Fast Software Encryption 7th International Workshop Fse 2000 New York Ny Usa April 10-12 2000 Proceedings:

Fast Software Encryption Bruce Schneier, 2003-07-31 Since 1993 cryptographic algorithm research has centered around the Fast Software Encryption FSE workshop. First held at Cambridge University with 30 attendees, it has grown over the years and has achieved worldwide recognition as a premiere conference. It has been held in Belgium, Israel, France, Italy, and most recently New York. FSE 2000 was the 7th international workshop held in the United States for the first time. Two hundred attendees gathered at the Hilton New York on Sixth Avenue to hear 21 papers presented over the course of three days, 10-12 April 2000. These proceedings constitute a collection of the papers presented during those days. FSE concerns itself with research on classical encryption algorithms and latest primitives such as hash functions. This branch of cryptography has never been more in the public eye. Since 1997 NIST has been shepherding the Advanced Encryption Standard (AES) process, trying to select a replacement algorithm for DES. The first AES conference held in California the week before Crypto 98 had over 250 attendees. The second conference held in Rome two days before FSE 99 had just under 200 attendees. The third AES conference was held in conjunction with FSE 2000 during the two days following it at the same hotel.

Fast Software Encryption Bruce Schneier, 2001-02-14 This book constitutes the thoroughly refereed post-proceedings of the 7th International Workshop on Fast Software Encryption FSE 2000 held in New York City, USA, in April 2000. The 21 revised full papers presented were carefully reviewed and selected from a total of 53 submissions. The volume presents topical sections on stream cipher cryptanalysis, new ciphers, AES cryptanalysis, block cipher cryptanalysis, and theoretical work.

Fast Software Encryption Orr Dunkelman, 2009-07-28 Fast Software Encryption 2009 was the 16th in a series of workshops on symmetric key cryptography. Starting from 2002, it is sponsored by the International Association for Cryptologic Research (IACR). FSE 2009 was held in Leuven, Belgium, after previous venues held in Cambridge, UK (1993), 1996, Leuven, Belgium (1994, 2002), Haifa, Israel (1997), Paris, France (1998), 2005, Rome, Italy (1999), New York, USA (2000), Yokohama, Japan (2001), Lund, Sweden (2003), New Delhi, India (2004), Graz, Austria (2006), Luxembourg, Luxembourg (2007), and Lausanne, Switzerland (2008). The workshop's main topic is symmetric key cryptography, including the design of fast and secure symmetric key primitives such as block ciphers, stream ciphers, hash functions, message authentication codes, modes of operation, and iteration, as well as the theoretical foundations of these primitives. This year, 76 papers were submitted to FSE, including a large portion of papers on hash functions following the NIST SHA-3 competition, whose workshop was held just after FSE in the same location. From the 76 papers, 24 were accepted for presentation. It is my pleasure to thank all the authors of all submissions for the high quality research, which is the base for the scientific value of the workshop. The review process was thorough; each submission received the attention of at least three reviewers, and at the end, besides the accepted papers, the Committee decided that the merits of the paper "Block Cipher Based Hashing Revisited" entitled the authors to receive the best paper award. I wish to thank all Committee members and the referees for their hard and dedicated work.
