Disability and the Environment in American Literature Matthew J. C. Cella, 2016-10-12 This book includes a collection of essays that explore the relationship between Disability Studies and literary ecocriticism particularly as this relationship plays out in American literature and culture The contributors to this collection operate from the premise that there is much to be gained for both fields by putting them in conversation and they do so in a variety of ways In this manner the collection contributes to what Joni Adamson and Scott Slovic have referred to as a third wave of ecocriticism Adamson and Slovic attribute the rise of this third wave to the richly diverse contributions to ecocriticism over the past decade by scholars intent on including postmodernism ecofeminism transnationalism globalization and postcolonialism into ecocritical discussions The essays in *Toward an Ecosomatic Paradigm* extend this approach of this third wave by analyzing disability from an environmental point of view while simultaneously examining the environmental imagination from a disability studies perspective More specifically the goal of the collection is to investigate the role that literary narratives play in fostering the ecosomatic paradigm As a theoretical framework the ecosomatic paradigm underscores the dynamic and inter relational process wherein human mind bodies interact with the places both built and wild

they inhabit That is the ecosomatic paradigm proceeds from the assumption that nature and culture are meshed in an ongoing and deep relationship that has implications for both the human subject and the natural world An ecosomatic approach highlights the profound overlap between embodiment and emplacement and is therefore enriched by both disability studies and ecocritical insight By drawing on points of confluence between disability studies and ecological criticism the various ecosomatic readings in this collection challenge normative even ableist constructions of the body environment dyad by complicating and expanding our understanding of this relationship as it is represented in American literature and culture Collectively the essays in this book augment the American environmental imagination by highlighting the relationship between disability and the environment as reflected in American literary texts across multiple periods and genres

the nineteenth and early twentieth century Prosthetic Body Parts in Nineteenth Century Literature and Culture shows how depictions of prostheses complicated the contemporary bodily status quo which increasingly demanded an appearance of physical wholeness Revealing how representations of the prostheticized body were inflected significantly by factors such as social class gender and age Prosthetic Body Parts in Nineteenth Century Literature and Culture argues that nineteenth century prosthesis narratives though presented in a predominantly ableist and sometimes disablist manner challenged the dominance of physical completeness as they questioned the logic of prostheticization or presented non normative subjects in threateningly powerful ways Considering texts by authors including Charles Dickens Edgar Allan Poe and Arthur Conan Doyle alongside various cultural medical and commercial materials this book provides an important reappraisal of historical attitudes to not only prostheses but also concepts of physical normalcy and difference
