This work examines the system of co ordination of national social security laws in the European Union from a gender perspective The central question that it raises concerns the level of social security protection enjoyed by women moving throughout the Union in cases of work interruption or marriage dissolution Women's social security protection has traditionally been based on two criteria namely economic activity and family marriage Work interruptions in particular for child rearing challenge the invocation of economic activity as an effective basis for social security rights Changing social and family conditions including the emergence of atypical relationships and increasing divorce rates challenge the criterion of family marriage Efforts have been made within the framework of the national systems of the Member States to address these challenges often unsuccessfully So how successful has the European system of co ordination the aim of which is to provide a sufficient level of protection to migrant workers and their families been in addressing these challenges The book contains comprehensive discussion of the phenomenon and legal institution of social security as well as a thorough analysis of the current state of European Community law concerning co ordination with a particular focus on gender It identifies several problematic areas where solutions must be worked out and action taken The book fills a gap in the legal literature on the social security field and will appeal to those with an interest in social security including academics policy makers and practitioners **Theory And Policies Of Mutual Benefit And Win-win Strategy, The: Research On Sustainable**

Flexible Regional Economic Integration in Africa Timothy Masiko, 2022-04-21

This book examines the relationship between flexible regional economic integration in the East African Community EAC through its application of

variable geometry and the establishment of the African Continental Free Trade Area AfCFTA as a continent wide form of integration It uses a historical political legal and economic analysis of the processes that led to the adoption of flexible regional integration in Africa with particular regard to the EAC This takes place in the inescapable context of pan Africanism showing how regional integration efforts in Africa are based on pan Africanist ideals and how an evolution of these ideals has led to an evolution in the goals of integration With growing awareness of the weaknesses and impracticality of consensus based decision making on a global level it makes the case for the pursuit of flexibility in multilateral trade drawing lessons from the experience of the AfCFTA and blocs in other regions This book is a historical evaluation of regional economic integration efforts in Africa and it follows the path of attempts to integrate the economies on the continent from colonial times to the birth of the AfCFTA While it is a study in law it relies heavily on politics economics and history to weave together a more complete theory of economic integration based on the African experience Flexible Regional Economic Integration in Africa was awarded the 2020 SIEL Hart Prize in International Economic Law

Market Rules Douglas Brown,2003 Federalism is about dividing and sharing government often in complex ways that involve some tasks being done jointly Are federal systems capable of effective joint policy making Is this possible in the fast moving context of globalization In Market Rules Douglas Brown examines these questions through a comparative study of Australia and Canada looking at recent major reforms to the economic union in the two federations and comparing them with the evolving European Union EU Brown argues that internal barriers to trade and competition in these countries were significant obstacles to competition in the global economy and

shows that the old market rules were rooted in longstanding political and regional compromises. He describes the process of detailed and difficult intergovernmental collaboration required for the EU and now Canada and Australia to produce new market rules. The resulting reforms created new regimes that provide deeper and broader national economic integration in Canada and Australia than in the EU. The new rules entrench neo liberal values retaining some room for diversity and flexibility for equity goals. Built on a careful analysis of the differences and similarities in political economy constitutional design, federal culture and history of intergovernmental relations in Canada and Australia, *Market Rules* provides fresh evidence that federal states can be strong and autonomous in the global society while underscoring the conditions for effective collaboration that make this sustainable. Rich in detail, broad in scope, *Market Rules* makes a significant contribution to knowledge about federalism and economic policy making in the era of globalization.
