**The Vocational Quest** Helen Connell, Nicholas Lowe, Malcolm Skilbeck, Kirsten Tait, 2002-02-07 Government attempts in recent years to create a national system of vocational education and training have marked a profound shift both in educational policy and in underlying concepts of what education is for Relations between schools and the working world are changing all the time and the implementation of ideas of vocationalism has forced a blurring of the time honoured boundaries between educations concerned with concepts and training or with skills The challenge now is to define how the schools can give young people the foundations for life in a working world in which they are likely to have to change jobs and where work will fill a smaller proportion of their lives The Vocational Quest maps the evolution of vocationalism in Britain in historical terms and examines how the particular forms that have come into being in the last few years compare with developments in other parts of the world including Continental Europe Japan the United States Australia and New Zealand It argues for new forms of communication and partnership between formal education and training and the wider community in which values will be shared and no one partner will win at the expense of others *Debates in Religious Education* L. Philip Barnes, 2011-07-07 What are the key debates in Religious Education teaching today *Debates in Religious Education* explores the major issues all RE teachers encounter in their daily professional lives It encourages critical reflection and aims to stimulate both novice and experienced teachers to think more deeply about their practice and link research and evidence to what they have observed in schools This accessible book tackles established and contemporary issues enabling you to reach informed judgements and argue your point of view with deeper theoretical knowledge and understanding Taking account of recent controversy and challenging assumptions about the place of religion in education expert contributors cover key topics such as Effective pedagogy in RE teaching Exploring thinking skills and truth claims The relationship of science and religion in the classroom The place of school worship in contemporary society The role of RE in spiritual and moral development Diversity in the RE classroom With its combination of expert opinion and fresh insight *Debates in Religious Education* is the ideal companion for any student or practising teacher engaged in initial training continuing professional development and Masters level study **Drugspeak** John Booth Davies, 2018-10-24 *Drugspeak* The Analysis of Drug Discourse describes the way in which conversations between drug users vary and change according to context and circumstance in ways that suggest that there is no single truth about the state we call addicted The central thesis of the book is that the explanations that drug users give for their drug use make sense not so much as sources of facts but as primarily functional statements shaped by a climate of moral and legal censure Consequently the significance of drug conversations lies not in their literal semantics but in the purposes such conversations serve The argument raises a number of fundamental issues about the performative rather than the informative nature of language about the nature of the scientific facts concerning drug use and about the very nature of science itself Starting with a general overview of the problems arising from a mechanistic and deterministic view of

science the book identifies a need for a new approach to the un *Resources in Education* ,1995 **Drugs** Louise O'Connor,1998-01-01 With the aim of showing how educators can use their skills to inform practical action on problematic drug issues this text identifies the drug issues emerging in the classroom and highlights strategies for dealing with them

Privy Council, 1887 **Shades of Sovereignty** Paul Wilson, 2021-07-12 This comprehensive book traces the role of money in the creation of the state Starting in the early modern era Paul Wilson explores the monetary systems of empires and new states in the age of nation building in the eighteenth and nineteenth century Spanning a wide geographical and historical range from the creation of the United States of America to the establishment of the European Union and the breakup of the Soviet Union and beyond the author examines changing attitudes toward monetary sovereignty as dozens of new states created new currencies since the end of the Second World War Wilson analyzes the decision making of newly independent states in their choice of an appropriate currency considering the complex factors involved ranging from the purely economic to questions of security international

recognition and outright nationalism that have played a part The author challenges the notion that each country must necessarily have its own currency and explains why some newly independent countries have chosen to adopt the currency of another state Citing the examples of international currency unions of the nineteenth century and the present day he contends that sharing a currency does not represent a surrender of political sovereignty Instead Wilson argues for a more rational attitude toward money as a facilitator of transactions rather than as a symbol of national identity *Willing's Press Guide and Advertisers' Directory and Handbook* ,1994
