Economics as Ideology and Experience Deepak Nayyar, 2020-04-28 This collection of essays collected and published in tribute to the economist Ashok Mitra is inevitably diverse given the wide range of interests of his professional friends and colleagues There is however one common thread that runs through the articles a shared belief that ideology and experience just as much as theory and policy are inseparable in economics

Hunt, 2016-07-08 Property and Prophets is a concise history of the rise and subsequent triumph of capitalism Focused primarily on England until 1800 and the United States since 1800 the book's economic history is interspersed with the history of ideas that evolved along with the capitalist system

The Expansion of Economics Shoshana Grossbard-Shechtman, Christopher K. Clague, 2016-07-08 Economics like most other social sciences is not a pure discipline Indeed it has been enhanced by the fact that there is so much overlap between it and the related fields of business industrial relations political science social psychology and sociology This book is the first attempt to explain how work in economics has influenced and benefited from a merging of economic analysis with the research practices of these related fields of study With contributions from leading economists from around the world it demonstrates how economics is leading the way toward a more unified social science

Understanding the Founding Alan Ray Gibson, 2007 Over the course of the last century scholars have furiously debated four questions concerning the Founders and their act of creation Were the Framers motivated by their economic interests How democratic was the Framers Constitution Should we interpret the Founding using philosophical or strictly historical approaches What traditions of political thought were most important to the Framers In Understanding the Founding The Crucial Questions Alan Gibson examines the preconceptions that scholars bring to these questions explores the deepest sources of scholars disagreements over them and suggests new and thoughtful lines of interpretation and inquiry Building on his previous work Interpreting the Founding which offers a synoptic overview of the competing perspectives that have informed modern scholarship on the Founders

The Politics of Location Andrew Kirby, 2015-12-14 This book originally published in 1982 begins with an examination of space and its role in the process of public provision and collective consumption Variations in provision are linked to the

Hunt, 2002-11-20 Property and Prophets is a concise history of the rise and subsequent triumph of capitalism Focused primarily on England until 1800 and the United States since 1800 the book's economic history is interspersed with the history of ideas that evolved along with the capitalist system

Teaching Geography 11-18: A Conceptual Approach Lambert, David, Morgan, John, 2010-01-01 This book provides a practical guide for students and practising teachers as to how concepts can form the basis of geography teaching This is particularly important at this time as the revised national curriculum for Geography which takes effect from September 2008 has greatly reduced the prescribed content to be covered and instead emphasises that geography is underpinned by a small number of key concepts that provide the building blocks for curriculum planning The new national curriculum for geography identifies 7 concepts Place Space Scale Interdependence Physical and human processes Environmental interaction and sustainable development and Cultural understanding and diversity and these areas are reflected in the book's table of contents This focus on concepts represents a significant shift in how geography is to be taught in schools yet there has been little extended discussion of what a concept led approach to teaching and learning would entail This book will provide geography teachers with a theoretically robust and practical approach to curriculum planning based on the concepts that underpin the subject

Strategies for the Digital Customer Experience Batat, Wided, 2022-05-06 This innovative book proposes a conceptual framework to integrate the ecological and tourism aspects of Protected Area regulation assisting decision makers to develop contextually effective laws and management plans that avoid over regulating or under regulating tourism given the areas ecological profiles

Geo-economics and Power Politics in the 21st Century Mikael Wigell, Sören Scholvin, Mika Aaltola, 2018-07-06 Starting from the key concept of geo economics this book investigates the new power politics and argues that the changing structural features of the contemporary international system are recasting the strategic imperatives of foreign policy practice States increasingly practice power politics by economic means Whether it is about Iran's nuclear programme or Russia's annexation of Crimea Western states prefer economic sanctions to military force Most rising powers have also become cunning agents of economic statecraft China for instance is using finance investment and trade as means to gain strategic influence and embed its global rise Yet the way states use economic power to pursue strategic aims remains an understudied topic in International Political Economy and International Relations The contributions to this volume assess geo economics as a form of power politics They show how power and security are no longer simply coupled to the physical control of territory by military means but also to commanding and manipulating the

economic binds that are decisive in today's globalised and highly interconnected world. Indeed, as the volume shows, the ability to wield economic power forms an essential means in the foreign policies of major powers. In so doing, the book challenges simplistic accounts of a return to traditional military-driven geopolitics while not succumbing to any unfounded idealism based on the supposedly stabilising effects of interdependence on international relations. As such, it advances our understanding of geo-economics as a strategic practice and as an innovative and timely analytical approach. This book will be of much interest to students of security studies, international political economy, foreign policy and International Relations in general.

East Asia's Dynamic Development Model and the Republic of Korea's Experiences Mary McNulty, Ho-Chul Lee, 2003. No region has been more dynamic in recent years than East Asia. Despite its successful economic development, evaluations of the East Asian development model have often been capricious, shifting from miracle to cronyism. How can we explain East Asia's ups and downs consistently? To respond to this challenge, it is necessary to study the progress of East Asian development and to trace the influence of Asian cultural values. This study mainly focuses on cultural aspects of economic progress and analyzes East Asia's philosophical and historical backgrounds to explain the dynamic process. East Asians believe that balance between opposite but complementary forces Yin and Yang will ensure social stability and progress. Through repeated rebalancing to maintain harmony, the society comes to maturity. In traditional East Asian societies, a balance was maintained between Confucianism Yang and Taoism Buddhism and other philosophies Yin. In modern societies, the challenge is to balance traditional systems Yang and Western-style capitalism Yin. This East Asian development model explains the Republic of Korea's rise, fall and recovery. Korea was a poor country until the early 1960s, during the time when spiritualism Yang dominated. From the 1960s through the 1980s, Korea achieved rapid growth by finding a new balance and moving toward materialism Yin from spiritualism Yang. But the failure to maintain a harmonious balance between cooperatism and collectivism Yang and individualism Yin led to major weaknesses in labor and financial markets that contributed significantly to the financial crisis in 1997. As Korea arrived at a new balance by instituting reform programs, the venture-oriented information and communication technology (ICT) industry blossomed and led to a rapid economic recovery. Since 2000, domestic financial scandals and political corruption have emerged as new social issues. Korea's next challenge is to find a new harmonization between moralism Yang and legalism Yin. This paper, a product of the Office of the Senior Vice President and Chief Economist, Development Economics, is part of a larger effort in the Bank to examine institutional and cultural foundations of development across regions and countries.

Huang,2013-10-29 The contributors provide a comparative analysis of the modern economic development of Japan and China that are often explained in frameworks of East Asian developmentalism varies of capitalism or world economic system and explore their broader significances for the rise and global expansion of modern economy Economics Melvin W.

Reder,1999 Since the 1930s economists have increasingly emphasized the scientific quantitative side of their field which has directed research to topics that can be elaborated through mathematical models Economist Melvin Reder argues that this ongoing historical shift has been the result of pressure from two directions from society s demand that expert advice be based on scientific findings and from economists themselves who have wanted to view their own profession as a science Economics The Culture of a Controversial Science describes the profession of economics as it has developed in response to these challenges *Economic Crisis and Policy Choice* Joan M. Nelson,1990-03 The acute economic pressures of the 1980s have forced virtually all of Latin America and Africa and some countries in Asia into painful austerity programs and difficult economic reforms Scholars have intensively analyzed the economics of this situation but they have given much less attention to the political forces involved In this volume a number of eminent contributors analyze the politics of adjustment in thirteen countries and nineteen governments drawing comparisons not only across the full set of cases but also within clusters selected to clarify specific issues Why do some governments respond promptly to signs of economic trouble while others muddle indecisively for years Why do some confine their response to temporary macroeconomic measures while others adopt broader even sweeping programs of reform What leads some countries to experiment with heterodox approaches while most however reluctantly pursue orthodox courses Why confronted with intense political protest have some governments persisted while others have altered or abandoned course The answers to these questions are political not economic and they are examined here by Thomas M Callaghy Stephan Haggard Miles Kahler Robert R Kauman Joan M Nelson and Barbara Stallings

Parliamentary Responsibility for Economic Transition in Central and Eastern Europe ,1996 **The Social Economy of Single Motherhood** Margaret Nelson,2014-06-03 Margaret Nelson investigates the lives of single working class mothers in this compelling and timely book Through personal interviews she uncovers the different challenges that mothers and their children face in small town America a place greatly changed over the past fifty years as factory work has dried up and national chains like Walmart have moved in **Experiences with Financial Liberalization** K. L. Gupta,2012-12-06

Experiences with Financial Liberalization provides a broad spectrum of policy experiences relating to financial liberalization around the globe since the 1960s There is a sizable body of theoretical and aggregative empirical literature in this area but there is little work documenting and analyzing the experiences of individual countries and or sets of countries This book is divided into four parts by geographical region Africa Asia and Latin America Central and Eastern Europe and the Middle East Aggregative econometric studies cannot substitute for country wide studies in allowing the researcher to draw lessons for the future and this volume adds to this relatively small body of literature The Economic Theory of the Leisure Class
