Eyewitness Building Eyewitness:

Eyewitness Testimony Elizabeth F. Loftus, 1996 Every year hundreds of defendants are convicted on little more than the say so of a fellow citizen Although psychologists have suspected for decades that an eyewitness can be highly unreliable new evidence leaves no doubt that juries vastly overestimate the credibility of eyewitness accounts It is a problem that the courts have yet to solve or face squarely In *Eyewitness Testimony* Elizabeth Loftus makes the psychological case against the eyewitness Beginning with the basics of eyewitness fallibility such as poor viewing conditions brief exposure and stress Loftus moves to more subtle factors such as expectations biases and personal stereotypes all of which can intervene to create erroneous reports Loftus also shows that eyewitness memory is chronically inaccurate in surprising ways An ingenious series of experiments reveals that memory can be radically altered by the way an eyewitness is questioned after the fact New memories can be implanted and old ones unconsciously altered under interrogation These results have important implications for court reform police interrogation methods defense strategy and many other aspects of criminal and civil procedure *Eyewitness Testimony* is a powerful book that should be required reading for trial lawyers social psychologists and anyone who considers the chilling prospect of confronting an eyewitness accusation in a court of law **DK Eyewitness**

Journalism and Eyewitness Images Mette Mortensen, 2014-12-17 Building on the vast research conducted on war and media since the 1970s scholars are now studying the digital transformation of the production of news Little scholarly attention has been paid however to non professional eyewitness visuals even though this genre holds a still greater bearing on the way conflicts are fought communicated and covered by the news media This volume examines the power of new technologies for creating and disseminating images in relation to conflicts Mortensen presents a theoretical framework and uses case studies to investigate the impact of non professional images with regard to essential issues in today's media landscape including new media technologies and democratic change the political mobilization and censorship of images the ethics of spectatorship and the shifting role of the mainstream news media in the digital age

Eyewitness to Genocide Michael Bryant, 2014-05-15 In the 1950s the policy of the West German law courts was to limit the number of Germans who could be prosecuted for crimes against humanity during the Nazi era thereby preserving the old state elites who had been accomplices to the Nazi regime among them the judiciary 90% of whom had been Nazi party members The number of Nazi criminals prosecuted in West Germany dropped throughout the 1950s The Einsatzgruppen trial at Ulm in 1958 showed that many Nazi criminals held positions in the Federal Republic's administration An investigation of the Nazi death camps was initiated by the Ludwigsburg Office in 1959 Focuses on three trials against former staff members of three camps the Be'ec trial held in M'unchen in 1963-64 the Treblinka trial held in D'sseldorf in 1964-65 and the Sobib'or trial in Hagen in 1964-65 Contends that despite their sometimes doubtful past the trial judges acted in good faith within the bounds of West German law The prosecutors based their cases on eyewitness testimonies The Be'ec trial proved to be a debacle all of the defendants but one were acquitted primarily because only one survivor was found to testify In Treblinka and Sobib'or successful uprisings of prisoners in 1943 helped many of them to survive and later to give evidence at the respective trials at these trials most of the defendants were convicted

The Mindful Interview Method Gil

Zamora, 2023-07-19 The Mindful Interview Method Retrieving Cognitive Evidence provides investigators with a proven methodology to gather authentic reliable information from eyewitnesses to help identify potential suspects The book offers police and non law enforcement readers step by step techniques to improve gathering reliable evidence through a mindful interview process The author also provides an assessment component that can measure the reliability of previous interviews performed and further help to improve the interview process the skills of the investigator and thus the reliability of cognitive evidence gathered from future interviews It is notable that there is minimal to no instruction or training currently offered to those individuals most often tasked with interviewing an eyewitness about a crime as part of criminal investigations Despite the lack of training and certification we allow interviewers to conduct questioning in the face of well established research as

to the malleability of human memory The assumption is that officials trained in the rules of evidence will innately ask the right questions and in the proper manner without the proper understanding of the fragility of human memory or the proper training That assumption is false and the reality is quite the opposite In fact we learn of cases commonplace in the media that frequently involve questionable interview tactics misidentifications and wrongful convictions of innocent people The Mindful Interview Method uses cognitive research to inform the methods and principles for a mindful approach to gathering only the information the subject remembers This is the best way to use evidence based lines of questioning to perform interviews that elicit the most reliable accounts and information for investigative purposes Considering current reforms on best practices throughout the criminal justice system the book provides a path forward for professional interviewers to adopt interview methodologies that guide the practitioner to question anyone in a mindful manner
