formed to operate steamers far and wide a legacy kept alive today by the Paddle Steamer Waverley Alistair Deayton and Iain Quinn take us through the two centuries of Clyde paddle steamers illustrating the most famous such as the Columba Jeanie Deans and Waverley illustrating not just the ships themselves but the piers they sailed from from Rothesay to Helensburgh and from Loch Goil to Loch Long *Paddle Steamers of Australia* Beth Conner, Peter Garfield, 2014-03 There s money to be made on the river so goes a famous line quoted over one hundred years ago that marked the birth of a paddle steamer The river The Murray The Steamer The PS Canberra Small agile and something of a battler the Canberra has been the quiet achiever alongside larger more prominent vessels From her humble beginnings as a fishing boat in a mosquito fleet to one of the longest serving tourist vessels the Canberra is a boat that is loved by many From teetotalers and soldiers to larrikins and hard workers the Canberra has seen thousands of people cross her path during her life With 100 years already on the water the Canberra has made her mark on history and found her way into the memories of many The Murray River A paddle steamer One hundred years of stories *The Science of Spin* Roland Ennos, 2023-07-18 From the time women first used rotating bobbins to twist thread and men whirled slings around their heads to throw stones people have found spin fascinating and baffling in equal measure Now in *The Science of Spin* Roland Ennos shows how rotational motion dominates the workings of the world around us It has shaped the solar system galaxies and black holes It controls our climate and weather from the pattern of trade winds through to the local formation of hurricanes and tornadoes Harnessing the power of spin helped launch civilization from the first developments of the wheel to the systems that now power the industrial world propellers turbines centrifugal pumps electric motors and computer disk drives Even our own bodies are complex systems of rotating joints and levers But scientists have a tendency to ignore the simple and straightforward So 17th century scientists developed the science of mechanics to explain the phenomenon of the orbit of the planets rather than how machines work As a result few people realize how spin makes our planet habitable or how it has been tamed by engineers to make our lives more comfortable In a lively and engaging style Ennos presents a new approach to mechanics that not only helps us better understand the world but also reveals unlikely links between tightrope walkers and tyrannosaurs catapults and tennis players stunt cars and long jumpers By opening our minds he shows how we can all learn to move about more gracefully play sports more successfully and safely and ensure that like cats we always land on our feet A highly entertaining and informative read whether it be natural or engineered spin is what really makes the world go round **The Victorian Empire** James Taylor, 1897 *Thames and Medway Pleasure Steamers from 1935* Andrew Gladwell, 2009-10-15 Evoking memories of the steamers that once took thousands on their trips to the coastal resorts of Kent and Essex Andrew Gladwell brings together a fascinating selection of images and ephemera of these now lost vessels **Bayou Underground** Dave Thompson, 2010-09-01 A veteran music journalist explores rock n roll s bayou roots in a jolting 18 track joy ride that unlocks secrets and back stories worth savoring The Wall Street Journal The bayou of the American south stretching from Houston

Texas to Mobile Alabama is a world all its own with a rich cultural heritage that has had an outsized influence on musicians across the globe In this unique study of marsh music Dave Thompson goes beyond the storied stomping grounds of New Orleans to discover secret legends and vivid mythology in the surrounding wilderness In Bayou Underground the people who have called the bayou home such as Bob Dylan Jerry Reed Nick Cave Bo Didley a one armed Cajun backwoodsman and gator hunter named Amos Moses are unearthed through their own words their lives and music and interviews with residents from the region Included interviews with legendary musicians like Jerry Reed and Bo Didley Bayou Underground is part travelogue part social history and part lament for a way of life that has now all but disappeared

Boat Watching

Edmund W. Jupp,2003-01-01 The aim of the Watching series is to draw

attention to some of the very interesting items around us things that perhaps we don t notice as much as we might The first was Bridge Watching and when this was put on the Net it produced to the surprise of the author such a pleasant flood of e mail that another was written called Water Watching This too was kindly received So it was tempting to continue with the theme Boat Watching doesn t set out to teach you how to design a boat build a boat or even how to use a boat I hope it will help you to look at boats though really look at them and to enjoy doing so When I say boats I mean boats and things for boats have things on and about them and they are all interesting If you are looking at boats you can t help seeing all the other things too Boats are truly lovely things from the humblest to the noblest Given a bit of time you can lounge against a wall or a post or stretch out in a chair and just drink in the happiness of looking Looking at things is one of the great free benefits of being alive You don t have to be an expert but a little knowledge does help to enjoy the details This treatment doesn t set out to turn you into a mariner or boat designer It isn t meant intended for that kind of person It is chiefly for idlers loafers those who have time to like stand and stare or who can make such time taking life at a reasonable pace and enjoying it even if only between bouts of frenzied exertions
