

Community Change: Politics, Economy, Culture & Development - Essay Sample Essay

Introduction

A community is a group of people that possess common interests. Sometimes it bears some differences toward achieving its objectives or rather performing its routine duties to the society. Occasionally, change is inevitable, and each community must experience it in the process of either integration. Most common changes and issues within the communities include political power change and leadership, Economic and social-cultural activities, religious perspectives, and finally, development changes. It is through the change some community hiccups manifest themselves as there is a conflict of interest to define what is right for the community. The pay will, therefore, discuss community issues based on the prevailing changes that are roaming within my community, New Square, New York.

Leadership and Political Change

Concerning various changes, the structural development of leadership and political atmospheres are the core area that New Square, New York, have experienced. Leadership was initially organized in terms of the social groups that elected their leaders to manipulate and effectively influence the change within the community. Today elections are done within the constitutional structure that is monitored by the government to ensure that there is a fair and free election of the political leaders. Leaders, therefore, are democratically elected in the community and are given the power to make important decisions within the community. However, it is terrifying that most leaders within the community have developed some aspects of repossessing the legislative seat through non constituted means. The community had embraced authoritative leadership that was much oppressive to the subject. However, with the intrusion of the United Nations policies, leadership strategies have been changed, reducing unjust dealing of the community members. Generally, the development of the leadership has consistently created a good rapport with the community as the New Square village is now experiencing a new glow of democracy.

Hasidism practice often threatened the community; however, after some time, various lights have come to lead the community into development. Education has been the key approach that the current political leaders are using in ensuring that the community access the basic knowledge that is vital for the development and growth. The Hasidic community, my community, has also experienced some constraints in the process of changing leadership within the political context. Very few leaders have been able to address the issues that the community has gone through over decades. The community has severely experienced economic depression alongside other health issues that were induced by poor governance and leadership (Checkoway, 2009). Today, however, the community, through the assistance of the elite leaders, now has access to good health as well as economic development through education introduction and set up of other necessity programs in the village.

Economy Society Development Essays

Economy Society Development Essays:

A Collection of Essays on the Colonial Economy of N.S.W. Gordon Beckett, 2012 This series explains the many important aspects of the colonial Economy of N S W between 1788 and 1835 This present volume sets down over 14 essays on aspects of the colonial economy ranging from a short review of the Van Diemen s Land Company the second land grant coy in Australia the AAC being the first to a study of the writings of Professor Noel Butlin and the factors of economic growth in those important first 30 years of the colony and settlement in NSW Some notable essays include an understanding of the Macquarie years that set a standard for economic development that became hard to follow The many statutes enacted by Westminster Parliament in establishing the colony are examined as is the rise of the pastoralist and squatter in the colony These entire special features of the economy helped set up the economic drivers that created such a successful economy

An Essay on China's Development After the Demographic Golden Age Xueyuan Tian, 2023-03-17 This book mainly addresses China s current demographic situation and social people related policies It aims to solve the issues of demographic transition population aging population flow urbanization population quality etc China is the first large population country with the vast territory and the huge economic system It has many issues such as productivity and production relations superstructure and economic base and domestic and international relations in various fields and at all levels Hence China needs to come up with a set of overall strategies The author sorts out all of his works in recent years and performs his new academic achievements on demographic issues and social governing strategies This timely book offers new methods that impact advanced social development with real data

Economy/Society Bruce G. Carruthers, Sarah L. Babb, 2000 Economy Society provides an introduction to the ways in which economic exchanges are embedded in social relationships It offers insights into advertising consumer behaviour conflicts in the work place social inequality and other issues

Navigating History: Economy, Society, Knowledge, and Nature , 2018-12-24 In Navigating History Economy Society Knowledge and Nature the contributors present new research that touches on the core themes developed in Karel Davids s work The book reflects Davids s omnivorous character as a scholar Nevertheless there are common strands that run throughout the introduction and fourteen chapters gathered here Major themes include resources of knowledge cultures of learning and humans and their natural environment Together these fourteen essays provide a fascinating panorama of social economic and environmental history of the past millennium The book seeks to bring back the different levels of geographical scope fusing the local the national and the global Contributors are Ulbe Bosma Pepijn Brandon Jaap Bruijn Petra van Dam Victor Enthoven Sabine Go Marjolein t Hart Raoul De Kerf Jan Lucassen Karin Lurvink Joel Mokyr Marijn Molema Bert de Munck P l Nyiri Harm Pieters Matthias van Rossum Joost Schokkenbroek Jeroen Touwen Wybren Verstegen and Jan Luiten van Zanden

The Dynamics of Socio-Economic Development Adam Szirmai, 2005-01-20 Why are poor countries poor and rich countries rich How are wealth and poverty related to changes in nutrition health life expectancy education population growth

and politics This modern non technical 2005 introduction to development studies explores the dynamics of socio economic development and stagnation in developing countries Taking a quantitative and comparative approach to contemporary debates within their broader context Szirmai examines historical institutional demographic sociological political and cultural factors Key chapters focus on economic growth technological change industrialisation agricultural development and consider social dimensions such as population growth health and education Each chapter contains comparative statistics on trends from a sample of twenty nine developing countries This rich statistical database allows students to strengthen their understanding of comparative development experiences Assuming no prior knowledge of economics the book is suited for use in inter disciplinary development studies programmes as well as economics courses and will also interest practitioners pursuing careers in developing countries

Considerations on the Fundamental Principles of Pure Political

Economy Vilfredo Pareto,2007-05-07 Between May 1892 and October 1893 the Giornale degli Economisti published Vilfredo Pareto s Considerazioni sui principi fondamentali dell economia politica pura in five parts Viewed in its entirety the outcome is essentially a classic monograph on the fundamental issues in pure economic theory in the Lausanne tradition Pareto s work forms a document of major historical significance which to date has only been available to the relatively small number of international economists and historians of economics who read Italian This first English language edition is a significant landmark in the history of economics

Money and Banking in Jean-Baptiste Say's Economic Thought Gilles

Jacoud,2013-01-17 The aim of this work is to make available to English language readers a translation of Jean Baptiste Say s main texts on money and banking which were not at present accessible in English The work includes chapters from his books taking into account the variants between the different editions articles and hitherto unpublished manuscripts Comprehension of these different texts is facilitated by an introduction designed to place them in their context and by a chronological table giving the main events of Say s life and editorial activity in parallel with the main political economic and monetary events of the time

Modern Political Economics Yanis Varoufakis,Joseph Halevi,Nicholas J. Theocarakis,2012-03-29 Once in a while the world astonishes itself Anxious incredulity replaces intellectual torpor and a puzzled public strains its antennae in every possible direction desperately seeking explanations for the causes and nature of what just hit it 2008 was such a moment Not only did the financial system collapse and send the real economy into a tailspin but it also revealed the great gulf separating economics from a very real capitalism Modern Political Economics has a single aim To help readers make sense of how 2008 came about and what the post 2008 world has in store The book is divided into two parts The first part delves into every major economic theory from Aristotle to the present with a determination to discover clues of what went wrong in 2008 The main finding is that all economic theory is inherently flawed Any system of ideas whose purpose is to describe capitalism in mathematical or engineering terms leads to inevitable logical inconsistency an inherent error that stands between us and a decent grasp of capitalist reality The only scientific truth about capitalism is its radical indeterminacy a condition which

makes it impossible to use science's tools e.g. calculus and statistics to second guess it. The second part casts an attentive eye on the post war era on the breeding ground of the Crash of 2008. It distinguishes between two major post war phases: The Global Plan 1947-1971 and the Global Minotaur 1971-2008. This dynamic new book delves into every major economic theory and maps out meticulously the trajectory that global capitalism followed from post war almost centrally planned stability to designed disintegration in the 1970s to an intentional magnification of unsustainable imbalances in the 1980s and finally to the most spectacular privatisation of money in the 1990s and beyond. Modern Political Economics is essential reading for Economics students and anyone seeking a better understanding of the 2008 economic crash. Developmental Change Allan A. Spitz, 2014-07-15. Developmental change and the related problems of modernization have attracted the attention of scholars in many disciplines. In this bibliography derived and expanded from an earlier compilation by Mr Spitz and Edward Weidner the author orders and annotates nearly 2 500 articles appearing between 1945 and 1969 in 234 journals from 25 countries. Organized by subject and indexed by both author and journal the citations include studies of social problems, economic factors, political questions, public administration and international cooperation and assistance. Special emphasis has been given to new and little known sources. In addition a selected bibliography of monographs and book length studies dealing with the modernization of underdeveloped countries and areas is included in the volume. Revisiting Classical Economics Heinz Kurz, Neri Salvadori, 2014-08-07. The financial crisis and the economic crisis that followed triggered a crisis in the subject of economics as it is typically being taught today especially in macroeconomics and related fields. A renewed interest in earlier authors especially the classical economists from Adam Smith to David Ricardo and John Maynard Keynes developed. This book may also be seen as a response to this interest. What can we learn from the authors mentioned what we could not learn from the mainstream. This volume contains a selection of essays which deepens and widens the understanding of the classical approach to important problems such as value and distribution, growth and technical progress and exhaustible natural resources. It is the fourth collection in a row and reflects an on going discussion of the fecundity of the classical approach. A main topic of the essays is a comparison between the classical approaches with modern theory and thus an identification of what can be learned by elaborating on the ideas of Smith and Ricardo and Marx above and beyond and variously in contradiction to certain mainstream views. Since the work of Piero Sraffa spurred the revival of classical economic thought his contributions are dealt with in some detail. The attention then focuses on economic growth and the treatment of exhaustible resources within a classical framework of the analysis. **The Financialization Response to Economic Disequilibria** Noemi Levy, Etelberto Ortiz, 2016-06-24. Europe and Latin America's social and economic stagnation is a direct result of the unresolved phenomena of the financialization crisis that broke out in 2008 in developed countries. Editors Noemi Levy and Etelberto Ortiz analyze the limitations of economic growth and development under capitalist economic organizations where financial capital is dominant as well as explore alternative economic policies. International Economic

Regulation Jane Kelsey, 2018-01-18 This title was first published in 2002 Debates about the desirability feasibility and appropriate form of international economic regulation are now a heavily contested domain This selection of recently published essays reflects the diversity of perspectives that are shaping the scope and direction of the debates from legal formalism and law and economics to Third World legal theories and other critical perspectives *Journal of the Indian Economic Society* ... Indian Economic Society, 1919

Open Economics Richard Arena, Sheila Dow, Matthias Klaes, 2009-06-02 This book offers an up to date assessment of economics in relation to other disciplines combining the work of leading international scholars and rising young stars and presenting an historical introduction to the disciplinary context of economics **Keynes and Modern Economics** Ryuzo Kuroki, 2012-08-21 It is a little over seventy years since John Maynard Keynes produced his magnum opus *The General Theory of Employment Interest and Money* Keynes' staggering achievement has been to remain relevant to economics and other disciplines even today and this book reflects that with an examination on his influence on modern economics Leading economists from a variety of backgrounds including Ed Nell and Heinz Kurz have joined forces in this volume with internationally respected Japanese scholars to produce a strong collection of contributions to the debate on Keynes' monumental legacy This book will be vital reading for historians of economic thought economic methodologists as well as those economists with an interest in the overall development of their discipline

The Theory of Value and Distribution in Economics Pierangelo Garegnani, Paul Samuelson, 2012-08-21 This new volume explores two alternative economic theories the classical theory and the marginalist or neoclassical theory through a discussion between two eminent economists Pierangelo Garegnani and Paul Samuelson The key themes of the volume are the difference in approaches to the explanation of the distribution of income and relative prices and therefore different approaches to all other economic problems in particular capital accumulation and economic growth The book discusses whether there is a classical approach to the theory of value and distribution at the core of economic theory that is fundamentally different from the later marginalist or neoclassical theory In the volume the late Pierangelo Garegnani argues for the validity of Piero Sraffa's position on this issue whilst the late noble laureate Paul Samuelson vehemently contests it At a time of economic crisis the future of the discipline is far from certain and so it is extremely important to bring these debates back into the light by reproducing them together for the first time A comprehensive introduction by Heinz Kurz sets the debate in this context and provides crucial background to the arguments **Classical Economics and Modern Theory**

Heinz D. Kurz, Neri Salvadori, 2005-08-12 The well known economists Kurz and Salvadori cover original findings and new vistas on old problems including alternative interpretations of classical economics new growth theory Sraffian theory and Von Neumann and the treatment of capital **The Origins of David Hume's Economics** Willie Henderson, 2010-10-04 The

author argues that analysis of the arguments of the Hume's *Treatise* throws light on Hume's later economic political and historical work **Real Business Cycle Models in Economics** Warren Young, 2014-01-10 The purpose of this book is to

describe the intellectual process by which Real Business Cycle models were developed The approach taken focuses on the core elements in the development of RBC models i building blocks ii catalysts and iii meta syntheses This is done by detailed examination of all available unpublished variorum drafts of the key papers in the RBC story so as to determine the origins of the ideas The analysis of the process their discovery is then set out followed by explanations of the evolution and dissemination of the models from first generation papers through full blown research programs This is supplemented by interviews and correspondence with the individuals who were at the center of the development of RBC models such as Kydland Prescott Long Plosser King Lucas and Barro among others This book gets stright to the heart of the debates surrounding RBC models and as such contributes to a real assessment of their impact on modern macroeconomics The volume therefore will interest all scholars looking at macroeconomics as well as historians of economic thought more generally Marshall, Marshallians and Industrial Economics Tiziano Raffaelli,Tamotsu Nishizawa,Simon Cook,2011-03-28 This book focuses on both Marshall and the Marshallian tradition revisiting the 1920s and 1930s debates on business size external economies coordination and management costs including contributions from Roger Backhouse and Richard Arena
