Hay, 1991-12-31 In the ten year interval since the first edition of this volume went to press our knowledge of extracellular matrix ECM function and structure has enormously increased Extracellular matrix and cell matrix interaction are now routine topics in the meetings and annual reviews sponsored by cell biology societies Research in molecular biology has so advanced the number of known matrix molecules and the topic of gene structure and regulation that we wondered how best to incorporate the new material For example we deliberated over the inclusion of chapters on molecular genetics We decided that with judicious editing we could present the recent findings in molecular biology within the same cell biology framework that was used for the first edition using three broad headings what is extracellular matrix how is it made and what does it do for cells Maintaining control over the review of literature on the subject of ECM was not always an easy task but we felt it was essential to production of a highly readable volume one compact enough to serve the student as an introduction and the investigator as a quick update on graduate the important recent discoveries The first edition of this volume enjoyed considerable success we D Hay Elizabeth vii Contents Introductory Remarks 1 Elizabeth D Hay PART I WHAT IS EXTRACELLULAR MATRIX Chapter 1 Collagen T F Linsenmayer 1 Introduction 7 2 The Collagen Molecule 8 2 1 Triple Helical Domains      *Extracellular Matrix Biology* Richard O.
