*The Politics of Human Rights* Andrew Vincent, 2010-07-08

The Politics of Human Rights provides a systematic introductory overview of the nature and development of human rights At the same time it offers an engaging argument about human rights and their relationship with politics The author argues that human rights have only a slight relation to natural rights and they are historically novel In large part they are a post 1945 reaction to genocide which is in turn linked directly to the lethal potentialities of the nation state He suggests that an understanding of human rights should nonetheless focus primarily on politics and that there are no universally agreed moral or religious standards to uphold them they exist rather in the context of social recognition within a political association A consequence of this is that the 1948 Universal Declaration is a political not a legal or moral document Vincent goes on to show that human rights are essentially reliant upon the self limitation capacity of the civil state With the development of this state certain standards of civil behaviour have become for a sector of humanity slowly and painfully more customary He shows that these standards of civility have extended to a broader society of states At their best human rights are an ideal civil state vocabulary The author explains that we comprehend both our own humanity and human rights through our recognition relations with other humans principally via citizenship of a civil state Vincent concludes that the paradox of human rights is that they are upheld to a degree by the civil state but the point of such rights is to protect against another dimension of this same tradition the nation state Human rights are essentially part of a struggle at the core of the state tradition

Some comprehensive codes of conduct achieve nothing while other quite vague codes of conduct become well embedded into the organization and foster innovation and change This landmark book explains the best CR instruments available and distils their most valuable elements In the fully revised third edition Deborah Leipziger widens her lens to provide detailed analysis of the UN Guiding Principles on Business and Human Rights the Gender Equality Principles and ISO 26000 while updating other key tools such as the Equator Principles the OECD guidelines and GRI s new G4 framework The codes in this book cover a wide range of issues including human rights labour rights environmental management corruption and corporate governance The book also includes how to or process codes focusing on reporting stakeholder engagement and assurance
