Carfora, 2025-07-25 *The Sustainable Food Choice: An Interdisciplinary Approach to Consumer Food Behaviour* explores the intricate relationship between individual preferences, societal norms, and global challenges in the pursuit of sustainable eating habits. Featuring contributions from experts across various fields, the book delves into the nutritional, social, and psychological foundations of food choices, the influence of technology and innovation, and the role of policy in guiding consumer behavior. Through comprehensive analysis and case studies, it offers a roadmap for promoting environmentally friendly and health-conscious food consumption patterns. The book is structured into three sections, with each part focusing on unique aspects of sustainable eating. Highlights include chapters on psychological predictors of food choices, the impact of political attitudes, mindfulness in eating, front-of-package labeling, and smartphone interventions. It provides a holistic understanding of how science, mindfulness, and technology can be leveraged to encourage sustainable food choices. Incorporates diverse perspectives to bridge the gap between knowledge and actionable ideas to promote more sustainable eating habits. Assesses psychological predictors of sustainable food choices. Showcases smartphone technology to promote sustainable food choices. Explores individual differences in sustainable eating through political, environmental, sociological, and emotional influences. **Measuring Diets and Food Choice in the Context of a Changing World** Winnie

Bell, Christine Blake, Shauna Downs, 2025-08-06 Historically, research in low and middle income countries has been focused on what people consume, with less attention to how and why people choose to consume the foods that they do. As incomes rise and local food environments undergo rapid changes, providing consumers with a wider array of options at competitive prices, understanding the underlying drivers of food choice, including the preferences and values that underpin them, has become increasingly important. In recent years, there have been renewed efforts to understand the drivers of food choice in the context of changing food environments and broader food systems, and how these drivers link with food consumption. The goal of this Research Topic is to look beyond dietary consumption, what people eat, by considering more holistically the various drivers of food choice: how and why people eat the foods they do, to better understand what underpins individual decisions. Ultimately, by understanding why people make the choices they do, especially when situated in the local food environment and/or broader food system, we can identify important entry points for behavior change interventions, develop a better understanding about the role of food safety in food choice decisions, improve the environment, climate, and food systems through improved knowledge on the drivers of food choice, and learn about how changing livelihoods shifts dynamics related to food choice. amongst other important research tied to drivers of food choice. **Food Choice, Acceptance and**

Consumption H.J.H. MacFie, Herbert L. Meiselman, 2012-12-06 It is critical for the food industry to maintain a current understanding of the factors affecting food choice acceptance and consumption since these influence all aspects of its activities This subject has matured in recent years and for the first time this book brings together a coherent body of knowledge which draws on the experiences in industrial and academic settings of an international team of authors Written for food technologists and marketeers the book is also an essential reference for all those concerned with the economic social and psychological aspects of the subject

Understanding urban consumers' food choice behavior in Ethiopia: Promoting demand for healthy foods Melesse, Mequanint B., Van den berg, Marrit, de Brauw, Alan, Abate, Gashaw T., 2019-04-04 Using survey data collected from 996 representative households in Addis Ababa Ethiopia this paper documents several insights to help understand urban consumer food purchasing and consumption choices The findings can be summarized as follows 1 We find that households face important dietary gaps a large proportion eats insufficient amounts of nutrient dense vegetables animal source foods and fruits 2 The consumption of ultra processed foods increases with income and may become a pressing health concern as incomes rise 3 From a purchasing perspective we find that consumers buy foods for different purposes at different outlets Nearby kiosks and informal street markets are frequented for small food items and for fruits and vegetables while formal open markets and consumer cooperatives are used for bulky food items 4 Respondents make food and food outlet choices based on their health and food safety concerns but few consider the nutritional value of food when purchasing it Concurrently the availability of a wide variety of healthy and safe foods is highly valued by most respondents for outlet choice Among consumers in lower income categories they tend to make food and food outlet choices based on prices and location convenience 5 Although nutrition is not a primary concern when making choices about food consumers appear to have reasonable nutritional knowledge Most respondents considered a healthy diet to be primarily plant based Most people are aware that they should eat more fruits and vegetables and less sugary fatty and salty foods but they have limited knowledge on the nutrient content of specific foods and the causes of obesity 6 Labelling would not be an effective way to increase nutritional knowledge most respondents have limited understanding of the information that labels provide Rather most respondents trust the information provided by health professionals over other sources In sum these results are potentially relevant for policy and the design of future programs for improving nutritional outcomes through enhanced diets

Aware Food Choices: Bridging the Gap Between Consumer Knowledge About Nutritional Requirements and Nutritional Information Angela Tarabella, Barbara Burchi, 2015-12-11 This Brief provides a snapshot of the continuing debate in the food industry on how to bridge the gap between consumer knowledge of nutrition principles and the nutrition information system currently in place for labelling Aware Food Choices Bridging the Gap Between Consumer Knowledge About Nutrition and Nutritional Information examines the available literature on consumer understanding of nutritional information and comments on the current poor knowledge shown by consumers about nutrition

principles Another focus of this Brief is on the evolution of nutritional information in food labelling and current regulations on nutritional claims and product facts In reviewing attempts to improve the nutrition information system this work points out that consumers must first understand the data provided in order to utilize the system to make healthy food choices Therefore any campaigns aimed at improving the information system must concentrate on consumer data understanding of nutrition principles and components as opposed to a sole focus on labelling upgrades
