### **Lone Wolf Terror and the Rise of Leaderless Resistance**

George Michael, 2012-09-15 On July 22 2011 Anders Behring Breivik detonated a car bomb in downtown Oslo Norway He didn't stop there traveling several hours from the city to ambush a youth camp while the rest of Norway was distracted by his earlier attack That's where the facts end But what motivated him Did he have help staging the attacks The evidence suggests a startling truth that this was the work of one man pursuing a mission he was convinced was just If Breivik did indeed act alone he wouldn't be the first Timothy McVeigh bombed a federal building in Oklahoma City based essentially on his own motivations Eric Robert Rudolph embarked on a campaign of terror over several years including the Centennial Park bombing at the 1996 Olympics Ted Kaczynski was revealed to be the Unabomber that same year And these are only the most notable examples As George Michael demonstrates in *Lone Wolf Terror and the Rise of Leaderless Resistance* they are not isolated cases Rather they represent the new way warfare will be conducted in the twenty first century *Lone Wolf Terror* investigates the motivations of numerous political and ideological elements such as right wing individuals ecoextremists foreign jihadists and even quasi governmental entities In all these cases those carrying out destructive acts operate as lone wolves and small cells with little or no connection to formal organizations Ultimately Michael suggests that leaderless resistance has become the most common tactical approach of political terrorists in the West and elsewhere

*Radical Islam and International Security* Efraim Inbar, Hillel Frisch, 2007-12-12 Radical Islam poses a political challenge in the modern world which is like that of no other radical religious movement Ideologically it is perceived by Western policy makers as threatening the liberal democratic ideology by which most states in the West abide and which most other states rhetorically espouse This book serves as a welcome addition to the intellectual and policy debate on the nature of the radical Islam phenomenon and how to respond to it The collection is divided into three parts the first part seeks to understand the Islamic challenge in broad comparative and historical terms while the second part deals with specific regional case studies which

seek to identify patterns of uniformity and variation in radical Islam across a wide swath of terrain The third part is policy oriented suggesting possible responses to the Islamic challenge The contributors include distinguished researchers from Europe North America and the Middle East This book will be of much interest to students of Islamism political violence international security and Middle Eastern politics *The 9/11 Encyclopedia* Stephen E. Atkins, 2011-06-02 This work offers a sweeping collection of A Z entries and primary source documents that presents a thorough examination of all the individuals groups and events surrounding the 9 11 terrorist attacks Commemorating the 10th anniversary of the attacks on the World Trade Center and Pentagon The 9 11 Encyclopedia Second Edition offers valuable perspective on this emotionally charged and multidimensional subject This comprehensive two volume encyclopedia details the events leading up to the attacks going back a decade prior to 9 11 and covers all the major players involved It also examines events and discoveries since 2001 that have influenced our understanding of and reactions to the world changing attacks In the second edition dozens of entries have been updated and many new ones added The documents volume has been expanded as well With more than 170 A Z entries dozens of descriptive sidebars and over 55 primary source documents this updated encyclopedia is an essential source for comprehending one of the darkest moments in American history **The Secrets of the Koran** Don

Richardson, 2008-06-23 Forget all those evening news sound bites or diplomatically correct half truths about the Koran and the religion of Islam If you want to know what the Koran is really about you have to know what it really says Don Richardson gives you a nitty gritty inside look at the Koran helping to separate fact from fiction These hard hitting observations are not the author s opinion based on what he thinks the Koran seems to imply Muslim boys are indoctrinated in military camps Madrasa schools force memorization and repetition of the Koran particularly those verses that promise heavenly rewards for martyrdom It took courage to write this serious documented and well sourced book But the price of truth is courage regardless of ones religion **Understanding and Addressing Suicide Attacks** David Cook, Olivia Allison, 2007-05-30

During the past several years Americans have witnessed the frequent occurrence of suicide attacks by radical Muslim groups The public has wondered what drives someone to kill himself specifically in order to wreak havoc and destruction While other works address the subject many entirely ignore the ideological religious and cultural appeal of suicide attacks and none can adequately speak to why certain groups choose to use suicide as a weapon while others do not Beginning with a careful consideration of the religious and historical reasons and the justifications that perpetrators find therein for suicide operations the authors reveal how radical groups have co opted various aspects of their faith to provide fuel for their current activities Established policy makers seem helpless to confront this destructive terrorist activity often implying that countermeasures are ineffective and seeming to say we will just have to wait out the phenomenon Even such a well documented policy report as the 9 11 Commission s report failed to address the root of suicide attacks only critiquing technical aspects of the U S security system Focusing on specific attacks their roots their perpetrators and their outcomes

the authors are able to shed light on this resurgence of radical religious forces that encourage the use of such tactics and to propose new initiatives and approaches to handling such attacks before and after they occur
