization and will be of great interest to those in the field of Global, Transnational, and Cosmopolitan Studies.

The Elusiveness of Peace in a Suspect Global System Tatah Mentan, 2024-11-29. A convenient veil is drawn over the many issues facing the majority of citizens on a daily basis as a result of the so-called free market. One is left with an impression that we live in a glorious utopia in which the crusaders of international capitalism continue in their quest to make life peaceful and better for all of humanity. It is also a world which has been at peace for 70 years with no ideological or economic conflict and in which all of humanity live their lives in harmony, benefiting from the fruits of globalization. This claim is nothing less than the rearrangement of the deck chairs on the Titanic, where the Titanic is actually the Global Economic Financial System (GEFS) storming its way through all countries and causing untold human suffering engineered by global pathocrats. In this book, Professor Tatah Mentan dissects human suffering from multidimensional crises such as terrorism, population explosion, denial of human rights, economic inequality, racial discrimination, ideological extremism, religious intolerance, social injustice, ecological imbalance, consumerism, oppression of the weak, and so on. He then calls for a radical global ethics that expects us to realize our roles and duties regarding global peace. It includes the role and ideals of educationalists, the duties of scientists, philosophers, and thinkers, the inculcation of human values such as nonviolence and love.
