Extending Magic Beyond Credibility:

Extending Magic Beyond Credibility John Nicholls Booth, 2001 Covering Extended Reality Technologies in the Media Emma Kaylee Graves, 2023-12-28 This book presents a study of the news coverage of extended reality technologies virtual augmented and mixed reality or XR and how this news corresponds with the marketing of XR products Focusing on a group of recently emerging technological products the book offers in depth analysis of the news coverage of XR technologies and explores the overlap between news discourse and promotional discourse by comparing the way these products are framed in the news and their marketing materials Using both quantitative and qualitative data it discusses the topics covered in XR news as well as the sources used and the specific framing techniques that appear in both XR news and marketing materials In addition to these findings it also provides a set of frame categories that can be used by other researchers analysing the media coverage of emerging technologies Ultimately arguing that the news represents XR in such a way that treats readers as consumers instead of citizens prioritising the interests of XR companies rather than news audiences this book will be of interest to students and researchers in media and communications discourse studies journalism PR and marketing and innovation studies as well as XR practitioners

Magical Epistemologies Anannya Dasgupta, 2021-07-22 This book began with a simple question when readers such as us encounter the term magic or figures of magicians in early modern texts dramatic or otherwise how do we read them In the twenty first century we have recourse to an array of genres and vocabulary from magical realism to fantasy fiction that does not however work to read a historical figure like John Dee or a fictional one he inspired in Shakespeare s Prospero Between longings to transcend human limitation and the actual work of producing translating and organizing knowledge figures such as Dee invite us to re examine our ways of reading magic only as metaphor If not metaphor then what else As we parse the term magic it reveals a rich context of use

that connects various aspects of social cultural religious economic legal and medical lives of the early moderns Magic makes its presence felt not only as a forms of knowledge but in methods of knowing in the Renaissance The arc of dramatists and texts that this book draws between Doctor Faustus The Tempest The Alchemist and Comus A Masque at Ludlow Castle offers a sustained examination of the epistemologies of magic in the context of early modern knowledge formation Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

Who's Who in the West Marquis Who's Who,2006-06 *Witchcraft and Folk Belief in the Age of Enlightenment* Lizanne Henderson,2016-04-08 Taking an interdisciplinary perspective Witchcraft and Folk Belief in the Age of Enlightenment represents the first in depth investigation of Scottish witchcraft and witch belief post 1662 the period of supposed decline of such beliefs an age which has been referred to as the long eighteenth century coinciding with the Scottish Enlightenment The late seventeenth and early eighteenth centuries were undoubtedly a period of transition and redefinition of what constituted the supernatural at the interface between folk belief and the philosophies of the learned For the latter the eradication of such beliefs equated with progress and civilization but for others such as the devout witch belief was a matter of faith such that fear and dread of witches and their craft lasted well beyond the era of the major witch hunts This study seeks to illuminate the distinctiveness of the Scottish experience to assess the impact of enlightenment thought upon witch belief and to understand how these beliefs operated across all levels of Scottish society

Magic's Translations Margaret J. Wiener,2025-04-04 Do you believe in magic This familiar question suggests magic is easily recognized but unreal In Magic's Translations Margaret J Wiener argues that such views are shaped by historical power struggles especially in Europe's relations with the wider world Focusing on nineteenth and twentieth century Dutch interactions with Indonesians Wiener reveals how colonial agents framed unfamiliar practices practitioners and objects as magic rendering distinct phenomena fundamentally alike and advancing colonizing projects that deemed magic antithetical to reason and reality While colonial authorities including ethnologists mobilized the concept of magic to differentiate Europeans from Indonesians nature from culture reason from superstition and fact from fetish their efforts produced unexpected outcomes Some Indonesian artifacts and acts not only retained their power but invaded European experiences As anthropologists were among the key translators of magic throughout the world Wiener intersperses accounts of magic's translations in the Indies with reflections on anthropology's ongoing engagement with the concept She demonstrates that magic became an object of expert knowledge political control and popular fascination rather than a self evident category or relic of naïve belief

Durkheim and the Birth of Economic Sociology Philippe Steiner, 2024-05-14 An illuminating account of the development of Durkheim s economic sociology mile Durkheim s work has traditionally been viewed as a part of sociology removed from economics Rectifying this perception Durkheim and the Birth of Economic Sociology is the first book to provide an in depth look at the contributions made to economic sociology by Durkheim and his followers Philippe Steiner demonstrates the relevance of economic factors to sociology and shows how the Durkheimians inform today s economic

systems Steiner argues that there are two stages in Durkheim's approach to the economy a sociological critique of political economy and a sociology of economic knowledge In his early works Durkheim critiques economists and their categories and tries to analyze the division of labor from a social rather than economic perspective From the mid 1890s onward Durkheim's preoccupations shifted to questions of religion and the sociology of knowledge Durkheim's disciples such as Maurice Halbwachs and François Simiand synthesized and elaborated on Durkheim's first stage arguments while his ideas on religion and the economy were taken up by Marcel Mauss Steiner indicates that the ways in which the Durkheimians rooted the sociology of economic knowledge in the educational system allows for an invaluable perspective on the role of economics in modern society similar to the perspective offered by Max Weber's work Recognizing the power of the Durkheimian approach Durkheim and the Birth of Economic Sociology assesses the effect of this important thinker and his successors on one of the most active fields in contemporary sociology *History of Medicine* Alexander Wilder,1904 **Creating Marketing**
