Footprints In The Soil And Reflections On The Water:

Footprints in the Soil Benno P Warkentin, 2006-04-18 The history of science discipline is contributing valuable knowledge of the culture of soil understanding of the conditions in society that fostered the ideas and of why they developed in certain ways This book is about the progressive footprints made by scientists in the soil It contains chapters chosen from important topics in the development of soil science and tells the story of the people and the exciting ideas that contributed to our present understanding of soils Initiated by discussions within the Soil Science Society of America and the International Union of Soil Sciences this book uniquely illustrates the significance of soils to our society It is planned for soils students for various scientific disciplines and for members of the public who show an increasing interest in soil This book allows us to answer the questions How do we know what we know about soils and How did one step or idea lead to the next one The chapters are written by an international group of authors each with special interests bound together by the central theme of soils and how we came to our present understanding of soils Each concentrate on soil knowledge in the western world and draw primarily on written accounts available in English and European languages Academics graduate students researchers and practitioners will gain new insights from these studies of how ideas in soil science and understanding of uses of soils developed Discusses tracing soils knowledge accumulated from Roman times first by soil users and after 1800s by scientists Offers ideas about how soils knowledge was influenced by the social context and by human needs Combines the history of ideas with scientific knowledge of soils Written by chapter authors who combine subject matter expertise with knowledge of practical soil uses and provide numerous references for further study of the relevant literature

Footprints in the Soil and Reflections on the Water Jean E. Oliverio, 1972-01-01 *Transforming the Appalachian Countryside* Ronald L.

Lewis, 2000-11-09 In 1880 ancient growth forest still covered two thirds of West Virginia but by the 1920s lumbermen had denuded the entire region Ronald Lewis explores the transformation in these mountain counties precipitated by deforestation As the only state that lies entirely within the Appalachian region West Virginia provides an ideal site for studying the broader social impact of deforestation in Appalachia the South and the eastern United States Most of West Virginia was still dominated by a backcountry economy when the industrial transition began In short order however railroads linked remote mountain settlements directly to national markets hauling away forest products and returning with manufactured goods and modern ideas Workers from the countryside and abroad swelled new mill towns and merchants ventured into the mountains to fulfill the needs of the growing population To protect their massive investments capitalists increasingly extended control over the state's legal and political systems Eventually though even ardent supporters of industrialization had reason to contemplate the consequences of unregulated exploitation Once the timber was gone the mills closed and the railroads pulled up their tracks leaving behind an environmental disaster and a new class of marginalized rural poor to confront the worst depression in American history *Catalog of Copyright Entries.
