

THE THREATS OF EXTINCTION OF HUMANITY COMING FROM OUTER SPACE, HOW TO DEAL WITH THEM AND HOW TO AVOID THEM

Fernando Alcaforado*

This article aims to present what needs to be done to contribute to the adoption of scientific and technological solutions to prevent the extinction of humanity from threats that exist in outer space and that could reach planet Earth. The threats to the survival of humanity were analyzed in our books *A humanidade ameaçada e as estratégias para sua sobrevivência* (*A threatened humanity and strategies for its survival*) with the subtitle *Como salvar a humanidade das ameaças à sua existência* (*How to save humanity from threats to its existence*) published by Editora Dialética de São Paulo in 2021 [1] and "How to protect human beings from threats to their existence and avoid the extinction of humanity" published by Genoris Publishing of Europe (Chiginda, Republic of Moldova) in 2023 [2].

There are countless threats to humanity's survival coming from outer space today and in the short, medium and long term future. The threats that exist in outer space concern: 1) collision on planet Earth of asteroids, comets or pieces of comets; 2) collision on planet Earth of planets of the solar system; 3) collision on planet Earth of orphan planets wandering in outer space; 4) emission of cosmic rays, especially gamma rays emitted by supernova stars; 5) catastrophic consequences on the Earth's environment resulting from the continued distancing of the Moon from the Earth; 6) death of the Sun; 7) collision of the Andromeda and Milky Way galaxies where the Earth is located; and, 8) end of the Universe. All these catastrophic events, which could occur in the short, medium and long term, could contribute to humanity being driven to extinction as a species if nothing is done to protect humanity.

The collision of asteroids and comets or pieces of comets on planet Earth

The collision on planet Earth of asteroids and comets or pieces of comets, which threaten to collide with Earth, requires the adoption of strategies to avoid their collisions with Earth (Figure 1).
