Serendipitous and Strategic Innovation Shantha Liyanage,2005-12-30 Innovation is a time consuming process that involves invention as a beginning and a marketable service or product as an end But innovation itself once concluded is not necessarily a constructive act as some innovations yield positive and some negative results The way we recognize and develop innovation so often a serendipitous and almost invisible act in its beginning is thus a matter of primary importance in today s world where new thoughts and products play such a crucial role in economies across the globe Nowhere is the general support structure required for success in innovation more starkly illuminated than in the fields of science and medicine where human well being is so manifestly at stake In this work which draws together the perspectives of a multidisciplinary group of professionals medical doctors innovation policy analysts and academics in business management Shantha Liyanage and his colleagues provide a thorough examination of the technology innovation process and display its critical links with organizational functions so the innovative capacities of organizations can be better prepared to meet the rapid changes of our age

The Economics of Knowledge, Innovation and Systemic Technology Policy Francesco Crespi, Francesco Quatraro, 2015-05-15 There is wide consensus on the importance of knowledge for economic growth and local development patterns This book proposes a view of knowledge as a collective systemic and evolutionary process that enables agents and social systems to overcome the challenges of the limits to growth It brings together new conceptual and empirical contributions analysing the relationship between demand and supply factors and the rate and direction of technological change It also examines the different elements that compose innovation systems The Economics of Knowledge Innovation and Systemic Technology Policy provides the background for the development of an integrated framework for the analysis of systemic policy instruments and their mutual interaction the socio political and economic conditions of the surrounding environment These aspects have long been neglected in innovation policy as policymakers academics and the business community have mostly emphasized the benefits of supply side strategies However a better understanding of innovation policies grafted on a complexity based approach calls for the appreciation of the mutual interactions between both supply and demand aspects and it is likely to improve the actual design of policy measures This book will help readers to understand the foundations and working of demand driven innovation policies by stressing the importance of competent and smart demand Handbook on Alternative Theories of Innovation Godin, Benoît, Gaglio,

Gérald, Vinck, Dominique, 2021-10-12 This insightful Handbook scrutinizes alternative concepts and approaches to the dominant economic or industrial theories of innovation Providing an assessment of these alternatives it questions the absence of these neglected types of innovation and suggests diverse theories **Creativity and Innovation in Business and Beyond** Leon Mann, Janet Chan, 2011-02-01 In many modern economies creativity the essential prerequisite for innovation tends to be assumed or neglected while the catchphrase innovation dominates the field of business as the key to national performance and competitiveness Creativity and Innovation in Business and Beyond illustrates the ways in which creativity spurs innovation and innovation enables creativity not only in the realms of business and management where the innovation is regularly acknowledged and discussed but throughout the social sciences With contributions from experts in fields as far flung as policy history economics economic geography sociology law psychology social psychology and education in addition to business and management this volume explores the manifold avenues for creativity and innovation at many levels including nation region city institution organisation and team across a multitude of sectors and settings

providing a critical evaluation and relating it to the relevant literature Particular interest lies on the issues of steering opportunities and path formation capabilities by decentralized agents or governmental institutions from the viewpoint of evolutionary economics Comparative Approaches to Old and New Institutional Economics Akansel, Ilkben,2019-10-18 As today s world develops and evolves so does its economics New economic approaches have begun to emerge but traditional methods are still being implemented As both systems provide different solutions to society s economic issues thoughtful research and analysis is required regarding the tactics and strategies that both theories utilize Comparative Approaches to Old and New Institutional Economics is an essential reference source that discusses the sequential history of these two economic theories as well as their application to global fiscal disputes Featuring research on topics such as international relations business management and institutionalism this book is ideally designed for economists analysts managers researchers practitioners academicians and students seeking coverage on the parallel methods of these economic philosophies *Social Innovation* Carmen Ruiz Viñals,Carmen Parra Rodríguez,2013-08-21 Social innovation can be simply defined as the new ideas and initiatives that make it possible to meet our society s challenges in areas such as the environment education employment culture health and economic development It is currently becoming increasingly important as a central concept for social theories and politics This edited volume brings together interdisciplinary contributions which examine the complex interrelation between innovation and social problems a link which has been surprisingly underexplored in academia and practice thus far Social Innovation New Forms of Organisation in Knowledge Based Societies examines the mutual interdependence of innovation processes and social affairs This interdependent relationship is characterised by a high degree of complexity which stems on the one hand from the true uncertain character of innovation and on the other hand from the different time scales in both domains The alliance between innovation and social policy is highly relevant to the challenges which we are facing in the 21st century such as resource scarcity ageing societies and climate change All of these issues demand substantial continuous and sustainable structural change to maintain international competitiveness Social change can only be understood by improving our knowledge about the impact of innovation processes in their co evolutionary alliance with social evolution The purpose of this book is to increase awareness of social participation among civil society organisations SMEs governments and research institutions in order to promote economic political and social changes that enhance collective welfare This volume offers a key starting point for those looking to further explore this important realm of social research **The Economics of Social Innovation** Judith Terstriep,Dieter Rehfeld,2022-06-23 This book addresses the economics of social innovation a widely neglected topic in regional development The chapters in this edited volume cover distinct but complementary and related aspects concerning the existing gap between the hitherto unexploited potential of social innovation in relation to socio economic challenges that regions across Europe and globally face Research on social innovation has gained momentum over the last decade spurred

notably by the growing interest in social issues related to policy making public management and entrepreneurship in response to the grand challenges societies in Europe and worldwide face Accelerated by the normative turn in research and innovation policies towards missions social innovation is nowadays a central element on policy agendas from the urban and regional level to the national and subnational level of the European Commission and the OECD However for social innovations to unfold their full potential a better understanding of underlying mechanisms processes and impacts is necessary The first three chapters focus on framework conditions and characteristics of social innovation The following two chapters emphasise the determinants of social innovation and translocal empowerment In the last part attention is devoted to social innovation in specific fields such as health care and greening society and social innovations transformative potential The chapters in this book were originally published as a special issue of the journal European Planning Studies
