## **Fast Track To Zero Nuclear Weapons:**

Transparency in Nuclear Warheads and Materials Nicholas Zarimpas, 2003 These studies address the technical means and procedures for establishing transparency in nuclear warheads and materials in the nuclear weapons states **The Politics of Nuclear Disarmament** Tim Street, 2021-04-21 This book explores what political conditions must be established and what obstacles overcome for the five official Nuclear Weapon States NWS China France Russia the UK and US to eliminate their nuclear weapons The different views and positions of a range of actors concerning nuclear weapons issues including elite perspectives and public opinion and the political assumptions underpinning them are discussed to develop a more democratic approach to disarmament Addressing the lack of detailed analysis concerning the meaning of nuclear disarmament for the domestic political orders of NWS the book critically explores different approaches to and theories of disarmament within legal political and technical literatures and orthodox and critical theory It also builds on previous discussions of nuclear possession restraint arms control and disarmament concerning both nuclear possessor and non possessor states identifying the insights these works provide regarding how NWS disarmament may be advanced Contributing to theoretical debates concerning how domestic politics interacts with and determines states international behaviour the book will be of interest to all scholars and students of history politics international relations security studies military history war studies peace studies conflict democracy and global governance *Another Japan Is Possible* Jennifer Chan, 2008 This book looks at the emergence of internationally linked Japanese nongovernmental advocacy networks that have grown rapidly since the 1990s in the context of three conjunctural forces neoliberalism militarism and nationalism It connects three disparate literatures on the global justice movement on Japanese civil society and on global citizenship education Through the narratives of fifty activists in eight overlapping issue areas global governance labor food sovereignty peace HIV AIDS gender minority and human rights and youth *Another Japan is Possible* examines the genesis of these new social movements their critiques of neoliberalism militarism and nationalism their local regional and global connections their relationships with the Japanese government and their role in constructing a new identity of the Japanese as global citizens Its purpose is to highlight the interactions between the global and the local that is how international human rights and global governance issues resonate within Japan and how in turn local alternatives are articulated by Japanese advocacy groups and to analyze citizenship from a postnational and postmodern perspective Path to Zero Richard A. Falk, David Krieger, 2015-12-22 The Path to Zero argues that it is time to re open the public debate on nuclear weapons In a series of clear and well reasoned dialogues long time scholars and peace activists Richard Falk and David Krieger probe key questions about our nuclear capability and dig beneath the secrecy that has largely surrounded its existence Falk and Krieger argue that Hiroshima and Nagasaki were only the beginning In recent times nuclear annihilation at the hands of rogue states and terrorists has become an even greater concern than the spectre of nuclear war between superpowers The Path to Zero

argues that whilst none of us has the power to bring about global change alone together we are immensely powerful powerful enough to overcome the threats of the Nuclear Age and move us appreciably along the path to zero      **Disarming**

**Apartheid** Robin E. Möser, 2024-03-28 South Africa remains the only state that developed a nuclear weapons capability but ultimately decided to dismantle existing weapons and abandon the programme Disarming Apartheid reconstructs the South African decision making and diplomatic negotiations over the country's nuclear weapons programme and its international status drawing on new and extensive archival material and interviews This deeply researched study brings to light a unique disarmament experience It traces the country's previously neglected path towards accession to the Treaty on the Non Proliferation of Nuclear Weapons NPT Rather than relying primarily on US government archives the book joins the burgeoning field of national nuclear histories based on unprecedented access to policymakers and documents in the country studied Robin E M ser in addition to providing access to important new documents offers original interpretations that enrich the study of nuclear politics for historians and political scientists      Toward Nuclear Abolition Lawrence S. Wittner, 1993

The final volume in the trilogy The Struggle Against the Bomb this book presents the inspiring and dramatic story of how citizen activists helped curb the arms race and prevent nuclear war      **Cumulated Index Medicus**, 2000      **The**

Pahuja, Gerry Simpson, Anna Saunders, 2020 This is the first book to examine in detail the relationship between the Cold War and International Law     The Domestic Politics of International Relations Roderic Alley, 2018-02-06 This title was first published in 2000 An important comparative study which considers the domestic international interface The book covers climate change in Australia New Zealand and the abolition of nuclear weapons the Bougainville conflict and settlement in Papua New Guinea Decolonization New Caledonia East Timor West Papua Indigenous Rights Australia New Zealand and Fiji Governance Reform and Environmental Management challenges in the Pacific Island states The conclusion evaluates propositions advanced in the introductory chapter regarding the distinctive domestic international issues raised and argues that in order to comprehend foreign relations in an increasingly complex world there is no substitute for a thorough knowledge of distinctive local social and political dynamics shaping international orientations The theme of the book is the way that these interactions have operated in the cases examined     *Brazil in the Global Nuclear Order, 1945-2018* Carlo Patti, 2021-12-14 The first comprehensive and definitive history of Brazil's decision to give up the nuclear weapon option Why do countries capable of going nuclear choose not to Brazil which gained notoriety for developing a nuclear program and then backtracking into adherence to the nonproliferation regime offers a fascinating window into the complex politics surrounding nuclear energy and American interference Since the beginning of the nuclear age author Carlo Patti writes Brazil has tried to cooperate with other countries in order to master nuclear fuel cycle technology but international limitations have constrained the country's approach Brazil had the start of a nuclear program in the 1950s which led to the United States interfering in agreements between Brazil and other countries with advanced nuclear industries such as France and West Germany These international constraints especially those imposed by the United States partly explain the country's decision to create a secret nuclear program in 1978 and to cooperate with other countries outside the Nuclear Non Proliferation Treaty NPT regime such as Argentina and China Yet in 1998 Brazil chose to adhere to the Nuclear Non Proliferation Treaty it so actively opposed only three decades prior although the country still critiques the unfair nature of the treaty Patti draws on recent declassified primary sources collected during years of research in public and private archives in eight different countries as well as interviews with former presidents diplomats and scientists to show how US nonproliferation policies deeply affected Brazil's decisions Assessing the domestic and international factors that informed the evolution of Brazil's nuclear diplomacy Brazil in the Global Nuclear Order 1945 2018 also discusses what it means with respect to Brazil's future political goals

**Space Law** Marietta Benkö,Kai-Uwe Schrogl,Denise Digrell,Esther Jolley,2005 The contributions in this book reflect on the growing diversification of space law and is divided in two parts The first part provides a look at the current developments in international space law and regulation and the second part investigates future perspectives of this process It is only recently that international space law entered its third phase of development While the first phase between the 1960s and 1970s was characterized by the elaboration of international conventions in the framework of the United Nations the second phase saw the adoption of special legal regimes in the form of UN General Assembly Resolutions which were dealing with issues like direct broadcasting by satellites DBS remote sensing RS and the use of nuclear power sources NPS in outer space The third

and current phase received its impetus from the growing commercialization of space activities and their emerging privatization. Therefore the main characteristics of this period relate to the efforts of adapting international space law to these recent changes and of finding ways and means to reconcile State interests with commercial perspectives. This book forms a welcome addition to any collection in the field of space law and is a refreshing contribution to the discussion in the field.
