## **Economics Of Postal Service A Research Study Supported By Wik:**

The Economics of Postal Service Michael A. Crew, Paul R. Kleindorfer, 1992-10-31 Postal service has received considerably less attention in the economics literature than traditional public utilities. Postal service is facing some very important challenges arising out of the increasingly high tech nature of postal service, the entry of competition into the business, and new attitudes on the part of government to postal service. In the United Kingdom and Germany, the increased interest in privatization and recognition of the benefits of competition are likely to have an impact on postal service. These challenges mean that postal managers must learn new ways of doing business, not just in successfully introducing new hardware and in new internal operating procedures, but also in the development of new pricing and costing methodologies and in the introduction of new management information systems. In order to deal with these new developments, managers need a solid foundation in applied microeconomic theory as it relates to postal service. This book encompasses the theoretical foundation for postal policy, particularly with regard to pricing, service quality, and competitive issues.

**The Half-Life of Policy Rationales** Fred E. Foldvary, Daniel B. Klein, 2003-05-03 The Half Life of Policy Rationales argues that the appropriateness of policy depends on the state of technology and that the justifications for many public policies are dissolving as technology advances. As new detection and metering technologies are being developed for highways, parking, and auto emissions, and information becomes more accessible and user friendly, this volume argues that quality and safety are better handled by the private sector. As for public utilities, new means of producing and delivering electricity, water, postal, and telephone services dissolve the old natural monopolies. Rationales of the government. This volume includes essays on marine resources, lighthouses, highways, parking, auto emissions, consumer product safety, money and banking, medical licensing, electricity, water delivery, postal service, community governance, and endangered species. The editors have mobilized the hands-on knowledge of field experts to develop theories about technology and public policy. The Half Life of Policy Rationales will be of interest to readers in public

**Competition and Innovation in Postal Services** Michael A. Crew, Paul R. Kleindorfer, 2013-06-29 Any Channan of the British Post Office dwells in the shadow of Rowland Hill and if he were an honest man he probably from time to time while singing the praises of Rowland Hill as is his due thinks a silent thought of sympathy for his predecessor Colonel Maberly the head of the Post Office the Champion of established orthodoxy the leader of the Professionals who had to endure the irresistible force of Hill s arguments combined with his skills as a pamphleteer agitator and political propagandist My favorite passage of the book *Royal Mail* by Martin Daunton 1985 shows how much the Post Office of the day needed a Rowland Hill to challenge Colonel Maberly and all that he stood for I quote from a passage describing how the Colonel when he arrived at about 11 00 a m and while enjoying his breakfast listened to his private secretary reading the morning s correspondence Daunton records The Colonel still half engaged with his private correspondence would hear enough to make him keep up a rumring commentary of disparaging grunts Pooh stuff upon my soul etc
