The Divine Ecology Ian Mills,2004

Ecological Exile Derek Gladwin,2017-11-13 Ecological Exile explores how contemporary literature film and media culture confront ecological crises through perspectives of spatial justice a facet of social justice that looks at unjust circumstances as a phenomenon of space Growing instances of flooding population

displacement and pollution suggest an urgent need to re-examine the ways social and geographical spaces are perceived and valued in the twentieth and twenty-first centuries. Maintaining that ecological crises are largely socially produced, Derek Gladwin considers how British and Irish literary and visual texts by Ian McEwan, Sarah Gavron, Eavan Boland, John McGrath, and China Miéville, among others, respond to and confront various spatial injustices resulting from fossil fuel production and the effects of climate change. This ambitious book offers a new spatial perspective in the environmental humanities by focusing on what the philosopher Glenn Albrecht has termed *solastalgia*, a feeling of homesickness caused by environmental damage. The result of *solastalgia* is that people feel paradoxically ecologically exiled in the places they continue to live because of destructive environmental changes. Gladwin skilfully traces spatially produced instances of ecological injustice that literally and imaginatively abolish people's sense of place or place home. By looking at two of the most pressing social and environmental concerns, oil and climate, *Ecological Exile* shows how literary and visual texts have documented spatially unjust effects of *solastalgia*. This interdisciplinary book will appeal to students, scholars, and professionals studying literary, film, and media texts that draw on environment and sustainability, cultural geography, energy, cultures, climate change, and social justice.

An Annotated Bibliography for Taiwan Film Studies Jim Cheng, James Wicks, Sachie Noguchi, 2016-04-19
Compiled by two skilled librarians and a Taiwanese film and culture specialist, this volume is the first multilingual and most comprehensive bibliography of Taiwanese film scholarship designed to satisfy the broad interests of the modern researcher. The second book in a remarkable three-volume research project, *An Annotated Bibliography for Taiwan Film Studies*, catalogues the published and unpublished monographs, theses, manuscripts, and conference proceedings of Taiwanese film scholars from the 1950s to 2013. Paired with *An Annotated Bibliography for Chinese Film Studies* (2004), which accounts for texts dating back to the 1920s, this series brings together like no other reference the disparate voices of Chinese film scholarship, charting its unique intellectual arc. Organized intuitively, the volume begins with reference materials: bibliographies, cinematographies, directories, indexes, dictionaries, and handbooks, and then moves through film history, the colonial period, Taiwan dialect film, new Taiwan cinema, the 228 Incident, film genres (animated, anticommunist, documentary, ethnographic, martial arts, teen), film reviews, film theory and technique, interdisciplinary studies, Taiwan and mainland China, Taiwan and Japan, film and aboriginal peoples, film and literature, film and nationality, biographical materials, film stories, screenplays, and scripts, film technology, and miscellaneous aspects of Taiwanese film scholarship: artifacts, acts of censorship, copyright law, distribution channels, film festivals, and industry practice. Works written in multiple languages include transliteration, romanized, and original script entries, which follow universal AACR 2 and American cataloguing standards and professional notations by the editors to aid in the use of sources.

Religion, Space, and the Environment Sigurd Bergmann, 2014-02-04 Religions often nurture important skills that help believers locate themselves in the world Religious perceptions practices emotions and beliefs are closely interwoven with the environments from which they emerge Sigurd Bergmann s driving emphasis here is to explore religion not in relation to but as a part of the spatiality and movement within the environment from which it arises and is nurtured Religion Space and the Environment emerges from the author s experiences in different places and continents over the past decade At the book s heart lie the questions of how space place and religion amalgamate and how lived space and lived religion influence each other Bergmann explores how religion and the memory of our past impact our lives in urban spaces how the sacred geographies in Mayan and northeast Asian lands compare to modern eco spirituality and how human images and practices of moving in with and through the land are interwoven with the processes of

Life as Spirit Keith Ka-fu Chan, 2018-08-21 Paul Tillich is exceptional in modern theologians that his distinctive and abundant understanding of the concept of life and spirit

has the potential to engage with other disciplines such as biology psychology cosmology and social science and that his ontological understanding of life as spirit which is so crucial in the ecological consideration is so complex and subtle that enables powerful and critical inter religious dialogue in environmental ethics This book argues that despite the fact that Tillich did not engage in ecological and environmental theology directly his abundant personal experience of nature mysticism and intellectual understanding of the idea of nature rooted in his Lutheran and German idealist heritages and more importantly his ontological pneumatological holistic and multi dimensional conception of unifying and differentiated reality perfectly and organically coupled with the theonomous vision of theology of culture nature and morality is profoundly ecologically oriented

into action working with their hands as well as their hearts It also includes a new preface and revised chapter by Llewellyn Vaughan Lee that reference two major recent events the publication of Pope Francis s encyclical On Care for Our Common Home which brought into the mainstream the idea that the ecological crisis is essentially a spiritual problem and the 2015 Paris Climate Change Conference which saw representatives from nearly 200 countries come together to address global warming including faith leaders from many traditions And in Autumn 2021 we have issued a new edition with a new updated preface from editor Llewellyn Vaughan Lee who has also rewritten his chapter The Call of the Earth Bringing together voices from Buddhism Sufism Christianity and Native American traditions as well as from physics deep psychology and other environmental disciplines this book calls on us to reassess our underlying attitudes and beliefs about the Earth and wake up to our spiritual as well as physical responsibilities toward the planet It s hard to imagine finding a wiser group of humans than the authors represented here all of them both thinkers and do ers in the greatest battle humans have ever faced AN EPIC COLLECTION BILL MCKIBBEN founder 350 org Spiritual Ecology is a superb collection of thoughtful pieces by people who have gone deep to understand our relations with the Earth It comes at a crucial time for humanity BARRY LOPEZ landscape photographer and author Arctic Dreams winner National Book Award Of Wolves and Men Crossing Open Ground About This Life THIS BOOK PROVIDES FRESH THINKING about the spiritual approaches of consciously and consistently making the right choices each of us within our respective sphere of influence As the world works towards a new global climate agreement in 2015 it is in our interest and in the interest of future generations to reflect on how we can individually and collectively contribute to addressing climate change by making our economies and lifestyles more sustainable because solving climate change can help solve many of the issues the earth currently faces Climate change is therefore both a challenge and an opportunity I hope this book inspires and energizes many readers eager to rise to the greatest challenge ever to face humanity by realizing the transformative opportunities we have in front of us CHRISTIANA FIGUERES Former Executive Secretary of the United Nations Framework Convention on Climate Change UNFCCC

Ecological Politics John Rensenbrink, 2016-11-21 Rejection of politics is deep and widespread Even sincere and responsible individuals who practice it hold their nose while doing so Yet politics must be practiced and well if the planet and the people are to survive A clue for our future success as a species lies in the fact that ecology has never really been tried in politics Yet ecology holds the secret of success for planet and people precisely in politics Deep in ecology is the astounding fact scientifically examined and attested to that we are already related Though taught by elite after elite that we are separate from nature and thus from everyone and everything this can now be seen as the great mistake and a perpetuated lie from generation to generation A new ontology of being related is the gateway of consciousness to a new and exciting politics for survival and democracy Waves of transformation lap at barriers in the political sphere But they are repulsed by an entrenched politics rooted not only in the greed and power hunger of a dominant few or in outmoded structures of economic and political power but in the old millennial ontology of being separate Our extraordinary times call for a new political party animated by the ecology of being related It is a party of a different kind one that frees itself from giant worldwide corporations is fully and overtly dedicated to non violence and rooted in the awareness that the people come first This party knows that elections must be fair and equal and must enable undistorted dialogue and that people in government must not

only proclaim but practice the principle of being of for and by the people This book challenges The Green Party now on a footing in over 100 countries to be this party of a different kind
