has a unique cultural and critical history From its earliest representation in silent films such as Walsh s Regeneration 1915 and Eisenstein s Stachka Strike 1925 to recent productions such as Chukwu s Clemency 2019 and Aronofsky s The Whale 2022 the naturalist film narrative encompasses the whole of film history traversing language movement and genre The naturalist film is predicated on two foundational intersecting paradigms that configure as one ideological system in an overarching scientific and social experimental narrative Either the scientific or social paradigm may be dominant in the film narrative or they may simply co exist but a naturalist film reveals both templates and most significantly suggests an implicit cinematic anthropology that renders the body as an observed spectacle
