## **Economic Development In The Habsburg Monarchy And In The Successor States:**

**Economic Development in the Habsburg Monarchy and in the Successor States** John Komlos, 1990 *The Integration of the European Economy, 1850-1913* Lee A. Craig, Douglas Fisher, 2016-07-27 This volume documents the economic integration of the European national economies over the period 1850-1913. The authors concentrate on the macroeconomic aspects of this integration focusing on measures of aggregate output and monetary aggregates as they relate to policy concerns such as those surrounding the implementation of the gold standard as well as the possible interaction of nominal and real factors in both growth and cycles. They also date the European cycle and show a close coincidence across nations.

*The Habsburgs* Benjamin Curtis, 2013-07-18 The Habsburgs rank among the most celebrated ruling dynasties in history. At one point their territories stretched not only across Europe but across the globe into Asia, Africa, and the Americas. By virtue of their long pre-eminence, the family made an indelible mark on European affairs, shaping the course of international politics and diplomacy and knitting together the diverse peoples of Central Europe. The story of the Habsburgs is theatrical and compelling, but it is also vital for understanding how kings ruled, nations rose, and societies changed as modern Europe came into being. In this book, Benjamin Curtis explores both the Spanish and Austrian branches of the dynasty, providing a concise, comprehensive picture of the dynasty's development. This study clearly demonstrates why the Habsburgs are considered the most consistently accomplished practitioners of European dynasticism.

Themes in Modern European History 1780-1830 Pamela Pilbeam, 2012-08-21 *Themes in Modern European History 1780-1830* is an authoritative and lively exploration of a period dominated by events which have shaped modern Europe. In a series of articles, six leading academics present some controversial conclusions: the east-west contrast in Europe today has more to do with responses to the French Revolution of 1789 than the Russian Revolution of 1917; the conservative Europe of 1814 was the product of the Romantic imagination, not a Restoration of the old regime. Spanning political, social, economic, and demographic facets of revolutions, this is an indispensable textbook for all students of the nineteenth century and for all those interested in understanding the nature of Europe today.

*Austrian Reconstruction and the Collapse of Global Finance, 1921-1931* Nathan Marcus, 2018-04-30 Although some statesmen and historians have pinned Austria's and the world's interwar economic implosion on financial colonialism, in this corrective history Nathan Marcus deemphasizes the negative role of external players and points to the greater impact of domestic malfeasance and predatory speculation on Austrian political and financial decline.

**A History of Czechoslovakia Between the Wars** Patrick Crowhurst, 2015-06-22 Here Patrick Crowhurst identifies the crucial political problem that faced Czechoslovakia between 1918 and 1939: the rift between the Czechs and the Sudeten Germans that would open the way for the rise of Konrad Henlein's right-wing Sudeten Deutsch party and which was exploited ruthlessly by Hitler during Nazi Germany's 1938 annexation of Czechoslovakia. *A History of Czechoslovakia Between the Wars* deepens our understanding of a fragile Europe before World War II and is essential for

students and scholars of 20th century history      *Handbook of Economic Nationalism* Pickel, Andreas, 2022-10-13 This cutting edge Handbook puts economic nationalism in its historical context from early industrialization to globalization It explores how economic nationalism has emerged to new prominence in the post globalization era as states are trying to protect their economies societies and cultures from unwanted external influences      *Economic Transformations in East and Central Europe* David F. Good, 1994-09-22 This book provides an invaluable guide to understanding the current problems of this volatile region demonstrating that the area s economic history over the last century has vital legacies for its economic future      **Foreign Direct Investment and Regional Development in East Central Europe and the Former Soviet Union** David Turnock, 2017-11-28 With the achievement of further EU and NATO enlargement a critical political and economic lens is now focused on East Central Europe and to a lesser extent the other former communist states Economic growth in each transition state and more broadly the region pivots around the prospects for foreign direct investment FDI with decisions on where foreign investors will locate their projects now vitally important This book the first one devoted to a geographical survey concentrating specifically on FDI in the region brings together a wide range of prominent authors from the US and Europe including the late Frank Carter to provide a timely and critical examination of the importance of foreign investment It presents a detailed analysis of location patterns and their significance for regional development with particular emphasis given to the important socioeconomic and political consequences of uneven distribution of FDI across the region and its constituent countries Divided into two parts the book first deals with general overarching themes and issues before applying these to more specific country case studies The second part deals with regional studies focusing broadly on the Western Balkans and Bulgaria before looking at specific economic sectors in individual countries      *The Collapse of Imperial Power: The Fall of the Habsburg Empire* Pasquale De Marco, 2025-07-20 The Habsburg Empire was one of the most powerful and influential empires in European history It spanned centuries and encompassed a vast and diverse territory stretching from Central Europe to the Balkans and beyond The Habsburg Empire was a complex and fascinating entity and its history is filled with both triumphs and tragedies This book tells the story of the Habsburg Empire from its rise to its fall It examines the political diplomatic economic and social factors that shaped the empire s history It also discusses the Habsburg Empire s impact on the world both during its existence and after its collapse The Habsburg Empire was founded in the 13th century by Rudolf I of Habsburg Over the next several centuries the Habsburgs gradually expanded their territory through a combination of inheritance marriage and conquest By the 16th century the Habsburg Empire was one of the largest and most powerful empires in Europe The Habsburg Empire reached its peak in the 17th and 18th centuries During this time the Habsburgs ruled over a vast and diverse empire that included Austria Hungary Bohemia Croatia Transylvania and many other territories The Habsburg Empire was a major player in European politics and culture and its influence was felt far beyond its borders However the Habsburg Empire began to decline in the 19th century The empire faced a number of

challenges including the rise of nationalism economic problems and military defeats The Habsburg Empire also struggled to adapt to the changing political and economic landscape of Europe In 1918 the Habsburg Empire collapsed at the end of the First World War The empire was divided into a number of successor states including Austria Hungary Czechoslovakia and Yugoslavia The collapse of the Habsburg Empire had a profound impact on Europe and it helped to shape the political and economic landscape of the continent in the 20th century This book is a comprehensive overview of the Habsburg Empire s history It is written in an engaging and accessible style and it is sure to appeal to anyone interested in European history If you like this book write a review *Building Civil Society and Democracy in New Europe* Sven Eliaeson,2009-03-26 The European enlargement process culminating in 2004 was as a follow up to die Wende and the implosion of the Russian empire an event of the same magnitude as 1815 and 1919 Like 1918 19 it was an exit into history a momentous event in post Westphalian Europe Even if acceptance of ten new countries was premature it was appropriate to the moment history provided The presence of the New kids on the block meant both problems and prospects The end of the cold war meant the fall of the iron curtain but a mental remnant of the curtain remains in terms of attitudes regarding civility corruption and transparency and expectations for democratic politics Several of the new countries are late children of 1848 For them entering NATO was more important than joining the EU and also preceded EU membership Poland is bigger than the other 2004 countries together and has a heavy historical legacy It is as Germany used to be imprinted by its special path between East and West and fear of being encircled by enemies Although the Building of Civil Society and Democracy in countries in transformation can draw on experiences from the countries already within the EU there is no primrose path for EU integration It is moreover an irony that the new member states as a result of the expectations for post Communist politics build institutions of a kind that are no longer sufficiently efficient for old Europe The new countries became a full scale experiment in rule by experts now by neo liberals instead of Communists A common European public sphere and civil society might emerge but its form remains visible only at the horizon Industrialization in the Modern World John Hinshaw,Peter N. Stearns,2013-11-12 This unique two volume work analyzes the Industrial Revolution from a global perspective and traces its influences up to the present day encouraging students to rethink the significance of events past and present By taking a fresh approach to its topic Industrialization in the Modern World From the Industrial Revolution to the Internet enables students to see this ongoing phenomenon not as a standalone event but as a catalyst for the formation of today s globalized industrializing world Spanning the period from 1750 to the present the work offers some 450 entries that cover developments in Africa and Asia as well as in Europe and the United States Numerous essays are organized around specific questions or problems others examine significant events countries or industries The work deals with all the major aspects of traditional industrialization textiles coal steel as well as modern variations China computers the Internet With a targeted approach the authors will help students see how industrialization in one society influenced another how industrialization

spread throughout the world and the causes and effects of each country's individual revolution      *Washington Conference on Holocaust-era Assets, November 30-December 3, 1998* J. D. Bindenagel, United States. Department of State, United States Holocaust Memorial Museum, 1999

**Business and Politics in Europe, 1900-1970** Terry Gourvish, 2003-08-28 This book reflects an increased interest in establishing connections between the political history and the business history of Europe in the twentieth century The book includes research on the interactions of politicians businessmen and their institutions in eight countries with particular focus on the highly charged inter war period Fourteen essays cover subjects under four main headings the business politics paradigm banking finance business and politics in the National Socialist period and the business community and the state Together they form a fitting tribute to the academic scholarship and inspiration offered by Alice Teichova In her distinguished career and in particular after the publication of her path breaking book *An Economic Background to Munich* in 1974 she did much to stimulate a collaborative approach to international comparative work in the field of economic political and business history The case studies presented here demonstrate her considerable legacy to the subject

*Finance and Modernization* Gerald D. Feldman, 2016-12-05 Finance and Modernization centres on a set of historical developments and problems typified by the long history of the österreichische Creditanstalt and its successor organizations and opens the way to compare and contrast experiences throughout Central and Western Europe and also on other continents The structure of this volume reflects the changing role and nature of banks as economies become industrialized and modernized Although banks adapt to the needs of an industrializing economy at the same time industrialization influences the manner in which banking systems grow and the structures which they adopt Beginning with studies of the Austrian banks their development and their crises the volume then moves on to look at case studies of important aspects of financial activity German stock markets railroad investment and information networks This is followed by a section on country studies of banking modernization in Sweden the Netherlands and Greece Finally the collection concludes with two chapters one on banking in China and the other on banking in India certainly both of intrinsic interest and of importance in an era of globalization Professor Teichova one of the great scholars in the field concludes with reflections on the individual contributions and the general problems addressed in this book

*National Purpose in the World Economy* Rawi Abdelal, 2018-08-06 How do national identities affect the world economy Building on the insight that nationalisms and national identities endow economic policy with social purpose Rawi Abdelal proposes a novel theoretical framework a distinctively Nationalist perspective on international political economy to answer this question Using this framework and drawing on field research in Lithuania Ukraine and Belarus he provides an in depth look at the link between national identity and the economic policies of the new states formed by the breakup of the Soviet Union All these states from the Baltic coast to central Asia were economically dependent on Russia during the 1990s However they reacted very differently to that dependence and their reactions can be traced Abdelal contends to their individual societies Some such as

Belarus found dependence inevitable and sought economic reintegration with Russia Others like Lithuania interpreted dependence as a large scale security threat and reoriented their economies away from Russia A third group typified by Ukraine demonstrated no coherent economic policy at all regarding dependence Abdelal distinguishes the Nationalist tradition in international political economy from the Realist tradition and shows that economic nationalism is different than mercantilism He demonstrates the ways that national identity affects economic policy and explains why some governments seek economic autonomy while others prefer regional reintegration He then applies his approach to other cases of economic reorganization after the end of empire eastern Europe in the 1920s after the Habsburgs 1950s Indonesia and French West Africa in the 1960s

**Communism and Nationalism** Roman Szporluk, 1988-04-28 In this highly original study Roman Szporluk examines the relationship between the two dominant ideologies of the 19th century communism and nationalism and their enduring legacy in the 20th century Szporluk argues that both Karl Marx's theory of communism and Friedrich List's theory of nationalism arose in response to the sweeping changes brought about by the Industrial Revolution and that both sought to promote industrialization as a means of reforming the modern world Each ideology the author contends developed in relation to the other and can best be understood as the product of a complex interweaving of the two producing in the 20th century new forms of nationalism that have incorporated Marxism into the fabric of their movement and Marxist states that have adopted threads of nationalistic belief Casting the role of List and the intellectual development of Marx in an unorthodox light this book adds a new dimension to the debate over the boundaries of nationalism and socialism in the development of political ideologies

**Beyond Alterity** Qinna Shen, Martin Rosenstock, 2014-07-01 With the economic and political rise of East Asia in the second half of the twentieth century many Western countries have re-evaluated their links to their Eastern counterparts Thus in recent years Asian German Studies has emerged as a promising branch within interdisciplinary German Studies This collection of essays examines German language cultural production pertaining to modern China and Japan and explicitly challenges orientalist notions by proposing a conception of East and West not as opposites but as complementary elements of global culture thereby urging a move beyond national paradigms in cultural studies Essays focus on the mid-century German Japanese alliance Chinese German Leftist collaborations global capitalism travel identity and cultural hybridity The authors include historians and scholars of film and literature and employ a wide array of approaches from postcolonial globalization media and gender studies The collection sheds new light on a complex and ambivalent set of international relationships while also testifying to the potential of Asian German Studies

**The Politics of Ethnic Survival** Gary B. Cohen, 2006 This book examines how one of Imperial Austria's principal ethnic conflicts that between Czechs and Germans developed in one of the major cities during the era of industrialization and urban growth It shows how the inhabitants of Prague the capital of Bohemia constructed and articulated ethnic group loyalties and social solidarities over the course of the nineteenth century

The German speaking inhabitants of the Bohemian capital developed a group identification and defined themselves as a minority as they dealt with growing Czech political and economic strength in the city and with their own sharp numerical decline in the 1910 census only seven percent of the metropolitan population claimed that they spoke primarily German The study uses census returns extensive police and bureaucratic records newspaper accounts and memoirs on local social and political life to show how the German minority and the Czech majority developed demographically and economically in relation to each other and created separate social and political lives for their group members The study carefully traces the roles of occupation class religion and political ideology in the formation of German group loyalties and social solidarities The social relations which bound together the members of the German speaking minority and the social boundaries which separated them from the Czech majority at the end of the nineteenth century proved to be selective and considerable contact went on across the lines in many facets of individuals everyday life As the German minority developed a shared group life what came to define them and to separate them from the Czech majority was a shared Austro German ethnic and national loyalty an Austro German national liberal ideology the defense of common middle class and lower middle class social and political interests and a shared German public life Both German speaking Catholics and Jews could share in the sense of German community and group solidarity provided they upheld middle class liberal values The bonds of community for the middle class and lower middle class Germans in Prague established in the 1860s tended to exclude German speaking wage laborers and lower middle class radical nationalists who might challenge liberal national values Despite all the efforts to strengthen German community solidarity and combat assimilation of German speakers with the Czech majority from the 1880s to after 1900 the organized German community could do little to prevent the absorption of working class German speakers into the Czech population of the industrial districts
