study of facts presented by a criminal act or pattern of criminal conduct. These facts are then used to identify, locate, and prove the guilt or innocence of a person or persons. Criminal investigation is usually carried out by a law enforcement agency using all of the resources available to discover, locate, or establish evidence, proving and verifying the relevant facts for presentation to a Court or other judicial authority. But how are these facts discovered? What resources do law enforcement use to uncover them? What is the process for a successful criminal investigation? In fact, how can we even define what is criminal in the first place? Daniel A. Reilly answers all these important questions while providing the step-by-step process to gather facts, information, data, and evidence. *Finding the Truth with Criminal Investigation* is intended to answer all of the questions of who, what, where, when, why, and how a violent crime occurred and/or was committed. It is intended for students in the field of criminal justice who wish to become criminal investigators, exposing them to the tools and processes needed to conduct a proper criminal investigation but also real life of working to support others as a team. Reilly spent a great deal of his professional life working on homicide cases and he offers students his expertise in criminal investigation by successfully incorporating real world context throughout this book.
