Farm To Factory A Reinterpretation Of The Soviet Industrial Revolution:

Farm to Factory Robert C. Allen, 2009-07-26 To say that history's greatest economic experiment Soviet communism was also its greatest economic failure is to say what many consider obvious Here in a startling reinterpretation Robert Allen argues that the USSR was one of the most successful developing economies of the twentieth century He reaches this provocative conclusion by recalculating national consumption and using economic demographic and computer simulation models to address the what if questions central to Soviet history Moreover by comparing Soviet performance not only with advanced but with less developed countries he provides a meaningful context for its evaluation Although the Russian economy began to develop in the late nineteenth century based on wheat exports modern economic growth proved elusive But growth was rapid from 1928 to the 1970s due to successful Five Year Plans Notwithstanding the horrors of Stalinism the building of heavy industry accelerated growth during the 1930s and raised living standards especially for the many peasants who moved to cities A sudden drop in fertility due to the education of women and their employment outside the home also facilitated growth While highlighting the previously underemphasized achievements of Soviet planning Farm to Factory also shows through methodical analysis set in fluid prose that Stalin's worst excesses such as the bloody collectivization of agriculture did little to spur growth Economic development stagnated after 1970 as vital resources were diverted to the military and as a Soviet leadership lacking in original thought pursued wasteful investments *The Industrial Revolution in World History* Peter N Stearns, 2018-04-17 The industrial revolution was the single most important development in human history over the past three centuries and it continues to shape the contemporary world With new methods and organizations for producing goods industrialization altered where people live how they play and even how they define political issues By exploring the ways the industrial revolution reshaped world history this book offers a unique look into the international factors that started the industrial revolution and its global spread and impact In the fourth edition noted historian Peter N Stearns continues his global analysis of the industrial revolution with new discussions of industrialization outside of the West including the study of India the Middle East and China In addition an expanded conclusion contains an examination of the changing contexts of industrialization *The Industrial Revolution in World History* is essential for students of world history and economics as well as for those seeking to know more about the global implications of what is arguably the defining socioeconomic event of modern times *Reconceptualizing the Industrial Revolution* Jeff Horn, Leonard N Rosenband, Merritt Roe Smith, 2010-10-29 Closely linked essays examine distinctive national patterns of industrialization This collection of essays offers new perspectives on the Industrial Revolution as a global phenomenon The fifteen contributors go beyond the longstanding view of industrialization as a linear process marked by discrete stages Instead they examine a lengthy and creative period in the history of industrialization 1750 to 1914 reassessing the nature of and explanations for England's industrial primacy and comparing significant industrial developments in countries ranging from China to Brazil

Each chapter explores a distinctive national production ecology a complex blend of natural resources demographic pressures cultural impulses technological assets and commercial practices At the same time the chapters also reveal the portability of skilled workers and the permeability of political borders The Industrial Revolution comes to life in discussions of British eagerness for stylish middle class products the Enlightenment's contribution to European industrial growth early America's incremental rather than revolutionary industrialization the complex connections between Czarist and Stalinist periods of industrial change in Russia Japan's late and rapid turn to mechanized production and Brazil's industrial financial boom By exploring unique national patterns of industrialization as well as reciprocal exchanges and furtive borrowing among these states the book refreshes the discussion of early industrial transformations and raises issues still relevant in today's era of globalization

political change Each provides a systematic account of a very large subject but they are also both imaginative and interpretative The Series is intended to be accessible to the widest possible readership and the accessibility of its volumes is matched by the style of presentation and production **A History of the Global Economy** Colin White,2018-11-30

Providing an exceptional overview and analysis of the global economy from the origins of Homo sapiens to the present day Colin White explores our past to help understand our economic future He veers away from traditional Eurocentric approaches providing a truly global scope for readers The main themes include the creative innovativeness of humans and how this generates economic progression the common economic pathway trodden by all societies and the complementary relationship between government and the market **Finding a Path for China's Rise** Philippe Lionnet,2023-01-02

The rise of China is ever present in debates on globalisation and ongoing power shifts In a time of rising international tensions understanding the interdependencies between China s course and the world economy is ever more important Often the economic reforms under Deng Xiaoping after 1978 are emphasised They initiated dramatic changes in China s economy and contributed to its ascent as a world power In contrast less attention has been given to the context in which these reforms were implemented Philippe Lionnet analyses important adjustments in China s agricultural industrial and foreign trade policies in the course of the 1970s as well as their origins He shows how policy experiments and their limits shaped the path of the socialist state *The Dead Pledge* Judge Earl Glock,2021-04-06

The American government today supports a financial system based on mortgage lending and it often bails out the financial institutions making these mortgages The Dead Pledge reveals the surprising origins of American mortgages and American bailouts in policies dating back to the early twentieth century Judge Glock shows that the federal government began subsidizing mortgages in order to help lagging sectors of the economy such as farming and construction In order to encourage mortgage lending the government also extended unprecedented assistance to banks During the Great Depression the federal government made new mortgage lending and bank bailouts the centerpiece of its recovery program Both the Herbert Hoover and Franklin Roosevelt administrations created semipublic financial institutions such as Fannie Mae to provide cheap tradable mortgages and they extended guarantees to more banks and financiers Ultimately Glock argues the desire to protect the financial system took precedence over the desire to help lagging parts of the economy and the government became ever more tied into the financial world The Dead Pledge recasts twentieth century economic financial and political history and demonstrates why the greatest safety net created in this era was the one supporting finance Secret Leviathan Mark Harrison,2023-06-06

The Soviet Union was one of the most secretive states that ever existed Defended by a complex apparatus of rules and checks administered by the secret police the Soviet state had seemingly unprecedented capabilities based on its near monopoly of productive capital monolithic authority and secretive decision making But behind the scenes Soviet secrecy was double edged it raised transaction costs incentivized indecision compromised the effectiveness of government officials eroded citizens trust in

institutions and in each other and led to a secretive society and an uninformed elite The result is what this book calls the secrecy capacity tradeoff a bargain in which the Soviet state accepted the reduction of state capacity as the cost of ensuring its own survival This book is the first comprehensive analytical multi faceted history of Soviet secrecy in the English language Harrison combines quantitative and qualitative evidence to evaluate the impact of secrecy on Soviet state capacity from the 1917 Bolshevik Revolution to the collapse of the Soviet Union in 1991 Based on multiple years of research in once secret Soviet era archives this book addresses two gaps in history and social science one the core role of secrecy in building and stabilizing the communist states of the twentieth century the other the corrosive effects of secrecy on the capabilities of authoritarian states

The Capitalist Transformation of State Socialism David Lane,2013-11-20 David Lane outlines succinctly yet comprehensively the development and transformation of state socialism While focussing on Russia and the countries of Eastern Europe he also engages in a discussion of the Chinese path In response to the changing social structure and external demands he outlines different scenarios of reform He contends that European state socialism did not collapse but was consciously dismantled He brings out the West s decisive support of the reform process and Gorbachev s significant role in tipping the balance of political forces in favour of an emergent ascendant class In the post socialist period he details developments in the economy and politics He distinguishes different political and economic trajectories of countries of the former USSR the New Member States of the European Union and China and he notes the attempts to promote further change through coloured revolutions The book provides a detailed account not only of the unequal impact of transformation on social inequality which has given rise to a privileged business and political class but also how far the changes have fulfilled the promise of democracy promotion wealth creation and human development Finally in the context of globalisation the author considers possible future political and economic developments for Russia and China Throughout the author a leading expert in the field brings to bear his deep knowledge of socialist countries draws on his research on the former Soviet Union and visits to nearly all the former state socialist countries including China

Science, Geopolitics and Culture in the Polar Region Sverker Sörlin,2016-04-01 Throughout the twentieth century glaciologists and geophysicists from Denmark Norway and Sweden made important scientific contributions across the Arctic and Antarctic This research was of acute security and policy interest during the Cold War as knowledge of the polar regions assumed military importance But scientists also helped make the polar regions Nordic spaces in a cultural and political sense with scientists from Norden punching far above their weight in terms of population geographical size or economic activity This volume presents an image of Norden that stretches far beyond its conventional limits covering a vast area in the North Atlantic and the Arctic Sea as well as parts of Antarctica Rich in resources scarce in population but critically important in global and regional geopolitics these spaces were contested by major powers such as Russia the United States Canada and in the Antarctic Argentina Australia South Africa and others The empirical focus on Danish Norwegian and Swedish influence in the polar regions

during the twentieth century embraces a diverse array of themes from the role of science in policy and diplomacy to the tensions between nationalism and internationalism with clear relevance to the important role science plays in contemporary discussions about Nordic engagement with the polar regions **The Routledge Handbook on the History of**

Development Corinna R. Unger, Iris Borowy, Corinne A. Pernet, 2022-06-23 This bold and ambitious handbook is the first systematic overview of the history of development ideas themes and actors in the twentieth century Taking stock of the field the book reflects on blind spots points out avenues for future research and brings together a greater plurality of regions actors and approaches than other publications on the subject The book offers a critical reassessment of how historical experiences have shaped contemporary understandings of development demonstrating that the seemingly self evident concept of development has been contingent on a combination of material conditions power structures and policy choices at different times and in different places Using a world history approach the handbook highlights similarities in development challenges across time and space and it pays attention to the meanings of ideological cultural and economic divides in shaping different understandings and practices of development Taking a thematic approach the book shows how different actors governments non governmental organizations individuals corporations and international organizations have responded to concerns regarding the conditions in their own or other societies such as the provision of education health or food approaches to infrastructure development and industrialization the adjustment of social conditions population policies and migration and the maintenance of stability and security Bringing together a range of voices from across the globe this book will be perfect for advanced students and researchers of international development history Research in Economic History

Red Holocaust Steven Rosefielde, 2009-12-16 Twentieth and twenty first century communism is a failed experiment in social engineering that needlessly killed approximately 60 million people and perhaps tens of millions more These high crimes against humanity constitute a Red Holocaust that exceeds the combined carnage of the French Reign of Terror Ha Shoah Showa Japan s Asian holocaust and all combat deaths in World War I and II This fascinating book investigates high crimes against humanity in the Soviet Union eastern and central Europe North Korea China Vietnam Laos and Cambodia 1929 2009 and compares the results with Ha Shoah and the Japanese Asian Holocaust As in other studies blame is ascribed to political ideological and personal causes but special emphasis is given to internal contradictions in Marx s utopian model as well as Stalinist and post Stalinist transition systems concocted to realize communist ends This faulty economic engineering forms a bridge to the larger issue of communism s historical failure The book includes a comprehensive study of the transcommunist holocaust a judicial assessment of holocaust culpability and special pleadings an obituary for Stalinism everywhere except North Korea and a death watch for contemporary communism in China Vietnam Laos Cambodia North

Korea Cuba and Nepal a comparative assessment of totalitarian high crimes against humanity a call for memory as a defense against recurrent economic racial and ethnic holocausts The book will be useful to undergraduate and higher level students interested in Russian history Stalism communism North and South Korean economic performance and international affairs Steven Rosefielde is a Professor of Economics at the University of North Carolina Chapel Hill and a member of the Russian Academy of Natural Sciences **Red Holocaust** , *Reluctant Cold Warriors* Vladimir Kontorovich,2019-09-02 Scholars attribute the collapse of the Soviet Union in part to the militarization of its economy But during the Cold War economic studies of the USSR largely neglected the military sector of the Soviet economy its dominant and most successful part This is all the more puzzling in that academic study of the Soviet economy in the US was specifically created to help fight the Cold War If the rival superpower maintained the peacetime war economy why did experts fail to tell us when it mattered Vladimir Kontorovich shows how Western economists came up with strained non military interpretations of several important aspects of the Soviet economy which the Soviets themselves acknowledged to have military significance Such civilianization suggests that the neglect of the military sector was not forced on scholars of the Soviet economy by secrecy it was their choice The explanation of this choice in *Reluctant Cold Warriors* raises many questions about the internal workings of economic Sovietology and its intellectual and political background Are peripheral academic fields mimicking the agenda of the discipline s mainstream more likely to produce faulty scholarship Did the search for the essence of socialism distract researchers from the actual Soviet economy Were economic Sovietologists under political pressure and if so in what direction This book answers these questions in a way that has broad relevance for national security uses of social science today

Marxism and the Global Financial Crisis Hillel Ticktin,2013-09-13 The book discusses the nature of Marxist theory of crisis and applies it to the global financial crisis which began in 2007 Is the contemporary crisis simply the usual periodic upturn and downturn or is there something more fundamental Is there a structural crisis of capitalism from which there is no immediate solution Is capitalism managed and does it have a strategy Is the financial crisis representative of a failure in capitalism itself to subject banks and other financial institutions to the overall economy The book discusses Marx s view on crises as well as ideas on money and finance It considers the different modern Marxist ideas on the causes of crises falling rate of profit disproportionality and underconsumption It goes into detail as to the nature of the present crisis its course and causes in a spirited and independent manner Apart from the United States it considers the situation in the two countries in which protests erupted Iran and Greece They are taken as examples of the effect of the crisis on the country the society and the economy as well as its politics This book was originally published as a special issue of *Critique Agrarian Reform in Russia* Carol S. Leonard,2010-12-06 This book examines the history of reforms and major state interventions affecting Russian agriculture the abolition of serfdom in 1861 the Stolypin reforms the NEP the Collectivization Khrushchev reforms and finally farm enterprise privatization in the early 1990s It shows a pattern emerging from a political imperative in imperial

Soviet and post Soviet regimes and it describes how these reforms were justified in the name of the national interest during severe crises rapid inflation military defeat mass strikes rural unrest and or political turmoil It looks at the consequences of adversity in the economic environment for rural behavior after reform and at long run trends It has chapters on property rights rural organization and technological change It provides a new database for measuring agricultural productivity from 1861 to 1913 and updates these estimates to the present This book is a study of the policies aimed at reorganizing rural production and their effectiveness in transforming institutions

Socialist Optimism Paul Auerbach, 2016-04-08 Paul Auerbach s Socialist Optimism offers an alternative political economy for the twenty first century Present day capitalism has generated growing inequality of income and wealth persistent high levels of unemployment and ever diminishing prospects for young people But in the absence of a positive vision of how society and the economy might develop in the future the present trajectory of capitalism will never be derailed no matter how acute the critique of present day developments The detailed blueprint presented here focuses upon the education and upbringing of children in the context of social equality and household security It yields a well defined path to human development and liberation as well as democratic control of working life and public affairs Socialism as human development gives a unity and direction to progressive policies that are otherwise seen to be a form of pragmatic tinkering in the context of a pervasive capitalist reality
