Action International, 2012-05-17 Arguing that corporations are mainly responsible for the expansion of the damaging industrial food system this discussion focuses on these organizations and the ways they organize and control food production and distribution Demonstrating how the corporate food system destroys those systems based on local markets local cultures and biodiversity this account highlights how it puts the profits of the few before the needs of people and leads to massive food safety incidents environmental destruction labor exploitation and the decimation of rural communities Informative and direct this book aims to inspire individuals to actively take the food system back from corporations and put it in the hands of people

Mosaic Landscapes and Ecological Processes L. Hansson, L. Fahrig, G. Merriam, 2012-12-06 This series presents studies that have used the paradigm of landscape ecology Other approaches both to landscape and landscape ecology are common but in the last decade landscape ecology has become distinct from its predecessors and its contemporaries Landscape ecology addresses the relationships among spatial patterns temporal patterns and ecological processes The effect of spatial configurations on ecological processes is fundamental When human activity is an important variable affecting those relationships landscape ecology includes it Spatial and temporal scales are as large as needed for comprehension of system processes and the mosaic included may be very heterogeneous Intellectual utility and applicability of results are valued equally The International Association for Landscape Ecology sponsors this series of studies in order to introduce and disseminate some of the new knowledge that is being produced by this exciting new environmental science Gray Merriam Ottawa Canada Foreword This is a book about real nature or as close to real as we know a nature of heterogeneous landscapes wild and humanized fine grained and coarse grained wet and dry hilly and flat temperate and not so temperate Real nature is never uniform At whatever spatial scale we examine nature we encounter patchiness If we were to look down from high above at a landscape of millions of hectares using a zoom lens to move in and out from broad overview to detailed inspection of a square meter we would see that patterns visible at different scales overlay one another      *Quick*
